Gastrointestinal endoscopy is now mainstream and the focus is now changing from developing new techniques to enhancing the efficiency and quality of fundamental techniques. There are three elements to this agenda: initial training, continuous quality improvement and patient empowerment. For the first time, the book is accompanied by two CD-ROMs -featuring video and animation of how to perform the techniques. The first CD-ROM covers the upper GI tract and consists of two sections: (1) the background to instruments and how to get set up, and (2) how to perform diagnostic techniques. The second CD-ROM covers diagnostic and therapeutic procedures in colonoscopy. Cotton and Williams' book has evolved with each new edition to reflect developments in the field of endoscopy over the last 20 years. This fifth edition draws on the vast experience of the authors and heralds current changes in both endoscopy and publishing. The emerging 'back to basics' attitude of endoscopy opinion formers with regard to the teaching of endoscopy has resulted in a more focused table of contents specifically targeted at newcomers to this specialty.

Marketing Channel Strategy: An Omni-Channel Approach is the first book on the market to offer a completely unique, updated approach to channel marketing. Palmatier and Sivadas have adapted this classic text for the modern marketing reality by building a model that shows students how to engage customers across multiple marketing channels

simultaneously and seamlessly. The omni-channel is different from the multi-channel. It recognizes not only that customers access goods and services in multiple ways, but also that they are likely doing this at the same time; comparing prices on multiple websites, and seamlessly switching between mobile and desktop devices. With the strong theoretical foundation that users have come to expect, the book also offers lots of practical exercises and applications to help students understand how to design and implement omni-channel strategies in reality. Advanced undergraduate and graduate students in marketing channels, distribution channels, B2B marketing, and retailing classes will enjoy acquiring the most cutting-edge marketing skills from this book. A full set of PowerPoint slides accompany this new edition, to support instructors.

CIM Coursebook 06/07 Marketing Communications

How long does it take to buy a loaf of bread? A pair of shoes? A car? These are trick questions. Imagine a hundred potential customers in the same store, each holding a stopwatch. Some of their stopwatches are ticking very fast (grabbing a bottle of wine before a party), some glacially slow (agonizing over the perfect bottle for a first date). Some, in fact, aren't ticking at all. For today's savvy marketers understanding how much time and energy consumers are willing to spend shopping for their product or service is the single most important (yet overlooked) factor in maximizing sales. After years of advising clients who sell

everything from all-natural fruit juice to health insurance, John Rosen and AnnaMaria Turano have learned that capturing a consumer's attention at precisely the right time and holding it through the purchase decision requires a strategy that they call Stopwatch Marketing. It is the method of adjusting your marketing strategies to match the shopping styles of your customers. Stopwatch Marketing unveils a systematic way to capitalize on four different types of shopping styles—Recreational, Painstaking, Impatient, and Reluctant. Rosen and Turano also share the stories of how America's top brands put the concept of Stopwatch Marketing to work for them. You'll learn how: Goodyear turned Assurance with TripleTred tires into a billion-dollar success story built on a shopping cycle that takes less than an hour. Roto-Rooter became the only legitimate brand in its category by controlling the typical Yellow Pages users' 50-second search pattern. Whole Foods reinvented the supermarket shopping experience to slow down their customers' clocks. Microsoft exploits shoppers' reluctance to spend time researching alternatives to their Office software. Lexus begins targeting customers up to a year before they set foot inside a dealer showroom. In a world where consumers are assaulted with thousands of different marketing messages every day, the biggest challenge is to align the content and timing of your messages to the amount of time buyers have for hearing them. Stopwatch Marketing shows how to do just that and increase your bottom line as a result.

But over time, you may replace or add partners, add or subtract routes to market, and change your product lines - so your channel strategy must adapt in order to prevent your tower from collapsing or breaking apart. This Field Guide introduces you to the channels landscape, helps you understand your building block options, and unpacks the physics of adding and subtracting channel components, to give you the tools you need to keep your go-to-market strategy resilient, responsive, and a source of competitive advantage.

As in many other sectors, in agribusiness major changes are taking place. On the demand side,

consumers are changing lifestyles, eating and shopping habits, and increasingly are demanding more accommodation of these needs in the supermarket. With regard to the supply: the traditional distribution channel dominators - manufacturers of branded consumer products - are trying hard to defend their positions against retailers, who gather and use information about the consumer to streamline their enterprises and strengthen their ties with the consumer. The agricultural producers, meanwhile, face increased regulations with regard to food additives, pesticides, and herbicides. Pressures rise as their business becomes more specialized and capital-intensive than that of their predecessors. Finally, the larger political climate is not so favorable to agriculture, which now has to compete in the global market without significant government support. This title describes and interprets changes in the domain of agriculture and food. The contributors develop the theme of taking an interdisciplinary approach to coping with these changes, using concepts and methods developed in general marketing, which are adapted so as to apply to the particular characteristics of the food and agriculture sector. This book is published to honor the distinguished career of Professor Mathew T.G. Meulenberg from Wageningen Agricultural University, on the occasion of his retirement in September 1996. As a scientist, teacher, and advisor to the agribusiness and the government, Professor Meulenberg has made an important contribution to the development of marketing, inside and outside the domain of agriculture.
