Math in Focus

Math in Focus: Singapore Math

Math In Focus: Singapore Math by Marshall Cavendish brings the world-class Singapore math curriculum to your K-8 classrooms. The problem-based approach thoughtfully builds on a concrete-to-pictorial-to-abstract progression for greater depth of instruction and mastery of math concepts. Visualization strategies including model drawing allow students to master more complex problems. The program also uses powerful number bond models to enhance the instruction for mental math, number sense, and computation.

Introduction to Information Retrieval

Math in Focus: Singapore Math Grade 5

Singapore has been a world leader in math performance for over 15 years. Bring the world-class Singapore curriculum to your students with Math in Focus. Singapore's curriculum was one of the models used to create the Common Core State Standards. Math in Focus provides complete Common Core support for teachers and students. Math in Focus teaches concepts using a concrete-pictorial-abstract learning progression to anchor learning in real-world, hands-on experiences. Problem solving is at the heart of the Singapore math curriculum and is supported with a proven pedagogy and innovative technology, including the Singapore Math, Bar Models app for iPad. - Publisher.

Math in Focus

Don't simply show your data—tell a story with it! Storytelling with Data teaches you the fundamentals of data visualization and how to communicate effectively with data. You'll discover the power of storytelling and the way to make data a pivotal point in your story. The lessons in this illuminative text are grounded in theory, but made accessible through numerous real-world examples—ready for immediate application to your next graph or presentation. Storytelling is not an inherent skill, especially when it comes to data visualization, and the tools at our disposal don't make it any easier. This book demonstrates how to go beyond conventional tools to reach the root of your data, and how to use your data to create an engaging, informative, compelling story. Specifically, you'll learn how to: Understand the importance of context and audience Determine the appropriate type of graph for your situation Recognize and eliminate the clutter clouding your information Direct your audience's attention to the most important parts of your data Think like a designer and utilize concepts of design in data visualization Leverage the power of storytelling to help your

message resonate with your audience Together, the lessons in this book will help you turn your data into high impact visual stories that stick with your audience. Rid your world of ineffective graphs, one exploding 3D pie chart at a time. There is a story in your data—Storytelling with Data will give you the skills and power to tell it!

Math in Focus: Singapore Math Grade 6

In Innovate Inside the Box, George Couros and Katie Novak provide informed insight on creating purposeful learning opportunities for all students. By combining the power of the Innovator's Mindset and Universal Design for Learning (UDL), they empower educators to create opportunities that will benefit every learner.

Math in Focus

Math in Focus

Math in Focus Grade 1

Math in Focus presents the Singapore approach to math in a way that is easy to use and understand. Available for Kindergarten through 5th grade, Math in Focus: The Singapore Approach is the United States edition of Singapore's most widely used program. Carefully paced instruction that focuses on teaching fewer math topics per year to a level of mastery

Consistent use of visual models and manipulatives that carefully bridge the concrete and the abstract encouraging algebraic thinking, facilitating communication of math ideas, and solidifying learning Instruction centered around problem solving using multiple models to help students visualize and understand the math concepts Ample practice for continuous ongoing assessment"

MATH IN FOCUS SINGAPORE MATH

Class-tested and coherent, this textbook teaches classical and web information retrieval, including web search and the related areas of text classification and text clustering from basic concepts. It gives an up-to-date treatment of all aspects of the design and implementation of systems for gathering, indexing, and searching documents; methods for evaluating systems; and an introduction to the use of machine learning methods on text collections. All the important ideas are explained using examples and figures, making it perfect for introductory courses in information retrieval for advanced undergraduates and graduate students in computer science. Based on feedback from extensive classroom experience, the book has been carefully structured in order to make teaching more natural and effective. Slides and additional exercises (with solutions for lecturers) are also available through the book's supporting website to help course instructors prepare their lectures.
