The Great Shift (Large Print 16pt)

Midwestern Strange chronicles B.J. Hollars's exploration of the mythic, lesser-known oddities of flyover country. The mysteries, ranging from bipedal wolf sightings to run-ins with pancake-flipping space aliens to a lumberjack-inspired "Hodag hoax," make this book a little bit X-Files, a little bit Ghostbusters, and a whole lot of Sherlock Holmes. Hollars's quest is not to confirm or debunk these mysteries but rather to seek out these unexplained phenomena to understand how they complicate our worldview and to discover what truths might be gleaned by reexamining the facts in our "post-truth" era. Part memoir and part journalism, Midwestern Strange offers a fascinating, funny, and quirky account of flyover folklore that also contends with the ways such oddities retain cultural footholds. Hollars shows how grappling with such subjects might fortify us against the glut of misinformation now inundating our lives. By confronting monsters, Martians, and a cabinet of curiosities, we challenge ourselves to look beyond our presumptions and acknowledge that just because something is weird, doesn't mean it is wrong.

The Weird 100

An intriguing collection of unexplained events and mysterious happenings occurring throughout the modern world.

Real-Life Mysteries

The disappearance of several apparently unrelated young women all over the country is the beginning of Mary Higgins Clark's chilling new novel, as one person begins to suspect that the young women may have all been murdered or abducted by the same man--and he may be somebody she knows.

Greatest Mysteries of the Unexplained

Angels And Devils

Continuously popular since it first appeared in 1977, *The Incorruptibles* remains the acknowledged classic on the bodies of Saints that did not undergo decomposition after death, many remaining fresh and flexible for years, or even centuries. After explaining both natural and artificial mummification, the author shows that the incorruption of the Saints bodies fits into neither category but constitutes a much greater phenomenon which is unexplained by modern science even to this day. The author presents 102 canonized Saints, Beati and Venerables, summarizing their lives, the discovery of their incorruption and investigations by Church and medical authorities. The incorruptible bodies of saints are a consoling sign of Christ's victory over death, a confirmation of the dogma of the Resurrection of the Body, a sign that the Saints are still with us in the Mystical Body of Christ, as well as a proof of the truth of the Catholic Faith for only in the Catholic Church do we find this phenomenon.

Myths and Mysteries of Missouri

For connoisseurs of imaginative fiction, the novels of Jonathan Carroll are a special treat that occupy a space all their own. His surreal fictions, which deftly mix the everyday with the extraordinary, have won him a devoted following. Now, in *Glass Soup*, Carroll continues to astound The realm of the dead is built from the dreams--and nightmares--of the living. Octopuses drive buses. God is a polar bear. And a crowded highway literally leads to hell. Once before, Vincent Ettrich and his lover, Isabelle Neukor, crossed over from life to death and back again. Now Isabelle bears a very special child, who may someday restore the ever-changing mosaic that is reality. Unless the agents of Chaos can lure her back to the land of the dead--and trap her there forever. *Glass Soup* is another exquisite and singular creation from the author January magazine described as "incapable of writing a bad book much less an uninteresting one." At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

The Grand Design

Surveys the vast diversity of pop culture products that flooded the consumer markets during the decade from 1954 to 1964 and occasioned the formation of a mass suburbia. Reprint.

Alcoa Presents: *One Step Beyond* made its television debut in 1959, nine months before Rod Serling's classic *The Twilight Zone*, and paved the way for a generation of television programs devoted to paranormal topics such as the occult, ESP, and ghost stories. *One Step Beyond* was also where some of Hollywood's most famous leading men, including Warren Beatty, William Shatner, and Charles Bronson, got their starts in television. This complete reference work to the 96 half-hour episodes that ran for three seasons on ABC also offers a detailed history, extensive commentary and summaries of the critical reception of *One Step Beyond* as well as coverage of the sequel series produced in 1978 entitled *The Next Step Beyond*.

Complete credits for both series are provided.

Mysteries of the Unexplained

Deposed by an arch-rival who assigns his friends and him to a dangerous diplomatic mission, Brentford Orsini is transported by a faulty transport device to 1895 Paris, where harsh weather and seedy underground associates reveal a potentially history-changing bombing plot.

An Analytical Guide to Television's One Step Beyond, 1959-1961

A shocking murder takes Hugh Corbett into a dark and dangerous investigation In the fourth thrilling novel in Paul Doherty's medieval series, sleuth Hugh Corbett must discover how a man can be murdered in full view of the king and most of the notables of England. Perfect for Michael Jecks and Ellis Peters. In 1298, Edward I of England invaded Scotland and brutally sacked the town of Berwick, raising to the ground the Red House of the Flemings who had permission to trade there. He little knew his action would have far-reaching repercussions. A year later, Edward convokes a great assembly of the realm in St Paul's Cathedral. They are to hear Mass after which the main celebrant, Walter de Montfort, has been delegated to lecture the King on not taxing the Church. During the Mass, de Montfort dies a sudden and violent death. Hugh Corbett, the King's clerk, is given the task of solving the mystery and tracking down the murderer. Against the background of Edward's struggle to maintain himself, both at home and abroad, Corbett's investigations become tortuous and laced with danger What readers are saying about The Angel of Death: 'This is the best murder mystery I've read' 'A plot to keep you on the edge of your seat' 'Well written, entertaining and keeps you guessing until the end'

The Mysteries of Modern Physics

Have you ever wondered about the force behind a Ouiji board? What about the authenticity of telekinesis or remote viewing? Do you find levitation mystifying? Throughout history inexplicable phenomena like these have fascinated the world. Here, Stephen J. Spignesi, author of 100 Greatest Disasters of All Time, compiles a list of the most well-known paranormal phenomena. Each chapter is introduced with the definition of the phenomenon, a summary of the main arguments supporting and refuting the paranormal validity of the phenomenon, an assessment and the evidence.

Mysteries of the Unexplained

INSTANT NEW YORK TIMES BESTSELLER A Science News favorite science book of 2019 As you read these words, copies of you are being created. Sean Carroll, theoretical physicist and one of this world's most celebrated writers on science, rewrites the history of 20th century physics. Already hailed as a masterpiece, Something Deeply Hidden shows for the first time that facing up to the essential puzzle of quantum mechanics utterly transforms how we think about space and

time. His reconciling of quantum mechanics with Einstein's theory of relativity changes, well, everything. Most physicists haven't even recognized the uncomfortable truth: physics has been in crisis since 1927. Quantum mechanics has always had obvious gaps—which have come to be simply ignored. Science popularizers keep telling us how weird it is, how impossible it is to understand. Academics discourage students from working on the "dead end" of quantum foundations. Putting his professional reputation on the line with this audacious yet entirely reasonable book, Carroll says that the crisis can now come to an end. We just have to accept that there is more than one of us in the universe. There are many, many Sean Carrolls. Many of every one of us. Copies of you are generated thousands of times per second. The Many Worlds Theory of quantum behavior says that every time there is a quantum event, a world splits off with everything in it the same, except in that other world the quantum event didn't happen. Step-by-step in Carroll's uniquely lucid way, he tackles the major objections to this otherworldly revelation until his case is inescapably established. Rarely does a book so fully reorganize how we think about our place in the universe. We are on the threshold of a new understanding—of where we are in the cosmos, and what we are made of.

Glass Soup

Like James Ellroy's, *My Dark Places*, *DOWN CITY* is a gripping narrative built of memory and reportage, and Leah Carroll's portrait of Rhode Island is sure to take a place next Mary Karr's portrayal of her childhood in East Texas and David Simon's gritty Baltimore. Leah Carroll's mother, a gifted amateur photographer, was murdered by two drug dealers with Mafia connections when Leah was four years old. Her father, a charming alcoholic who hurtled between depression and mania, was dead by the time she was eighteen. Why did her mother have to die? Why did the man who killed her receive such a light sentence? What darkness did Leah inherit from her parents? Leah was left to put together her own future and, now in her memoir, she explores the mystery of her parents' lives, through interviews, photos, and police records. *DOWN CITY* is a raw, wrenching memoir of a broken family and an indelible portrait of Rhode Island— a tiny state where the ghosts of mafia kingpins live alongside the feisty, stubborn people working hard just to get by. Heartbreaking, and mesmerizing, it's the story of a resilient young woman's determination to discover the truth about a mother she never knew and the deeply troubled father who raised her—a man who was, Leah writes, "both my greatest champion and biggest obstacle."

100 Things They Don't Want You To Know

Robert Douglas-Fairhurst illuminates two entangled lives: the Oxford mathematician Charles Dodgson (Lewis Carroll) and Alice Liddell, the child for whom he invented the Alice stories. This relationship influenced Carroll's imaginative creation of *Wonderland*—a sheltered world apart during the stormy transition from the Victorian to the modern era.

Murder in Mind

#1 NEW YORK TIMES BESTSELLER When and how did the universe begin? Why are

we here? What is the nature of reality? Is the apparent “grand design” of our universe evidence of a benevolent creator who set things in motion—or does science offer another explanation? In this startling and lavishly illustrated book, Stephen Hawking and Leonard Mlodinow present the most recent scientific thinking about these and other abiding mysteries of the universe, in nontechnical language marked by brilliance and simplicity. According to quantum theory, the cosmos does not have just a single existence or history. The authors explain that we ourselves are the product of quantum fluctuations in the early universe, and show how quantum theory predicts the “multiverse”—the idea that ours is just one of many universes that appeared spontaneously out of nothing, each with different laws of nature. They conclude with a riveting assessment of M-theory, an explanation of the laws governing our universe that is currently the only viable candidate for a “theory of everything”: the unified theory that Einstein was looking for, which, if confirmed, would represent the ultimate triumph of human reason.

The Long Range Desert Group in the Aegean

Myths and Mysteries of Missouri dispels any notion that the Show Me State is a boring place harboring little unknown. Thirteen diverse chapters, each a story unto itself, probe dark secrets, unexplained phenomena, legendary individuals and actual events which leave people incredulous to this day. Much in this well-researched book has been largely forgotten, but the author's lively and amusing style will awaken curiosity in lifelong residents and armchair visitors alike

The Ghost of Fossil Glen

Cham and Whiteson "explore the biggest unknowns in the universe, why these things are still mysteries, and what a lot of smart people are doing to figure out the answers (or at least ask the right questions). While they're at it, they demystify many complicated things we do know about, from quarks and neutrinos to gravitational waves and exploding black holes"--Amazon.com.

13 Things That Don't Make Sense

Many strange events defy explanation. This book is a compendium of some of the world's most mystifying conundrums, which are guaranteed to bewilder and intrigue. From the mysterious disappearance of Lord Lucan, by way of paranormal powers, to bizarre phenomena thrown up by nature, this fantastic collection of off-the-wall investigations also features scary curses, uncanny prophecies, weird medical marvels, alien abductions, lost worlds, and much more.

The Incorruptibles

Science starts to get interesting when things don't make sense. Even today there are experimental results that the most brilliant scientists can neither explain nor dismiss. In the past, similar anomalies have revolutionised our world: in the sixteenth century, a set of celestial irregularities led Copernicus to realise that the Earth goes around the sun and not the reverse. In *13 Things That Don't Make Sense* Michael Brooks meets thirteen modern-day anomalies that may become tomorrow's breakthroughs. Is ninety six percent of the universe missing? If no study has ever been able to definitively show that the placebo effect works, why has it become a pillar of medical science? Was the 1977 signal from outer space a transmission from an alien civilization? Spanning fields from chemistry to cosmology, psychology to physics, Michael Brooks thrillingly captures the excitement and controversy of the scientific unknown.

Great Mysteries of the 20th Century

Could the strange actually be true? *Time-Life Mysteries of the Unknown* takes readers on a tour of the eerie and unexplained - from the search for vanished civilizations to the science of real-life zombies, from famous UFO sightings to encounters with ghosts and otherworldly creatures, and much more. This rich full-colour guide offers scores of photographs and documents that shed new light on the world's most puzzling supernatural events and paranormal phenomena.

Mysteries of the Unknown also ventures into strange geographical locations where the laws of nature appear to be suspended and examines the paradoxes of ancient scientific instruments that seem far too advanced for their time. And meet the scientists and dedicated amateur researchers who are unlocking the secrets to the great mysteries of history - and the future.

The Golden Key

Quaker midwife Rose Carroll seeks the true cause of a young mother's death in turn-of-the-century Massachusetts. The winter of 1889 is harsh in Amesbury, Massachusetts, but it doesn't stop Quaker midwife Rose Carroll from making the rounds to her pregnant and postpartum mothers. When Charity Skells dies from an apparent early miscarriage, Rose wonders about the symptoms that don't match the stated cause of death. She learns that Charity's husband may be up to no good with a young woman whose mother appears to offer prohibited medical procedures. A disgraced physician in town does the same, while Charity's cousin seems to have a nefarious agenda of his own. With several suspects emerging, each with their own possible motives, Rose and police detective Kevin Donovan race against time to solve the case before another innocent life is lost. Praise for the Quaker Midwife Mysteries: Turning the Tide is a 2018 Agatha Award Nominee for Best Historical Novel "Engaging."—Publishers Weekly "First of hopefully many more to come, I believe that everyone will definitely enjoy this stand-out book."—Suspense Magazine "Rose Carroll is a richly crafted and appealing sleuth. refreshingly different kind of heroine, a Quaker midwife who also solves crimes with wit, intelligence, and gentle grace. It's a page turner. It's a fascinating look at nineteenth-century American faith, culture, and small-town life. And best of all, it's the second of what is sure to be a long and beloved series."—William Martin, New York Times bestselling author of Cape Cod and The Lincoln Letter "An intriguing look at life in 19th-century New England, a heroine whose goodness guides all her decisions, and a mystery that surprises."—Kirkus Reviews

Unexplained

Shortly after the invasion of Sicily and to distract German attention from the Italian campaign, Churchill ordered the occupation of the Dodecanese Islands in the Aegean. The Long Range Desert Group, retraining in Lebanon, were now part of Raiding Forces, Middle East, along with the Special Boat Service and No 30 Commando. In support of 3,000 regulars in 234 Brigade, the LRDG landed covertly on Leros establishing observation posts, reporting movement of enemy shipping and aircraft. In October the LRDG were ordered to assault the island of Levitha losing forty highly skilled men killed or captured. The Germans invaded Leros with overwhelming force on 12 November 1943, five days later the battle was over. While many British troops were captured most of the LRDG and SBS escaped. Their individual stories make for enthralling reading. A measure of the intensity of the fighting is the fact that the LRDG lost more men in three months in the Aegean than in three years in the desert operating behind enemy lines. The author, an acknowledged expert on the LRDG uses official sources, both British and German, and individual accounts to piece together the full story of this dramatic, costly but little-known campaign. It is a valuable addition to the history of special forces in the Second World War.

Midwestern Strange

"I envy anyone who has yet to enjoy the sexy, eerie, and addictive novels of Jonathan Carroll. They are delicious treats—with devilish tricks inside them."—Michael Dirda, *The Washington Post* Neil Gaiman has written: "Jonathan Carroll has the magic. He'll lend you his eyes, and you'll never see the world in quite the same way ever again." Welcome to the luminous and marvelously inventive world of *The Ghost in Love*. A man falls in the snow, hits his head on a curb, and dies. But something strange occurs: the man doesn't die, and the ghost that's been sent to take his soul to the afterlife is flabbergasted. Going immediately to its boss, the ghost asks, what should I do now? The boss says, we don't know how this happened but we're working on it. We want you to stay with this man to help us figure out what's going on. The ghost agrees unhappily; it is a ghost, not a nursemaid. But a funny thing happens—the ghost falls madly in love with the man's girlfriend, and things naturally get complicated. Soon afterward, the man discovers he did not die when he was "supposed" to because for the first time in their history, human beings have decided to take their fates back from the gods. It's a wonderful change, but one that comes at a price. *The Ghost in Love* is about what happens to us when we discover that we have become the masters of our own fate. No excuses, no outside forces or gods to blame—the responsibility is all our own. It's also about love, ghosts that happen to be gourmet cooks, talking dogs, and picnicking in the rain with yourself at twenty different ages. Stephen King has said that "Jonathan Carroll is as scary as Hitchcock, when he isn't being as funny as Jim Carrey." Jonathan Lethem sees Carroll as the "master of sunlit surrealism." However one regards this beguiling original, two facts are indisputable: It's tough being a ghost on an empty stomach. And *The Ghost in Love* is a triumphant return.

Scientific Paranormal Investigation

The Ghost of Fossil Glen gripping ghost story and murder mystery by a popular and highly regarded author. Allie Nichols knows she's being pursued by a ghost. But her friend Karen calls her a liar and doesn't want to hear "stuff like that." It is Allie's old pal Dub who listens eagerly as Allie tells him about a voice that guides her safely down a steep cliff side, the face in her mind's eye of a girl who begs "Help me," and a terrible nightmare in which that girl falls to her death. Who is the girl? Is she the ghost? And what does the ghost want from Allie? We Have No Idea

Even with today's high-tech science, many events and ancient mysteries remain unexplained and surrounded by theories that stir the imagination and challenge scientific fact. This book systematically explores all aspects of the human fascination with the unknowable, from hauntings and the power of the mind, to physical mysteries such as lost civilizations, ancient superstitions and symbols, and

the persistent ideas about life from other planets. Evocative illustrations and intriguing photographs, combined with riveting text by an award-winning author, shed light on the world's greatest mysteries.

Charity's Burden

The Great Shift is a progress report from the field and the messages are positive. "You don't have to logically do anything but 'show up' with spiritual intent, and the DNA quantum field is activated in your body," Kryon says. He tells us to expect changes and peace we may have never thought to see in our lifetimes, even in the Middle East. He says, "God is not a controlling force. Look for the love." Tom Kenyon channeling the Hathors, a group consciousness entity, reminds us, "It is your attention to an event that makes it conscious." Kenyon also explains what channeled material is, which is important in understanding how we co-create our own world: "From the standpoint of neuropsychology, channeled information is just another expression of our brain/mind potential . . . a movement into the unknown territory of one's own psyche to see what emerges in terms of contact (with other intelligences) and information." The Hathors message for what is now and what is to come: "It is so simple, it is forgotten. . . . Find a way to live your life in joy and happiness." Mary Magdalen, through Tom Kenyon, makes it clear that restoring the balance between male and female energies will mean good things for men as well as women and will reignite our creative potency. Patricia Cori channeling the High Council of Sirius reminds us that the future is never predetermined and the past is an illusion - different for each of us. Lee Carroll has been channeling Kryon for many years and is the author of Kryon books, most recently *Lifting the Veil: The New Energy Apocalypse*. As Lee Carroll he is the co-author of *The Indigo Children*. He and his partner, Jan Tober, began Kryon light groups in 1991 and now host groups around the world. Carroll lives in San Diego, California
