How Cancer Works

Symbols and Legitimacy in Soviet Politics analyses the way in which Soviet symbolism and ritual changed from the regime's birth in 1917 to its fall in 1991. Graeme Gill focuses on the symbolism in party policy and leaders' speeches, artwork and political posters, and urban redevelopment, and on ritual in the political system. He shows how this symbolism and ritual were worked into a dominant metanarrative which underpinned Soviet political development. Gill also shows how, in each of these spheres, the images changed both over the life of the regime and during particular stages: the Leninist era metanarrative differed from that of the Stalin period, which differed from that of the Khrushchev and Brezhnev periods, which was, in turn, changed significantly under Gorbachev. In charting this development, the book lays bare the dynamics of the Soviet regime and a major reason for its fall.

A new collection that captures the austere serenity of the Southwest American desert. Award-winning, Paris-based poet Alice Notley's adventurous new book is inspired by the life of Marie, a woman who resided in the dump outside Notley's hometown in the Southwestern desert of America. In this poetical fantasy, Marie becomes the ultimate artist/poet, composing a codex-calligraphy, writings, paintings, collage-from materials left at the dump. She is a "culture of one." The story is told in long-lined, clear-edged poems deliberately stacked so the reader can keep plunging headlong into the events of the book. Culture of One offers further proof of how Notley "has freed herself from any single notion of what poetry should be so that she can go ahead and write what poetry can be" (The Boston Review).

Jack's back, and it's still a dog's life for him, in the hilarious sequel to Doghead Jack woke up lying on his front, with his chin resting on his hands. That wasn't a good sign. He raced to the mirror, and a fine canine head glared back at him. Every spare bit of flesh was covered in a blue-black velvety fur. Doghead was back. Now that schoolboy Jack has embraced his doggy alter ego—Anubis, jackal-headed god of the dead—he must travel to the Afterlife and join his dead grandparents in a fight against evil that could affect the whole of history. No pressure, Jack!

Mini celebrates 60 amazing years of this iconic car, from its revolutionary introduction to the popularity of its new-generation models. The first two-door Mini, introduced in 1959 and built until 2000, revolutionized automotive design with its innovative front-wheel-drive layout that made the car appear bigger on the inside than the outside. In 1999, the Mini was voted the second most influential car of the 20th century, behind the Ford Model T. Designed for British Motor Corporation (BMC) by Sir Alec Issigonis and manufactured in England, Australia, Spain, Belgium, Chile, Italy, Portugal, South Africa, Uruguay, Venezuela, and Yugoslavia, the Mini was as successful in competition as it was on the street, winning the Monte Carlo Rally four times from 1964 through 1967. Originally built by BMC, the Mini's later parent company, Rover, was acquired by BMW in 1994. In 2000, BMW sold most of the Rover Group but retained the Mini brand. The last and 5,387,862nd original Mini rolled off the production line in October, 2000. In July 2001, BMW launched production of the new-generation of Mini which was soon joined by Countryman, Clubman, convertible, Cooper Works, and numerous special editions. Nearly 20 years later, the new Minis remain as popular as the original from 1959.

Over the last four years Martin Parr has been working on a commission for Multistory photographing the Black Country. It was an area he knew little of, other than its reputation as a densely populated, post-industrial area; one in decline. Many of the industries that once made the Black Country great have declined, but numerous small factories and manufacturing businesses remain in good health. A degree of regeneration has also come as a result of the many immigrant communities that have made the Black Country their home.

The Lives Around Us is a series of short meditations for individuals or groups. It can serve as a Lent book or at any time of the year. Its purpose is to tap into the present public interest in nature connection and encourage this to be formed in concert with Bible reading and regular (daily or weekly) prayer. Each chapter begins with descriptive reflection on a specific creature (animal, plant, fungus, mineral) followed by one or two thoughts about what we can

This book is the essential cancer primer! Following the model of his successful previous books, *How the Immune System Works* and *How Pathogenic Viruses Work*, Lauren Sompayrac here explains the basics of cancer: what it is, what it does, and what is being done to try to cure it. In nine clear and concise "Lectures," Dr. Sompayrac conveys the essentials of what we know about human malignancies, using his trademark style of every day example, metaphor, anecdote and humor. Focusing on ten of the most common cancers, the book shows -- step by step -- what conditions and events are necessary for tumors to form and grow and what has been learned about stopping that process. This brief book, which can be read in a few sittings, will provide you with a broad basic understanding of our most feared disease. The ideal text for science, medical, and nursing students, practicing physicians and nurses, and all others who need a readable overview of this complex topic.

How Pathogenic Viruses Work

The story of the Soviet Union's cars has to be seen in the context of a planned society in which everything was planned well in advance, and consumer items were not a priority until well after the Second World War. This extraordinarily detailed study charts the history of Soviet cars from the birth of the Soviet Union in 1917 until its demise in 1990, with a conclusion about the post-Soviet era. It is the story of an insular, state-run car industry in which the carefully thought-out ideas of ministerial planners, rather than fickle customers in a free market, determined what cars were made in a country where the open road was often a 300-mile track across a windswept steppe.
