An innovative and powerful exploration of cultural loss, exile, and suffering, Dictee explores dislocation and linguistic fragmentation while telling the story of nine women . It belongs with the work of Audre Lord and Gloria Anzaldua and other contemporary classics that address the subject of ethnic identity, hybridity, and the complexity of "mestizo" culture.

Tell It To Women gives traditional rural women a voice: the women from Idu break from their assumed position of silence and powerlessness to confront the urban women who believe their western education gives them the authority to speak for all women.

The author offers his personal take on America's poverty-stricken urban neighborhoods, recalling the lessons he has learned from time spent among the nation's poorest people.

East and West (Part - I)

Oddr Snorrason, a Benedictine monk in northern Iceland in the late twelfth century, composed a landmark Latin biography of the legendary Norwegian king Olaf Tryggvason (died 1000 C.E.). This biography was soon translated into Icelandic, and the translation (though not the Latin original) is preserved in two somewhat differing versions and a small fragment of a third. The Saga of Olaf Tryggvason is the first English translation of this text, augmented by an introduction and notes to guide the reader. There is a strong possibility that Oddr's biography was the first full-length saga of the Icelandic Middle Ages. It ushered in a century of saga writing

that assured Iceland a unique place in medieval literature and in the history of prose writing. Aside from being a harbinger of the saga tradition, and indeed of the modern novel, *The Saga of Olaf Tryggvason* has its own literary merits, including an epic description of the great Battle of Svoldr, in which King Olaf succumbed. In significant ways the narrative of this battle anticipates the mature style of the classical sagas in the thirteenth century.

Physics

The proposed work supports MURED goals by fostering research and development activities at Fisk and UTEP which contribute substantially to NASA's mission, preparing faculty and students at Fisk and UTEP to successfully participate in the conventional, competitive research and education process, and increasing the number of students to successfully complete degrees in NASA related fields. The project also addresses directly a core need of NASA for space power and is consistent with the Core Responsibilities of the John Glenn Space Center. Current orbital missions are limited by radiation from high energy particles trapped in the Van Allen Belt because that solar radiation degrades cell performance by damaging the crystalline lattice. Some potential orbits have been inaccessible because the radiation is too severe. Thin-film solar cells, if they can be adapted for use in the unfriendly space environment, could open new orbits to satellites by providing a radiation hard source of power. The manned mission to Mars requires

photovoltaic devices for both the trip there and as a power supply on the surface. Solar arrays using thin films offer a low power/weight ratio solution that provides reliable photovoltaic power. History of the Caribbean

Based on a detailed study of 35 cases in Africa, Asia, Latin America, and post-communist Eurasia, this book explores the fate of competitive authoritarian regimes between 1990 and 2008. It finds that where social, economic, and technocratic ties to the West were extensive, as in Eastern Europe and the Americas, the external cost of abuse led incumbents to cede power rather than crack down, which led to democratization. Where ties to the West were limited, external democratizing pressure was weaker and countries rarely democratized. In these cases, regime outcomes hinged on the character of state and ruling party organizations. Where incumbents possessed developed and cohesive coercive party structures, they could thwart opposition challenges, and competitive authoritarian regimes survived; where incumbents lacked such organizational tools, regimes were unstable but rarely democratized.
