Communicating a message effectively needs precision—be it verbal or non-verbal. At the professional front, the accuracy of the message to be shared becomes all the more important as the business decisions may depend on the same. This book, in its second edition, continues to detail on the pre-requisites of communicating effectively in the corporate environment and generally. Beginning with an overview of business communication, the book educates on the principles of communication—oral and written. Divided into nine chapters, the first two chapters deal with oral communication and the next seven deal with different forms of written communication. The book teaches how to write effective letters and prepare persuasive resumé. The chapters are well-supported with many examples and illustrative exhibits wherever required. A new chapter (Chapter 9) has been added titled 'Writing to Communicate' which presents incorrect use of language and phrases that rob the text, be it a report or a letter, of authenticity and credibility. The chapter also presents correct use of the examples and the rationale or logic in the form of explanations. Designed as a textbook for the management

summarizing the extensive primary literature into an easily accessible format. Gene Control is a comprehensively restructured and expanded edition of Latchman's Gene Regulation: A Eukaryotic Perspective, Fifth Edition. The first part of the book deals with the fundamental processes of gene control at the levels of chromatin structure, transcription, and post-transcriptional processes. Three pairs of chapters deal with each of these aspects, first describing the basic process itself, followed by the manner in which it is involved in controlling gene expression. The second part of the book deals with the role of gene control in specific biological processes. Certain chapters deal with the importance of gene control in cellular signaling processes and for normal development of the embryo. Another chapter discusses the key roles played by gene-regulatory processes in the specification of differentiated cell types such as muscle cells and neurons. The final chapters discuss the consequences of errors in gene control; the relationship between gene misregulation and human diseases, especially cancer; and potential therapies designed specifically to target particular levels of gene control. Gene Control will be of value to students in biological sciences, as well as to scientists and clinicians interested in how genes are regulated in health and disease.

CHILI HOT GMAT MATH REVIEW will help readers develop the skills and mindset needed to score high on the quantitative section of the GMAT exam. Each hand-selected problem comes with a Classification, Snapshot, and Chili Rating. Classification serves to identify each problem according to category or sub-category. Snapshot highlights why that particular problem was chosen, including the underlying problem-solving principle or strategic approach. Chili Rating helps candidates gauge the estimated difficulty level of a given problem. A single chili indicates that the estimated difficulty level of a given problem is "mild" (500 to 590 difficulty level), two chilies spell "hot" (600 to 690 difficulty level), and three chilies signal "very hot" (700 or above difficulty level). By studying problems of varying difficulty, candidates will learn to maintain discipline on easy but tricky math problems and also to exercise flexibility when deciding on multiple approaches and time-saving shortcuts for use in tackling harder, more involved problems. Note to readers: This book contains the excerpted math sections from the parent title "Chili Hot GMAT: 200 All-Star Problems to Get You a High Score on Your GMAT Exam."

## **Seven Levels of Glory**

The Lord has opened a season of increased manifestations of His Glory. In this season, He is doing amazing things and giving fresh new revelations of who He is and what He has planned for us. The Lord has issued a clear call for His disciples to move from glory to glory into the very image of our Lord Jesus! Are you ready for it? "But we all, with unveiled face, beholding as in a mirror the glory of the Lord, are being transformed into the same image from glory to glory, just as by the Spirit of the Lord." (2 Corinthians 3:18) James Durham: After serving as a pastor for more than 45 years, including 13 years as a pastor and church planter and almost 30 years as an active duty army Chaplain, James retired from the military at the rank of Colonel. In 2010, James and his wife, Gloria, retired from the pastoral ministry and moved to Columbia, South Carolina in order to write, teach seminars around the world, and mentor many spiritual sons and daughters. Mind-opening writing on what kids need from school, from one of education's most outspoken voices. Almost no writer on schools asks us to question our fundamental assumptions about education and motivation as boldly as Alfie Kohn. The Washington Post says that "teachers and parents who encounter Kohn and his thoughts come away transfixed, ready to change their schools." And Time magazine has called him "perhaps the country's most outspoken critic of education's fixation on grades [and] test scores." Here is challenging and entertaining writing on where we should go in American education, in Alfie Kohn's unmistakable voice. He argues in the title essay with those who think that high standards mean joylessness in the classroom. He reflects thoughtfully on the question "Why Self-Discipline Is Overrated." And in an essay for the New York Times, which generated enormous response, he warns against the dangers of both punishing and praising children for what they do instead of parenting "unconditionally." Whether he's talking about school policy or the psychology of motivation, Kohn gives us wonderfully provocative—and utterly serious—food for thought. This new book will be greeted with enthusiasm by his many readers, and by teachers and parents seeking a
