Logic is the backbone of Western civilization, holding together its systems of philosophy, science and law. Yet despite logic's widely acknowledged importance, it remains an unbroken seal for many, due to its heavy use of jargon and mathematical symbolism. This book follows the historical development of logic, explains the symbols and methods involved and explores the philosophical issues surrounding the topic in an easy-to-follow and friendly manner. It will take you through the influence of logic on scientific method and the various sciences from physics to psychology, and will show you why computers and digital technology are just another case of logic in action.

French Is Fun

The biography of H.G. Adler (1910-88) is the story of a survivor of Theresienstadt, Auschwitz, and two other concentration camps who not only lived through the greatest cataclysm of the 20th century, but someone who also devoted his literary and scholarly career to telling the story of those who perished in over two dozen books of fiction, poetry, history, sociology, and religion. And yet for much of his life he remained almost entirely unknown. A writer's writer, a scholar of seminal, pioneering works on the Holocaust, a renowned radio essayist in postwar Germany, a last representative of the Prague Circle of literature headed by Kafka, a key contributor to the prosecution in the trial of Adolf Eichmann, Adler was a man of his time whose times lived through him. His is the story of many others, but also one that is singularly his own. And at its heart lies a profound story of love and perseverance amid the loss of his first wife, Gertrud Klepetar, who accompanied her mother to the gas chamber in Auschwitz, and the courtship and extended correspondence with Bettina Gross, a Prague artist who escaped to the Britain, only to later learn that her mother had also been in Theresienstadt with Adler before her eventual death in Auschwitz. His delivery of a lecture in Theresienstadt commemorating Kafka's sixtieth birthday, and with Kafka's favorite sister present; the nurturing of a younger generation of artists and intellectuals, including the Israeli artist

Jehuda Bacon and the Serbian novelist Ivan Ivanji; the preservation of Viktor Ullmann's compositions and his opera The Emperor of Atlantis, only to see them premiered decades later to world acclaim; and the penury of postwar life while churning out the novels, poetry, and scholarship that would make his reputation - all of these are part of a life survived in the moment, but dedicated to the future, and that of a man committed to helping human dignity survive in his time and that to come.

Guardians of Power ought to be required reading in every media college. It is the most important book about journalism I can remember." John Pilger "Regular critical analysis of the media, filling crucial gaps and correcting the distortions of ideological prisms, has never been more important. Media Lens has performed a major public service by carrying out this task with energy, insight, and care." Noam Chomsky "Media Lens is doing an outstanding job of pressing the mainstream media to at least follow their own stated principles and meet their public service obligations. [This is] fun as well as enlightening." Edward S. Herman Can a corporate media system be expected to tell the truth about a world dominated by corporations?
