The ideas range in complexity from the simple to the advanced, but each one is totally unique and has never before been published. The look of the book will reflect the immaculate, Japanese-inflected minimalism of the MiniEco website, with some high-

Whimsical, beautiful embroidery motifs created by an avid gardener--stitch roses, bees, or whole garden scenes. Kazuko Aoki has a unique talent for translating the beauty of the garden with needle and thread. By offering forty motifs, Aoki invites us to explore her gardens through embroidery. The forty motifs explore the roses and wildflowers that appear season to season, as well as the bees and butterflies that enjoy their nectar. The designs here are exquisite, detailed, and artfully rendered. Beyond the motifs themselves, Aoki also presents projects that feature the embroidery: brooches, notebook covers, pin cushions, and pouches. For those new to embroidery, detailed how-to illustrations are included.

Caticorn Crafts

Sliceform modelling is a technique which lies happily on the borders between art and mathematics. The models are made from intersecting sets of parallel planes which slot together in a clever way to generate interesting three-dimensional surfaces. In the fully open position the planes are at right angles and the surfaces are correctly defined, but all the models fold flat in two different ways, making them easy to store until they are wanted next time. When popped up, the play of light and shade on the planes creates objects

of great beauty. The book includes a varied collection of eight models to cut out and make and a detailed explanation of how to generate the slices for models of your own. See also Surfaces - Explorations with Sliceforms for more detailed explanations and more templates.
