Punisher by Rick Remender Omnibus

Six stories from the papers of one of America's finest crime authors Roger doesn't mean for the preacher and his wife to die. Released less than a year earlier from San Quentin, he's trying to make a living the only way he knows how: theft. His latest heist goes perfectly until his car breaks down. Sirens are closing in when an old black preacher stops to give him a lift. The police at the roadblock kill the elderly couple, but in the eyes of the law it's Roger's fault. And he will die in the gas chamber at San Quentin—unless he can break out first. Roger's incredible story anchors this collection of short fiction by Edward Bunker, who knew better than anyone what it means to be a criminal, inside and outside of prison. In these stories, which were unpublished at the time of his death in 2005, he shows again the talent that made him such a remarkable writer.

Once I was a sane, levelheaded professional woman. Then I said "yes." Now I am the lunatic bride I always made fun of! What is it about getting married that turns normal people into total freaks? A savvy, riotously funny novel, Diary of a Mad Bride is for anyone who has ever been a bride, is about to become a bride, yearned to be a bride, or suffered the sheer

indignity of appearing in public in the world's ugliest bridesmaid dress. My wedding was starting in less than twenty minutes, and I was stuck in a 7-Eleven parking lot with popcorn kernels wedged in my gums and vanilla ice cream melting on my dress. It was a disaster too large to comprehend. After an agonizing year spent planning my wedding, could it really end like this? The voices chronicling a year of wedding hysteria swirled in my head. — My grandmother upon viewing my engagement ring: "What do you mean he gave you an emerald! Diamonds are eternal, emeralds say, maybe five years." — My future father-in-law on the night of my engagement party: "To a happy marriage and, if necessary, a painless divorce!" — My best friend, Anita: "Oh, screw congratulations. Of course I'm happy for you. Stephen's a major piece of ass and he's got a sense of humor. Just as long as you're certain this is what you want." Would I survive this day after all.?

Hannah's list: Ghosts are cold to the touch. Being tied up isn't much fun. And danger is a sure-fire prescription for amazing sex! When Hannah Campbell attends a memorial service for the neurosurgeon who once saved her life, the last thing she expects is a lightning strike that knocks her out cold and blasts her lungs full of the departed's ashes. Things only get weirder when she wakes up to find the deceased standing over her hospital bed, insisting she help him track down the terrorists who blew up his plane. Professor Takeshi Shimodo doesn't know what to believe when smart-mouthed Hannah appears on his doorstep, claiming to be haunted by the ghost of his best friend. Yet she exhibits some extraordinary psychic abilities. And her determination to find justice for the crash victims, in spite of her fragile health, touches his heart. Takeshi's acupressure techniques are meant to calm Hannah's erratic heartbeat, but the longer they are together, the more his magic fingers have the opposite effect. Soon, their passion flares hotter than any lightning strike. But now the terrorist they seek is hunting them. And the FBI is suspicious Hannah knows just a little too much. Without some "spiritual" help, they haven't a ghost of a chance. Warning, this title contains the following: explicit sex, graphic language and violence.

When Roland Doyle wakes up in an unfamiliar motel room with a strange man's wallet in his pocket and a woman's dead body in the bathroom, he fears the worstand that's before he finds the vial of pills labeled "take one every 4 hrs or else." Or else what? Ten years ago, Dr. Sebastian Briggs's clinical drug trial for a cutting-edge fear-response drug went horribly wrong -- or did it? It's true that one trial participant died and five others were left with no memory of what happened to them. But now several interested parties, including a major pharmaceutical company and an ambitious U.S. senator, are willing to back Briggs's continued research. All he has to do is recall his five surviving "volunteers," whose addiction to a mysterious drug has left them largely at his disposal. They will do anything necessary to keep the pills coming and to stave off the creeping phobias, intense sexual impulses, and all-consuming madness that lurk on the edges of their minds. It's easy enough for the good doctor to lure the survivors back to the remote Monkey House, where the original trials took place. But when the pills finally run outthat's when the real show begins.

Our love affair with the digital interface is out of control. We've embraced it in the boardroom, the bedroom, and the bathroom. Screens have taken over our lives. Most people spend over eight hours a day staring at a screen, and some "technological innovators" are hoping to grab even more of your eyeball time. You have screens in your pocket, in your car, on your appliances, and maybe even on your face. Average smartphone users check their phones 150 times a day, responding to the addictive buzz of Facebook or emails or Twitter. Are you sick? There's an app for that! Need to pray? There's an app for that! Dead? Well, there's an app for that, too! And most apps are intentionally addictive distractions that end up taking our attention away from things like family, friends, sleep, and oncoming traffic. There's a better way. In this book, innovator Golden Krishna challenges our world of nagging, screen-based bondage, and shows how we can build a technologically advanced world without digital interfaces. In his insightful, raw, and often hilarious criticism, Golden reveals fascinating ways to think beyond screens using three principles that lead to more meaningful innovation. Whether you're working in technology, or just wary of a gadget-filled future, you'll be enlighted and entertained while discovering that the best interface is no interface.

Human-Computer Interaction

The theme of the 1997 INTERACT conference, 'Discovering New Worlds ofHCI', signals major changes that are taking place with the expansion of new technologies into fresh areas of work and leisure throughout the world and new pervasive, powerful systems based on multimedia and the internet. HCI has a vital role to play in these new worlds, to ensure that people using the new technologies are empowered rather than subjugated to the technology that they increasingly have to

use. In addition, outcomes from HCI research studies over the past 20 years are now finding their way into many organisations and helping to improve and enhance work practices. These factors have strongly influenced the INTERACT'97 Committee when creating the conference programme, with the result that, besides the more traditional HCI research and education focus found in previous INTERACT conferences, one strand of the 1997 conference has been devoted to industry and another to multimedia. The growth in the IFIP TCI3 committee itself reflects the expansion ofHCI into new worlds. Membership oflFIP TC13 has risen to now include representatives of 24 IFIP member country societies from many parts of the world. In 1997, IFIP TCl3 breaks new ground by holding its sixth INTERACT conference in the Asia-Pacific region. This is a significant departure from previous INTERACT conferences, that were all held in Europe, and is especially important for the Asia-Pacific region, as HCI expands beyond its traditional base.
