Create your dream job by turning your passion into a profitable business. The business world has completely changed. The old routes to building a successful organization have been entirely revolutionized. In a world which is being transformed with a speed that was unthinkable barely a generation ago, the doors have been thrown wide open to serial entrepreneurs, digital innovators and career reinventors. In *Create Uniqueness*, Riccardo Pozzoli, one of Italy's most successful entrepreneurs, and co-founder of the fashion phenomena *The Blonde Salad*, shares his story about creating a thriving business and building rewarding work environments. *Create Uniqueness* is a passionate yet practical guide to identifying a business idea, embracing new ways of working, thinking unusually and building a great company without losing sense of your original idea.

The valuation of Heritage Assets (HA), which are a vital resource for the non-profit public or private organizations operating in the heritage sector is on the one hand sometimes difficult to do, and on the other, can be excessively costly with respect to the correlated disclosure benefits. The growing application of the (full or modified) accrual basis of accounting in the public and non-profit sectors has extended and reanimated this issue. This book applies the comparative method, in order to provide new information on the analyzed subject. Specifically, after having investigated the different theoretical and technical proposals, it compares the reporting behavior of significant cases of Italian and American public and private organizations, coming from different cultural and management approaches. Proposing a link between the managerial and reporting issues of the organizations involved in the management and maintenance of heritage assets, this book is crucial in the task to optimize the performance of organizations in this sector.

It is a casebook on patent law that involves comparative jurisprudence tailored for India. The book is best described by highlighting the following features: (1) Casebook format - The casebook format suits practitioners and judges. It allows the reader to independently interpret and assess the implication of each caselaw, which forms a vital component of the practice of law. The reader is assisted towards this objective by only containing extracts of the relevant portions of the judgment. Even from an academic perspective, it provides an unfiltered view of the law, better than any unnecessary prose. (2) Comparative approach - For each topic of patent law, the book would provide a single point congregation of the relevant Indian provisions and extracts from relevant caselaw across India, the UK, the EU and the USA. This approach is ideal for India, where jurisprudence on the subject is limited. Courts, practitioners, and the Patent Office often resort to such a comparative approach to learn from the experiences of other jurisdictions. (3) Notes - Author's notes before and after each caselaw or topic fulfil four purposes: (i) set the context for the reader; (ii) critique the caselaw or to bring focus on to issues that arise in practice; (iii) contextualize the discussion to the Indian statute; and (iv) examine the historical perspective, including the legislative history. (4) Focus on law - it is a no-nonsense, no-rhetoric book, focussing on the law, its interpretation and application.

Marxism in a Lost Century retells the history of the radical left during the twentieth century through the words and deeds of

Paul Mattick. Three biographical themes receive special attention -- the self-taught nature of left-wing activity, Mattick's publishing endeavors, and the nexus of men, politics, and friendship.

In Italy, the debate about the reform process, that has involved the water sector for several years, cannot be considered concluded. It seems exclusively ideological and often it does not consider the business administration perspective, which certainly could make a contribution to the solution of different problems. Politicians and researchers, for example, show very little interest for the economic and financial performance of water utility firms, focusing almost exclusively on the different ways for providing the services or on the ownership structure. This work analyzes the variables characterizing the outsourcing process in the water sector. It also explores the connection of such variables with the performance of companies and local government authorities involved in the delivery process. Subsequently, the work explains the results of an exploratory analysis of different cases in the international context, making also a comparison about the performance. Lastly, the work verifies the existence of some best practices and evaluates the adaptability of these best practices in the Italian context.
