Procurement

The Codes of California : pt. 1-2. Civil code

All public sector organisations rely to varying degrees on postal services, costing nearly £650 million annually of which £250 million is spent by central government departments. The two biggest spenders are the Department for Work and Pensions

and HM Revenue and Customs which account for over half this amount, with ten organisations accounting for 95 per cent of the total. Despite the growth in the use of internet and email, at least for the foreseeable future conventional mail will remain essential to the way public bodies communicate with the public. This NAO report examines how public sector organisations can become more effective in their procurement and management of postal services, and identifies six main areas where further improvements can be made in order to realise an estimated £31 million a year in savings by 2008-09. Two accompanying documents are available separately: case studies which examine the use of postal services in five organisations (HCP 946-II, ISBN 0102937354); and a guide which sets out examples of good practice across public and private sectors (HCP 946-III, ISBN 0102937362).

Development Business

Services play an increasing economic role in developed countries. As companies have outsourced and continue to outsource (part of) their service provision, sourcing has gained importance as a field of interest, both from a practical and academic perspective. This book gives an updated perspective on the topic of sourcing services as well as insights into the current state-of-the-art in practice by means of the case company examples.

Sampling is the first and arguably most important step in the analytical process. Obtaining representative and reliable samples of any bulk material being analysed is of the utmost importance. This book brings together the broader principles of sampling applicable to a wide variety of situations. Prepared under the Department of Trade and Industry's Valid Analytical Measurement (VAM) Initiative, it covers solid, liquid and gas samples, with examples of some of the equipment used. General Principles of Good Sampling Practice is based on an intensive literature survey covering a wide range of materials, offers guidance on particle size reduction of solids, and looks at requirements for suitable containers and storage prior to analysis. The book gives particular emphasis to the preparation of sampling plans. Checklists ensure that coverage is comprehensive. In addition, various safety aspects are considered, appendices give definitions of sampling terminology, and some theory is addressed. General Principles of Good Sampling Practice has come as a welcome reference guide for researchers and professionals who need to access the important information on how to sample. Before, information has been scattered across the literature. Now, anyone with interests or

responsibilities in sampling has at hand the aid of this thorough and reliable guide.

Draws on the experience of Bulgaria to study the problems encountered in financing government operations in the transition economies. This report describes Bulgaria's experience in addressing external shocks to its economy and large declines in the ratio of tax revenues to GDP. The book provides broad coverage of the problems many other governments face in transforming their systems of taxation in the transition to a market economy. Chapters discuss taxation and incentives, government and households, indirect taxation, and financing of social expenditures. Attention is also drawn to the implementation of a value-added tax and to policies on fuel taxes. The report facilitates an understanding of the

differences between actual and optimal policies as governments seek to establish a framework for resolving their budgetary problems in the transition.

Implementing co-operative production networks to secure and foster future competitiveness on the global market is a major strategic target for many small- and medium-sized enterprises. The text starts begins with a look at strategic management before moving onto operational product development and operations execution, and in doing so provides a detailed overview of the different key issues of setting up strategic production networks. Management concepts, the required information technology as well as best practices are introduced and discussed by leading researchers from Germany, Switzerland and China. The book is ideally suited for managers responsible for setting up global or regional co-operative production networks as well as researchers and students.

These Standard Bidding Documents (SBD) and its companion Technical Note (TN) have been prepared by the World Bank for use by borrowers and their implementing agencies in the procurement of pharmaceuticals, vaccines, and condoms through international competitive bidding (ICB). For the purpose of these documents, pharmaceuticals also include nutritional supplements and oral and injectable hormonal forms of contraception. The procedures and practices presented in these SBD have been developed through broad international experience and are mandatory for use in projects that are financed in whole or in part by the World Bank in accordance with the provisions of the latest edition of Guidelines: Procurement under IBRD Loans and IDA Credits. The purpose of the TN is to provide background information to the Bank's project staff and borrowers, about the complex issues in the procurement of health sector goods and to help them make well-informed decisions in each special situation.
