A new regime for prospectuses has recently become effective in Belgium, following the European Directive 2003/71/EC and the Commission Regulation 809/2004. This book discusses the role of the auditor in conjunction with various parts of the

prospectus. It explains how the auditor has to organize and perform his work and how he has to report on the information required by the law, the Prospectus Directive, and the Regulation. In providing guidelines on the performance of the various audit tasks, there is also some guidance on the nature, the content, and the qualitative characteristics of the information which is reported on. This guide also takes into account various other documents that give recommendations or advice on the application of the Regulation or on the auditor's involvement in conjunction with the issuance of a prospectus under the Regulation. Such other documents were published by the Committee of European Securities Regulators (CESR) and by the Fédération des Experts Comptables Européens - Federation of European Accountants (FEE). As the European Commission Regulation is applicable directly in all Member States of the European Community, and the Prospectus Directive is transferred into the national law of all Member States, this book is a valuable guide to this important part of bank and finance law in Europe.

Why is the number of women entrepreneurs low among tribal people? What problems do women in these tribes face? What measures can they take to overcome their problems? What are their prospects as entrepreneurs? A person who has any of these queries, will find answers within this book. Tribal Women Entrepreneurs: Problems and Prospectus is a study to aid policy makers, planners, researchers, academicians, and existing or potential tribal women entrepreneurs.
