A Pure Soul

Evidence is increasingly being demanded before education policy in Canada is developed. Unfortunately, all too often education research and policy proposals come from relatively isolated perspectives. This volume arose from a project that

brought together a diverse group of stakeholders as part of an ongoing effort to improve communications between relevant groups. The authors focus on aspects of evidenced-based decision-making for education in the Canadian context, providing both survey articles and commentary. Topics include new and innovative provincial initiatives such as "la carte de la défavorisation au Québec" and the Alberta Initiative for School Improvement (AIS). Major Canadian large-scale testing initiatives including the Third International Math and Science Survey (TIMSS), the national Student Achievement Indicators Program (SAIP), and provincial testing programs are discussed, and selected studies resulting from these programs are presented. Also included are overviews of currently relevant issues such as male-female differences in test scores, high school exit exams, the "causal" impact of education on social assistance use and long-term labour market outcomes, teacher evaluations at universities, and the optimal level of investment in education from an economic perspective. Contributors are from university education faculties and economics departments, provincial government ministries of education and related agencies, school boards, and other related organizations such as the Canadian Teachers' Federation, the Council of Ministers of Education, Conseil Supérieur de l'Éducation au Québec, and Statistics Canada. Reflecting Canada, portions of the book are in French and others are in English.

The English Catalogue of Books

Burke's Genealogical and Heraldic History of the Landed Gentry

New Scientist magazine was launched in 1956 "for all those men and women who are interested in scientific discovery, and in its industrial, commercial and social consequences". The brand's mission is no different today - for its consumers, New Scientist reports, explores and interprets the results of human endeavour set in the context of society and culture.

→The Lancet

This biography illuminates the life of Ennio De Giorgi, a mathematical genius in parallel with John Nash, the Nobel Prize Winner and protagonist of A Beautiful Mind. Beginning with his childhood and early years of research, into his solution of the 19th problem of Hilbert and his professorship, this book pushes beyond De Giorgi's rich contributions to the mathematics community, to present his work in human rights, including involvement in the fight for Leonid Plyushch's freedom and the defense of dissident Uruguayan mathematician José Luis Massera. Considered by many to be the greatest Italian analyst of the twentieth century, De Giorgi is described in this volume in full through documents and direct interviews with friends, family, colleagues, and former students.
