Many people have the need to take notes: interpreters, attorneys, health care providers, and students, among others. Some try to learn shorthand, a complex system which requires several months (even years) of practice to master. There is a widely unknown but simple alternative to take notes more clearly and efficiently. Jean Francois Rozan and Andrew Gillies, two pioneer conference interpreters, provide techniques to significantly streamline note-taking. Although originally created for interpreters, these practical guidelines are extremely helpful to anyone who takes notes. The Note-Taking Manual will help you master note-taking symbols as well as Rozan and Gillies' techniques. You will acquire up to 40 new symbols through dictations (available as audio files at [www.interpretrain.com](http://www.interpretrain.com)). Each exercise offers a sample of notes to compare with your own and discover additional tips. These educational tools will help you become the best interpreter and/or note-taker you can be.
