The Genesis Process

"The aspects of the book related to the philosophy of science and cognitive science (inductive and deductive reasoning, biases, and heuristics) are distilled in reasonable and useful ways. I recommend this book to those addiction professionals who want to create their own framework for ethical decision making." --PsyncCRITIQUES Ethical decision-making is required in many of the difficult situations faced by addiction professionals. In this guide, Michael Taleff describes how to integrate critical thinking with ethical decision-making. This is a guide not on "what to do" when confronted with difficult ethical dilemmas, but on how to think about what to do. The author presents common ethical dilemmas that addiction professionals face in their daily work--such as boundary issues, confidentiality, dual relationships, and more--and asks readers to consider their own responses to these dilemmas. The book then shows readers how to apply new models of ethical thinking to practice. Key features: Presents an ethical self-exam to encourage critical thinking about one's own decision-making method Introduces a variety of models such as the social contract theory, existentialist theory, and ethical egoism Discusses

how biases, emotional reactions, and fallacies can weaken ethical decision-making Presents an introductory "Ethics Judgment Kit," a simple, practical decision-making procedure for students This book demonstrates how critical thinking skills can impact and improve the process of ethical decision-making.

"Born in the cauldron of personal experience of suffering and healing and honed through years of professional experience, this book will help anyone understand the attractors of love and consequent suffering. I recommend it to couples who are mystified by the depth and repetition of their pain and joy and to therapists whose destiny is to help them."
~ Harville Hendrix, Ph.D., co-author with Helen LaKelly Hunt of *Making Marriage Simple: Transform the Relationship you Have Into the Relationship you Want* Since the dawn of civilization, men and women have been magnetically and irresistibly drawn together into romantic relationships, not so much by what they see, feel and think, but more by invisible forces. When individuals with healthy emotional backgrounds meet, the irresistible "love force" creates a sustainable, reciprocal and stable relationship. Codependents and emotional manipulators are similarly enveloped in a seductive dreamlike state; however, it will later unfold into a painful "seesaw" of love, pain, hope and disappointment. The soul mate of the codependent's dreams will become the emotional manipulator of their nightmares. Readers of the Human Magnet Syndrome will better understand why they, despite their dreams for true love, find themselves hopelessly and painfully in love with partners who hurt them. This book will guide and inspire both the layman and the professional.

The New York Times bestselling "road map of conscious compassion and love" (Deepak Chopra) from actor, singer, songwriter Tyrese Gibson. Organized as a series of fundamental questions that helped Tyrese redefine who he was as a human being, and evolve into a new man, *How To Get Out of Your Own Way* is a guide to helping yourself, using his experiences as a learning tool. "It's not about talking down to people, it's about elevating them," Tyrese says, stressing that life becomes infinitely richer when one takes the time to know oneself and understand the true meaning of peace and fulfillment. Some of Tyrese's chapter-based questions include: How much do you love yourself? How much do you want for yourself? Why do men cheat? What is your bottom line? Are you ready for the next level? With personal experiences paired with reflective questions based on his extremely popular blog piece, "The Love Circle", Tyrese hopes to inspire readers to pursue their dreams and not let life's obstacles stand in the way. "A triumph. Tyrese will shock and amaze you with how he overcame the odds and became a superstar." --Rev Run "I've watched Tyrese for many years -- I've watched him succeed; I've watched him fail; I've seen

him as a beneficiary of serendipity, and I've watched him suffer at his own hand. And in the recent years, as we've become friends, I've witnessed Tyrese Gibson learn how to get out of his own way." --Will Smith

This highly practical resource integrates the powerful dynamics of family into residential treatment and outdoors-based therapy for young people. Recognizing both the family as the systemic base for promoting change in adolescents and the therapeutic potential of the residential/wilderness setting, experts show how aligning the two can enhance the healing value of the program while promoting higher standards for care. Chapters describe innovative, science-based interventions and techniques for treating common behavioral and emotional problems along a continuum of family involvement and separation, to address issues affecting the family as well as the identified patient. With its accessible ideas and compelling case studies, the book ably demonstrates the critical role of family in adolescent patients' successful transition to post-treatment life.

Among the topics covered: • A parallel process: home therapy while the adolescent or young adult is in residential care. • Intentional separation of families: increasing differentiation through wilderness therapy. • Emerging family therapy models utilized in residential settings. • Engaging families in Outdoor Behavioral Healthcare. • Research on coping skills used by youth with emotional and behavioral disorders. • Expanding our understanding of the place of family therapy in residential treatment. Family Therapy with Adolescents in Residential Treatment offers novel, exciting, and effective strategies and techniques for practitioners and mental health professionals particularly interested in family therapy with adolescents, and in related interventions and research.

Brothers from different mothers, bromancing history to save us from Trump. These are the continuing adventures of Barack Obama and Joe Biden, time traveling superheroes in search of a brighter future for America. Moments after the inauguration of our 45th President, best friends Barack Obama and Joe Biden were escorted to a secret lab run by the world's greatest scientists. They were asked to take off all

their clothes and hold very still in a fetal position until they felt a painful tingling sensation. Then they vanished. They would awake to find themselves apart, and inside their younger bodies—driven to find each other and change history for the better. Their faithful guide on this journey is Samuel L. Jackson, a brilliant actor from the present who appears in the form of an augmented reality that only they can see and hear. And thus, they find themselves leaping through time, striving to right injustice wherever they find it, looking for a world which they can proudly call home. A visual feast that's both graphic and novel, this book is a love letter to cheesy science fiction and the two men who can still be counted on to inspire us. Featuring comics produced by Titmouse Inc (Big Mouth, The Venture Bros.), it's 224 pages of adventure that will melt your snowflake brain and give you hope for humanity at the same time.

Nepal is in one of the most active earthquake regions in the world. Nepal's current non-earthquake-resistant infrastructure, lack of sufficient modern communication networks, and limited facilities and manpower in the medical sector are the major threats to life and property during a major earthquake. On March 31, 2010, under the auspices of three leading

Nepali diaspora professional organizations in the United States of America--American Society of Nepalese Engineers (ASNEng), America Nepal Medical Foundation (ANMF), and Computer Association of Nepal-USA (CAN-USA)--a joint initiative on Earthquake Preparedness and Disaster Relief in Nepal, of which this position/concept paper is a product, was launched to help understand the current status of earthquake preparedness in Nepal. This position paper describes the challenges that Nepal will face if and when another large-magnitude earthquake strikes like the devastating January 16, 1934 Nepal-Bihar earthquake. The paper also provides a list of recommendations to be considered to minimize the loss of life and property, especially in the densely populated Kathmandu valley. The document is peer-reviewed by a group of individuals having expertise in the related areas.
