At the age of fourteen, Francisco Jiménez, together with his older brother Roberto and his mother, are caught by la migra. Forced to leave their home in California, the entire family travels all night for twenty hours by bus, arriving at the U.S. and Mexican border in Nogales, Arizona. In the months and years that follow during the late 1950s-early 1960s, Francisco, his mother and father, and his seven brothers and sister not only struggle to keep their family together, but also face crushing poverty, long hours of labor, and blatant prejudice. How they sustain their hope, their good-heartedness, and tenacity is revealed in this moving, Pura Belpré Honor-winning sequel to *The Circuit*. Without bitterness or sentimentality, Francisco Jiménez finishes telling the story of his youth.

What evidence do scientists have that the earth is 4.5 billion years old, and that the universe is 14 billion years old? Does the Bible really suggest that everything began only 6,000 years ago? How does one take both scientific evidence and the Bible seriously? In this study guide, two Christ-following science professors (a physical chemist and an environmental chemist) walk you through geologic, chemical, and astronomical evidence of the earth's ancient past, and its projected future, and how these topics intersect with Christian beliefs.

## Make It Stick

This book is aimed at students who are thinking of studying Computer Science or a related topic at university. Part One is a brief introduction to the topics that make up Computer Science, some of which you would expect to find as course modules in a Computer Science programme. These descriptions should help you to tell the difference between

Computer Science as taught in different departments and so help you to choose a course that best suits you. Part Two builds on what you have learned about the nature of Computer Science by giving you guidance in choosing universities and making your applications to them. Then Part Three gives you some advice on what to do once you get to university, how to get the most out of studying your Computer Science degree. The principal objective of the book is to produce happy students, students who know what they are letting themselves in for when they start a Computer Science course, and hence find themselves very well suited for the course they choose.
