ACCELERATED SPANISH

THIS ISN'T A PHRASEBOOK, THIS IS A SYSTEM DESIGNED TO TEACH THE READER HOW TO COMBINE WORDS IN ORDER TO CREATE THEIR OWN SENTENCES! Have you always wanted to learn how to speak Spanish but simply didn't have the time? Well if so, then, look no further. You can hold in your hands one of the most advanced and revolutionary method that was ever designed for quickly becoming conversational in a language. In creating this time-saving program, master linguist Yatir Nitzany spent years examining the twenty-seven most common languages in the world and distilling from them the three hundred and fifty words that are most likely to be used in real conversations. These three hundred and fifty words were chosen in such a way that they were structurally interrelated and, when combined, form sentences. Through various other discoveries about how real conversations work--discoveries that are detailed further in this book--Nitzany created the necessary tools for linking these words together in a specific way so that you may become rapidly and almost effortlessly conversant--now. If you want to learn complicated grammar rules, or to speak perfectly proper and precise Spanish, this book is not for you. However, if you need to actually hold a conversation while on a trip to a Spanish-speaking country, to impress that certain someone, or to be

able to speak with your grandfather or grandmother as soon as possible, then the Nitzany Method is what you have been looking for. This method is designed for fluency in a foreign language, while communicating in the present tense. Nitzany believes that what's most important is actually being able to understand and be understood by another human being right away. This is one of the several, in a series of instructional language guides, the Nitzany Method's revolutionary approach is the only one in the world that uses its unique language technology to actually enable you to speak and understand native speakers in the shortest amount of time possible. No more depending on volumes of books of fundamental, beginner, intermediate, and advanced levels, all with hundreds of pages in order to learn a language. With *Conversational Spanish Quick and Easy*, all you need are fifty-three pages. Learn Spanish today, not tomorrow, and get started now!

Easy Spanish Phrase Book NEW EDITION

After failing to learn a new language on five separate occasions, I taught myself to speak Spanish like a native in just six months by watching movies and TV shows, listening to music, and reading books and comics like Harry Potter and Garfield. This simple, easy-to-learn technique, that even the most linguistically-challenged can master literally overnight, is used by many of the most respected and skilled polyglots and language teachers in the world, and it's never really been laid out, explained, and demonstrated in full, point-by-point, step-by-step

detail until now. When characters in a movie or TV show are speaking the dialogue, unless it's set in a previous period like the 1800s or something, they speak normal, everyday language. So if you wanted to learn Spanish, the type of normal everyday Spanish that native speakers use every day, aka "conversational Spanish" Don't you think that Spanish-language TV shows, movies, music, and books might be a good source to learn from if only you knew how? Not only that, but it would be fun, wouldn't it? Far better than learning the language from some boring, dry textbook or workbook that, even worse, is teaching outdated, formal, "non-conversational" Spanish (look at the dialogue in one sometime: do people actually talk like that? No). The basic technique is obvious: consume popular Spanish-language media and try to learn what they're saying by looking up what you don't understand. Sure. But the issue is twofold: 1) The problems you will inevitably run into (how do I apply what I've learned? how do I ensure I'm not misunderstanding the meaning and thereby learning something incorrect? where do I look things up? what if it's not in the dictionary and Google Translate isn't cutting it? etc.), and 2) How do we do things as efficiently as possible? If you're a beginner you're going to have to sort out how to do this all on your own, how to solve any problems you might run into on your own, while probably doing many things less effectively and slower than is necessary. I've already learned all this stuff the hard way, I've made many of the mistakes you would if you went this alone, let me just save you a ton of time, trouble, and possibly money by teaching you what I already know from experience.

Has this basic technique been used for centuries by language students and teachers alike? Yes, there are records dating back to the 18th century of language teachers using popular media in the language they're teaching to help their students learn it. I'm not claiming to have invented it. What I've done here is, after having used and refined the technique myself for several years, distilled it down to a system that's easy to learn, and which is taught in a format that's organized, easy to understand, and which takes advantage of all the latest technology, such as the all the various resources available on the internet now.

If you are looking for a way to learn Spanish quickly and efficiently, without wasting time with complex grammar rules, then read on! To quote David Wilkins: "Communicating without grammar is difficult but communicating without words is impossible". At that moment, at the young age of 19, disappointed and frustrated by my first failure, I decided to do everything possible to learn Italian, but above all I
