Laparoscopy is one of the standard techniques used by all gynecologic surgeons. This clearly written and beautifully illustrated practical manual describes in detail the technical aspects of both diagnostic and operative laparoscopy and the most useful therapeutic procedures. The exquisitely rendered color drawings demonstrate surgical technique far more effectively than competing photographic atlases. The editors have brought together an internationally renowned group of authors to contribute their knowledge and expertise in the field of laparoscopy. The new edition is a thorough revision and covers all newly emerging techniques and operative equipment.

The Larynx

Gynecologic laparoscopy has evolved into a major surgical tool used to treat a multitude of gynecologic indications. Laparoscopy is the most common surgical procedure performed by gynecologists today. This book catalogs the full spectrum of laparoscopic procedures in gynecology, oncology, and infertility treatment. The authors describe different techniques in minimally invasive surgery and review the evidence-based medical literature supporting these techniques. Included are sections on the management of complications during laparoscopy, ranging from vascular injury to bladder or bowel injury. It contains expanded chapters on laparoscopic anatomy, operative hysteroscopy and pelvic floor repair. The editors have pioneered some of the most important laparoscopic procedures used today. Their work has opened up the video laparoscopy field for surgeons worldwide. The contributors have extensive experience in laparoscopy and hysteroscopy, and many of them have established some of the surgical techniques discussed. High-quality color pictures supplement many of the presentations.

How should you grow your organization? It's one of the most challenging questions an executive team faces—and the wrong answer can break your firm. The problem is most firms' growth strategies emphasize just one type of growth—some focus on organic growth, others on M&A. When these strategies falter, the common response is simply to try harder—but firms falling into this “implementation trap” usually end up losing out to a competitor whose approach is more inclusive. So where do you start? By asking the right questions, argue INSEAD's Laurence Capron and coauthor Will Mitchell, of the Rotman School of Management at the University of Toronto and Duke University's Fuqua School of Business. Drawing on decades of research and teaching, Capron and Mitchell find that a firm's aptitude for determining the best resource pathways for growth has a defining impact on its success. They've come up with a helpful framework, reflecting practices of a variety of successful global organizations, to determine which path is best for yours. The resource pathways framework is built around three strategic questions: • BUILD: Are your existing internal resources relevant for developing the new resources that you have targeted for growth? • BORROW: Could you obtain the targeted resources via an effective relationship with a resource partner? • BUY: Do you need broad and deep relationships with your resource provider? Written for large multinationals and emerging firms alike, Build, Borrow, or Buy will help solve a perennial question and will guide you through change while priming your organization for optimal growth.

The main areas of bronchology and bronchoesophagology are hypopharynx, larynx, trachea, bronchus and esophagus and their functions as pathways of air, foods and phonation. These functions will be disturbed by infection, trauma, tumor, nerve paralysis and disorders of the central nervous system. These congresses addressed all aspects of bronchology and bronchoesophagology and also included sessions on others areas of interventional pulmonology, such as thoracoscopy. The congresses also highlighted major recent developments in telemedicine and minimally invasive diagnosis and surgery, such as the use of CCD chip technology in videoendoscopy. Future developments were addressed in two special lectures: "Micromachine" by Mr. Mizuno (Japan) and "Gastroesophageal Reflux Disease" by Prof. Dent (Australia).
