THE ESSENTIAL STUDENT DEVELOPMENT REFERENCE, UPDATED WITH CUTTING-EDGE THEORY AND PRACTICE Student Development in College is the go-to resource for student affairs, and is considered a key reference for those most committed to conscious and intentional student affairs practice. This third edition includes new chapters on social class, disability, and emerging identity theories, with expanded coverage of faith and gender identity. A new framework provides guidance for facilitating dialogues about theory, teaching theory, and the importance of educators as consumers of theory. Discussion questions conclude each chapter and vignettes are woven throughout to provide practical context for theory. Learning activities in the appendix promote comprehension and application of theory.

Get updated on the latest in student development theory and application Consider both the psychosocial and cognitive aspects of identity Learn strategies for difficult dialogues, and the importance of reflection Adopt an integrated, holistic approach to complex student development issues Student Development in College is the ideal resource for today's multifaceted student affairs role. "With five new or expanded chapters and critical updates throughout the text, this third edition expertly presents the complex, multifaceted, and continually evolving nature of the theories that inform scholars and professionals in their research and practice with college students. These authors, consummately aware of the needs of emerging and continuing student affairs professionals, have crafted a text that will be both eminently practical and intellectually engaging for graduate students, professionals, and faculty alike." —Dafina-Lazarus Stewart, associate professor, higher education and student affairs, Bowling Green State University "This third edition of Student Development in College beautifully presents the theoretical terrain of student development by honoring the foundational theories upon which the field was developed and foregrounding newer theories with brand new content and fresh perspectives. The result is a text that is comprehensive, sophisticated, and accessible—and one that is attuned to the contemporary realities of the complexities of student development." —Susan R. Student Development in the First College Year provides a detailed overview of some of the most commonly referenced theories of learning and development in the college years. What sets this primer apart from other treatments of student development theory is its careful attention to the first college year and the wide range of educational environments in which learning and development take place. The primer includes a discussion of moving from theory to educational practice and strategies for assessing developmental outcomes.

“Effective leadership means we must bring our values and mission - not just soundbites - to our activity in the digital sphere. And it's not as hard as you may think, thanks to the very practical examples and exercises Josie Ahlquist has given us in this book.”
Brandon Busteed, President - University Partners, Kaplan, Inc. “Often, higher education leaders see social media as a burden. Digital Leadership In Higher Education should be required reading in any leadership program because it clearly demonstrates how social media can and should extend leadership

rather than be a burden for it.” Russell Lowery-Hart, President - Amarillo College In this groundbreaking book, Josie Ahlquist provides readers with the tools they need to take a strong, values-based approach to leadership in the various digital spaces vital to the world of higher education today. Filled with real-world examples and tools to negotiate this ever changing digital landscape, the book fills an important niche in the literature: A user manual for your digital leadership journey. Each chapter includes tools and tactics, as well as stories that bridge the gap between technology and connection with community. This book doesn't have a recipe for cooking up the next viral video, it offers lots of ways to stay true to individual and organizational values while engaging online. Whether a college president, dean of students, associate professor, or a program coordinator, there is a need for leaders who aren't just early adopters and social media enthusiasts, but authentic individuals who back up their technology use with a purposeful philosophy and a values-based approach to their role.

Legacy and the Vision explores the rich past and bright future of the nine Black Greek-Letter organizations that make up the National Pan-Hellenic Council. In the long tradition of African American benevolent and secret societies, intercollegiate African American fraternities and sororities have strong traditions of fostering brotherhood and sisterhood among their members, exerting considerable influence in the African American community, and being on the forefront of civic action, community service, and philanthropy. Dr. Martin Luther King Jr., Toni Morrison, Arthur Ashe, Carol Moseley Braun, Bill Cosby, Sarah Vaughan, George Washington Carver, Hattie McDaniel, and Bobby Rush are among the many trailblazing members of these organizations. The rolls of African American fraternities and sororities serve as a veritable who's who among African American leadership in the United States and abroad. African American Fraternities and Sororities places the history of these organizations in context, linking them to other movements and organizations that predated them and tying their history to one of the most important eras of United States history -- the Civil Rights struggle. African American Fraternities and Sororities explores various cultural aspects of these organizations such as auxilliary groups, branding, calls, stepping, and the unique role of African American sororities. It also explores such contemporary issues as sexual aggression and alcohol use, college adjustment, and pledging, and provides a critique of Spike Lee's film School Daze, the only major motion picture to portray African American fraternities and sororities as a central theme. The year 2006 will mark the centennial

anniversary of the intercollegiate African American fraternity and sorority movement. Yet, to date, little scholarly attention has been paid to these organizations and the men and women who founded and perpetuated them. African American Fraternities and Sororities reveals the vital social and political functions of these organizations and places them within the history of not only the African American community but the nation as a whole.

A major new contribution to college student development theory, this book brings “third wave” theories to bear on this vitally important topic. The book has three sections: The first briefly introduces the third wave theories that have recently expanded the frame of the topic; the second uses those theories to focus on specific aspects of student development; and the third brings it all together with a few chapters that look at the implications for practice. The first section includes a chapter that provides an overview of the evolution of student development theories as well as chapters describing the critical and poststructural theories most relevant to the next iteration of student development theory. These theories include critical race theory, queer theory, feminist theories, intersectionality,

decolonizing/indigenous theories, and crip theories. These chapters also include a discussion of how each theory is relevant to the central questions of student development theory. The second section provides critical interpretations of the primary constructs associated with student development theory. These constructs and their related ideas include resilience, dissonance, socially constructed identities, authenticity, agency, context, development (consistency/coherence/stability), and knowledge (sources of truth and belief systems). Each chapter begins with brief personal narratives on a particular construct; the chapter authors then re-envision the narrative's highlighted construct using one or more critical theories. The third section will focus on implications for practice. Specifically, these chapters will consider possibilities for how student development constructs re-envisioned through critical perspectives can be utilized in practice. The primary audience for the book is faculty members who teach in graduate programs in higher education and student affairs and their students. The book will also be useful to practitioners seeking guidance in working effectively with students across the convergence of multiple aspects of identity and development.

Chicanas/os are part of the youngest, largest, and fastest growing racial/ethnic 'minority' population in the United States, yet at every schooling level, they suffer the lowest educational outcomes of any racial/ethnic group. Using a 'counterstorytelling' methodology, Tara Yosso debunks racialized myths that blame the victims for these unequal educational outcomes and redirects our focus toward historical patterns of institutional neglect. She artfully interweaves empirical data and theoretical arguments with engaging narratives that expose and analyse racism as it functions to limit access and opportunity for Chicana/o students. By humanising the need to transform our educational system, Yosso offers an accessible tool for teaching and learning about the problems and possibilities present along the Chicano/a educational pipeline.

Research indicates that of the pedagogies recognized as “high impact”, learning communities – one approach to which, the linked course, is the subject of this book – lead to an increased level of student engagement in the freshman year that persists through the senior year, and improve retention. This book focuses on the learning community model that is the most flexible to implement in terms of scheduling, teacher collaboration, and design: the linked course. The faculty may teach independently or together, coordinating syllabi and assignments so that the classes complement each other, and often these courses are linked around a particular interdisciplinary theme. Creating a cohort that works together for two paired courses motivates students, while the course structure promotes integrative learning as students make connections between disciplines. This volume covers both “linked courses” in which faculty may work to coordinate syllabi and assignments, but teach most of their courses separately, as well as well as “paired courses” in which two or more courses are team taught in an integrated program in which faculty participate as learners as well as teachers. Part One, Linked Course Pedagogies, includes several case studies of specific linked courses, including a study skills course paired with a worldview course; a community college course that challenges students’ compartmentalized thinking; and a paired course whose outcomes can be directly compared to parallel stand-alone courses Part

Two, Linked Course Programs, includes a description of several institutional programs representing a variety of linked course program models. Each chapter includes information about program implementation, staffing logistics and concerns, curriculum development, pedagogical strategies, and faculty development. Part Three, Assessing Linked Courses, highlights the role of assessment in supporting, maintaining, and improving linked course programs by sharing assessment models and describing how faculty and administrators have used particular assessment practices in order to improve their linked course programs.

contributing significantly to a school's culture, identity, and financial outlook. Introduction to Intercollegiate Athletics, edited by Eddie Comeaux, explores the complexities of intercollegiate athletics while explaining the organizational structures, key players, terms, and important issues most relevant to the growing but often misunderstood fields of recreational studies, sports management, and athletic administration. The book is divided into eight sections, the first three of which describe the foundations, overarching structures, and conditions that shape athletics and higher education. Three others explore the ways college athletes experience life on campus, and the final two delve into the current and future policy contexts of intercollegiate athletics. Written by a diverse group of expert scholars, the book's twenty-eight chapters are enhanced with useful glossaries, reflections from athletics stakeholders, relevant case studies, and conversation-provoking discussion questions. Aimed at upper-level undergraduate and graduate students, scholars, teachers, practitioners, athletic administrators, and advocates of intercollegiate athletics, Introduction to Intercollegiate Athletics provides readers with up-to-date and comprehensive knowledge about the changes to—and challenges faced by—university athletics programs.

Here is an introduction to salient topics and issues affecting Black males as they engage in adult basic education programs, pursue employment, and obtain higher education. The chapters include academic research as well as program descriptions and personal narratives with a concern for the “lived experiences” and the voices of the men. While not exhaustive, this volume does hope to challenge commonly held stereotypes, interactions, and policies. It is designed to raise questions about the unique experiences of this specific population and to explore the sociocultural dynamics that impact their education. This is the 144th volume of the Jossey Bass series New Directions for Adult and Continuing Education. Noted for its depth of coverage, it explores issues of common interest to instructors, administrators, counselors, and policymakers in a broad range of education settings, such as colleges and universities, extension programs, businesses, libraries, and museums.

This report explores the learning theories, pedagogies, and active learning options that encourage student engagement, push them to think more deeply, and teach them how to learn. It guides instructors on how to evaluate the effectiveness of technological and software tools, and to evaluate and assess the activities, learning, and retention occurring in their online classes. Finally, it will help instructors find inspiration for engagement from the face-to-face settings that can be translated into the online environment. This is the 6th issue of the 40th volume of the Jossey-Bass series ASHE Higher Education Report. Each monograph is the definitive analysis of a tough higher education issue, based on thorough research of pertinent literature and institutional experiences. Topics are identified by a national survey. Noted practitioners and scholars are then commissioned to write the reports, with experts providing critical reviews of each manuscript before publication.

Applying Student Development Theories Holistically

Every semester, colleges and universities ask students to complete innumerable course and teaching evaluation questionnaires to evaluate the learning and teaching in courses they have taken. For many universities it is a requirement that all courses be evaluated every semester. The laudable rationale is that the feedback provided will enable instructors to improve their teaching and the curriculum, thus enhancing the quality of student learning. In spite of

this there is little evidence that it does improve the quality of teaching and learning. Ratings only improve if the instruments and the presentation of results are sufficiently diagnostic to identify potential improvements and there is effective counselling. Evaluating Teaching and Learning explains how evaluation can be more effective in enhancing the quality of teaching and learning and introduces broader and more diverse forms of evaluation. This guide explains how to develop questionnaires and protocols which are valid, reliable and diagnostic. It also contains proven instruments that have undergone appropriate testing procedures, together with a substantial item bank. The book looks at the specific national frameworks for the evaluation of teaching in use in the USA, UK and Australia. It caters for diverse methodologies, both quantitative and qualitative and offers solutions that allow evaluation at a wide range of levels: from classrooms to programmes to departments and entire institutions. With detail on all aspects of the main evaluation techniques and instruments, the authors show how effective evaluation can make use of a variety of approaches and combine them into an effective project. With a companion website which has listings of the questionnaires and item bank, this book will be of interest to those concerned with organising and conducting evaluation in a college, university, faculty or department. It will also appeal to those engaged in the scholarship of teaching and learning.

In addressing the unique issues related to the delivery of student services in the community college setting, this book fills a longstanding need to provide practitioners with a contextual framework for their work. Starting by providing the historical context to the development of student affairs in community colleges, this handbook describes the organization of key functions and current practice, and looks at the specific constraints, opportunities, changes and future challenges that practitioners face. Community colleges are grappling with: the realities of shrinking resources; an increasingly diverse and disparate student body, with many attending part-time; demands for greater accountability; a generational change in leadership; and pressures to expand their missions as well as adopt educational technology – all of which have an impact on the role of student affairs. Among the topics covered are: Partnering with Academic Affairs; Financing Student Affairs; Legal and Policy Issues; Strategic Planning and Assessment; Accreditation and Accountability; Technology for Communication and Engagement; Academic Support Services; Student Life and Student Engagement Programs and Services; Enrollment Management; and Services for Special Populations. This handbook is intended for student affairs administrators and professionals at all stages of their careers, as well as for students in graduate preparation programs.
