## Setting Up Shop

The story of *The Uke Book Illustrated* begins in the workshop of Master Luthier John Weissenrieder. He has been building classical guitars for over 15 years. Sarah Greenbaum, a painter from New York, met John in Italy and expressed her fascination and interest in the construction of musical instruments. Over a couple of cappuccinos, an idea sparked: to create a beautifully illustrated book about how a musical instrument is made. Not just a manual, but also an artistically conceived and executed book that portrays the poetry and mystery of this ancient trade, showing innumerable practical aspects of the preparation and selection of materials, assembly and construction, the tools and jigs, and how to approach the work.

Fundamentally, *The Uke Book Illustrated* is about the process of the construction of a ukulele. But what makes it so special, and so groundbreaking in the woodworking and craft category, is that it clearly explains every step of the process through concise notes and informative drawings in the format of a graphic novel. Anyone who wants to use this book as a guide or manual, will be able to proceed chapter by chapter and drawing by drawing during the realization of his or her own instrument. Anyone wanting to gain insight into how a musical instrument is made will

appreciate the clear and informative line drawings and the beautiful watercolor illustrations that fill every page of The Uke Book Illustrated. In the end, this book is not just for crafters and woodworkers, but for musicians, artists, and anyone who enjoys a good story or is fascinated by the process of creating something with one's own hands"

Woodworkers are always looking for ways to improve their workshops, and this book is exactly what they need to outfit a shop for the first time, or expand their existing shop. *Setting Up Shop, Revised* takes the practical knowledge and ingenious solutions of the first edition, and combines them with additional photos and drawings to create the most comprehensive workshop book on the market. The second edition includes new photos and also updates on technology especially regarding dust collection, pneumatic tools, and safety. Topics covered include

determining the best shop location, shop layout, equipping the shop with tools and accessories, shop safety, and storage. *Setting Up Shop, Revised* answers the real questions woodworkers have on how to achieve their dream shops, economically and straightforwardly.

## **Refinishing Furniture Made Simple**

What do you get when an accomplished woodworker and senior editor of *Fine Woodworking* magazine sets himself the challenge of designing and building one box a week for a solid year? You get *52 Boxes in 52 Weeks*, a book dedicated to making relatively simple--yet gracefully elegant--boxes that woodworkers of all skill levels will be eager to build. Readers will begin by learning the fundamental box-making techniques that are applicable to almost every box in the book: how to match grain at corners, how to cut miters, how to make tops and bottoms, and how to finish a box with shellac, sometimes highlighted with milk paint ( a major trend in finishing right now). Following that, Kenney reveals some universal design principles that can be used as guidance as readers develop their own design aesthetic. And then, of course, the book transitions to instructions on designing and building the boxes themselves--all 52 of them!
