### Emerging and Exotic Diseases of Animals

A practical, highly accessible guide for novice researchers conducting qualitative research in public relations and marketing communications, this book guides the reader through all aspects of the research process.

### Taking a Multisectoral One Health Approach : A Tripartite Guide to Addressing Zoonotic Diseases in Countries

The ever tighter coupling of our food, water and energy systems, in the context of a changing climate is leading to increasing turbulence in the world. As a consequence, it becomes ever more crucial to develop cities, regions, and economies with resilience in mind. Because of their global reach, substantial resources, and information-driven leadership structures, multinational corporations can play a major, constructive role in improving our understanding and design of resilient systems. This volume is the product of the Resilience Action Initiative, a collaboration among Dow, DuPont, IBM, McKinsey & Co., Shell, Siemens, Swiss Re, Unilever, and Yara designed to explore possible corporate contributions to global

resilience, especially at the nexus of water, food and energy. Aggressively forward-thinking, and consistent with an enlightened self-interest, the ideas considered here represent a corporate perspective on the broad collaborations required for a more resilient world. - Roland Kupers is an associate fellow in the Smith School of Enterprise and the Environment at the University of Oxford.

### **Toward Resilience**

Software legend Capers Jones reveals the tight links between software quality, ROI, and TCO, and help you optimize all three

- Strong empirical evidence that high quality generates strongly positive ROI and reduced TCO.
- Practical ways to prevent defects, and remove them in pre-test, test, and postrelease.
- Easy checklists for assessing and improving practice, plus insights into the costs/benefits of intervention.

By renowned software consultant Capers Jones. In this book, world-renowned software management expert Capers Jones and software quality guru Jitendra Subramanyam help development leaders and practitioners quantify and optimize the economic impact of quality throughout the software lifecycle - and then choose the highest value interventions to improve it. The authors introduce powerful empirical and field data on the ability of inspection, static analysis, and test methods to reduce up to 95% of defects, and discuss the business value of improvements of this magnitude. The Economics of Software Quality is based on proven best quality practices in IT departments and at world-leading integrators, embedded software companies, and systems software groups. Jones and Curtis bring together crucial new information on:

- Identifying and fixing the root causes of short- and long-term software cost inefficiencies.
- Predicting and measuring software defects and their quality impacts.
- Assessing current practices and identifying the best interventions.
- Calculating the ROI of quality during development and maintenance.
- Comparing and choosing methods of defect prevention.
- Selecting methods of defect removal, such as inspections and static analysis.
- Understanding and evaluating more than 20 kinds of software testing.
- Best practices for postrelease defect reporting and repair.
- Recognizing 'hazardous' metrics and their problems

### **Fundamentals of Business (black and White)**

### **The Economics of Software Quality**

"[Seize the high ground is a] narrative history of the Army's aerospace experience from the 1950s to the present. The focus is on ballistic missile defense, from the early NIKE-HERCULES missile program through the SAFEGUARD acquisition site allowed by the 1972 ABM Treaty to the more advanced 'Star Wars' concepts studies toward the end of the century. [What is] covered is not only the technological response to the threat but the organizational and tactical development of the

commands and units responsible for the defense mission"--CMH website.

### **SAP Activate**

Projects are risky undertakings, and modern approaches to managing projects recognise the central need to manage the risk as an integral part of the project management discipline. Managing Risk in Projects places risk management in its proper context in the world of project management and beyond, and emphasises the central concepts that are essential in order to understand why and how risk management should be implemented on all projects of all types and sizes, in all industries and in all countries. The generic approach detailed by David Hillson is consistent with current international best practice and guidelines (including 'A Guide to the Project Management Body of Knowledge' (PMBOK) and the 'Project Risk Management Practice Standard' from PMI, the 'APM Body of Knowledge' and 'Project Risk Analysis & Management (PRAM) Guide' from APM, 'Management of Risk: Guidance for Practitioners' from OGC, and the forthcoming risk standard from ISO) but David also introduces key developments in the risk management field, ensuring readers are aware of recent thinking, focusing on their relevance to practical application. Throughout, the goal is to offer a concise description of current best practice in project risk management whilst introducing the latest relevant developments, to enable project managers, project sponsors and others responsible for managing risk in projects to do just that - effectively.

### **Public Health for Mass Gatherings**

#### **Turbulence**

The fourth edition contains guidelines on the development and evaluation of the health and safety of children in early care and education settings. This guide features 10 chapters of more than 650 standards and dozens of appendixes with valuable supplemental information, forms, and tools. KEY FEATURES More than 100 updated standards and appendixes Updated appendixes, including Signs and Symptoms Chart, Recommended Immunization Schedule, and Recommendations for Preventive Pediatric Health Care Completely revised and updated topics on environmental health, infectious diseases, and nutrition TOPICS INCLUDE Staffing Program activities for healthy development Health promotion and protection Nutrition and food service Facilities, supplies, equipment, and environmental health Play areas and playgrounds, and transportation Infectious diseases Children with special health care needs and disabilities Administration Licensing and community action And more

### **Cloud Computing Law**

(Black & White version) Fundamentals of Business was created for Virginia Tech's MGT 1104 Foundations of Business through a collaboration between the Pamplin College of Business and Virginia Tech Libraries. This book is freely available at: <http://hdl.handle.net/10919/70961> It is licensed with a Creative Commons-NonCommercial ShareAlike 3.0 license.

### **Mind Maps for Kids**

This volume represents an early attempt at assessing the Long War, now in its 14th year. Forged in the fires of the 9/11 attacks, the war includes campaigns against al Qaeda, major conflicts in Iraq and Afghanistan, and operations in the Horn of Africa, the Republic of the Philippines, and globally, in the air and on the sea. The authors herein treat only the campaigns in Afghanistan and Iraq, the largest U.S. efforts. It is intended for future senior officers, their advisors, and other national security decisionmakers. By derivation, it is also a book for students in joint professional military education courses, which will qualify them to work in the field of strategy. While the book tends to focus on strategic decisions and developments of land wars among the people, it acknowledges that the status of the United States as a great power and the strength of its ground forces depend in large measure on the dominance of the U.S. Navy and U.S. Air Force in their respective domains.

### **Affordable Excellence**

This book presents an overview of the key debates that took place during the Economic and Social Council meetings at the 2007 High-level Segment, at which ECOSOC organized its first biennial Development Cooperation Forum. The discussions also revolved around the theme of the second Annual Ministerial Review, "Implementing the internationally agreed goals and commitments in regard to sustainable development."--P. 4 of cover.

### **Hearing Health Care for Adults**

This book explores how enhancing the collection, accuracy, and management of data can aid in identifying vulnerable neighborhoods, understanding the role of older buildings, and planning sustainable growth. For preservation to play a dynamic and inclusive role, policy must evolve beyond designation and regulation and use evidence-based research.

### **The Speed of Risk**

Break down the misconceptions of the Internet of Things by examining the different security building blocks available in Intel Architecture (IA) based IoT platforms. This open access book reviews the threat pyramid, secure boot, chain of trust, and the SW stack leading up to defense-in-depth. The IoT presents unique challenges in implementing security and Intel has

both CPU and Isolated Security Engine capabilities to simplify it. This book explores the challenges to secure these devices to make them immune to different threats originating from within and outside the network. The requirements and robustness rules to protect the assets vary greatly and there is no single blanket solution approach to implement security. Demystifying Internet of Things Security provides clarity to industry professionals and provides an overview of different security solutions. What You'll Learn Secure devices, immunizing them against different threats originating from inside and outside the network. Gather an overview of the different security building blocks available in Intel Architecture (IA) based IoT platforms. Understand the threat pyramid, secure boot, chain of trust, and the software stack leading up to defense-in-depth. Who This Book Is For Strategists, developers, architects, and managers in the embedded and Internet of Things (IoT) space trying to understand and implement the security in the IoT devices/platforms.

### **Managing Risk in Projects**

"This document presents the key issues to be considered in the process of setting up and implementing public health alert, response and operational plans for MGs. It sets out methods for assessing the needs of the MG, determining the ability of existing systems to meet those needs, and modifying and strengthening those systems where required. It provides advice about prevention, detection and management of public health incidents, as well as the integration of the full range of public health activities into the MG planning process. It addresses the many different types of MG, provides case studies of the work undertaken for public health activities at various MGs, and supporting papers and additional resources to support the information here. This document has been developed primarily for public health professionals, as well as key policy makers, planners and executive personnel. In addition to those in the health sector, there are many outside authorities involved in contributing to healthy outcomes at MGs, who will also find this document useful. It is further anticipated that it will be a valuable resource for event promoters and managers, emergency service personnel, government bodies, and any organizations or individuals who contribute to the organization of MGs. Wide distribution should be encouraged, providing it is understood that while many factors influence the wellbeing of those attending MGs, the detailed contents of this document are directed principally at managing public health issues that influence health and safety at a MG."--Page 10-11.

### **Delivering High-Quality Cancer Care**

Winner of the International Book Awards for General Business Winner of the Readers' Favorite International Book Award for Non-Fiction Business It's been over a decade since Verne Harnish's best-selling book Mastering the Rockefeller Habits was first released. Scaling Up (Rockefeller Habits 2.0) is the first major revision of this business classic which details practical tools and techniques for building an industry-dominating business. This book is written so everyone -- from frontline employees to senior executives -- can get aligned in contributing to the growth of a firm. Scaling Up focuses on the four

major decision areas every company must get right: People, Strategy, Execution, and Cash. The book includes a series of new one-page tools including the updated One-Page Strategic Plan and the Rockefeller Habits Checklist™, which more than 40,000 firms around the globe have used to scale their companies successfully -- many to \$10 million, \$100 million, and \$1 billion and beyond - while enjoying the climb!

### **Achieving Sustainable Development and Promoting Development Cooperation**

The Institute of Internal Auditors' (IIA's) International Professional Practices Framework (IPPF) is the authoritative guidance on the internal audit profession. The IPPF presents current, relevant, internationally consistent information that is required by internal audit professionals worldwide. The new IPPF features improved clarity, increased transparency, measurable accountability, a defined cycle of review for all guidance, and availability in hard copy and as a fully interactive CD-ROM.

### **International Professional Practices Framework (IPPF)**

#### **Lessons Encountered**

Since its early years, the United Nations has issued a series of international recommendations on population and housing censuses under the title "Principles and Recommendations for Population and Housing Censuses".

### **Demystifying Internet of Things Security**

Toward Resilience: A Guide to Disaster Risk Reduction and Climate Change Adaptation is an introductory resource for development and humanitarian practitioners working with populations at risk of disasters and other impacts of climate change.

### **Preservation and the New Data Landscape**

A Brookings Institution Press and the National University of Singapore Press publication This is the story of the Singapore healthcare system: how it works, how it is financed, its history, where it is going, and what lessons it may hold for national health systems around the world. Singapore ranks sixth in the world in healthcare outcomes, yet spends proportionally less on healthcare than any other high-income country. This is the first book to set out a comprehensive system-level description of healthcare in Singapore, with a view to understanding what can be learned from its unique system design

and development path. The lessons from Singapore will be of interest to those currently planning the future of healthcare in emerging economies, as well as those engaged in the urgent debates on healthcare in the wealthier countries faced with serious long-term challenges in healthcare financing. Policymakers, legislators, public health officials responsible for healthcare systems planning, finance and operations, as well as those working on healthcare issues in universities and think tanks should understand how the Singapore system works to achieve affordable excellence.

### **Sustainability and the U.S. EPA**

This manual provides concise and up-to-date knowledge on 15 infectious diseases that have the potential to become international threats and tips on how to respond to each of them. The 21st century has already been marked by major epidemics. Old diseases - cholera the plague and yellow fever - have returned and new ones have emerged - SARS pandemic influenza MERS Ebola and Zika. These epidemics and their impact on global public health have convinced the world's governments of the need for a collective and coordinated defense against emerging public health threats and accelerated the revision of the International Health Regulations (2005) entered into force in 2007. Another Ebola epidemic another plague epidemic or a new influenza pandemic are not mere probabilities the threat is real. Whether transmitted by mosquitoes other insects via contact with animals or person-to-person the only major uncertainty is when and where they or a new but equally lethal epidemic will emerge. These diseases all have the potential to spread internationally highlighting the importance of immediate and coordinated response. The diseases covered are: Ebola virus disease Lassa fever Crimean-Congo haemorrhagic fever yellow fever Zika Chikungunya avian and other zoonotic influenza seasonal influenza pandemic influenza Middle-East respiratory syndrome (MERS) cholera monkeypox the plague leptospirosis and meningococcal meningitis. Although originally developed as guidance for WHO officials this publication is available to a wide readership including all frontline responders - communities government officials non-State actors and public health professionals - who need to respond rapidly and effectively when an outbreak is detected.

### **Seize the High Ground**

SAP S/4HANA is here, and the stakes are high. Get your project right with this guide to SAP Activate! Understand the road ahead: What are the phases of SAP Activate? Which activities happen when? Start by setting up a working system, then walk through guided configuration, and learn how to deploy SAP S/4HANA in your landscape: on-premise, cloud, or hybrid. Take advantage of SAP Activate's agile methodology, and get the guidance you need for a smooth and successful go-live! In this book, you'll learn about: a. Foundations Get up to speed with SAP Activate. Learn about key concepts like fit-to-standard and fit/gap analysis, understand the methodology, and walk through the key phases of project management. b. Tools and Technologies Open up your SAP Activate toolkit. See how to access SAP Activate content with SAP Best Practices

Explorer, SAP Solution Manager, and more. Then, use SAP Best Practices and SAP Model Company to set up a working system for your workshops. c. Deployment Deploy SAP S/4HANA, step by step. Follow detailed instructions to plan, prepare for, and execute your on-premise or cloud deployment activities according to SAP Activate. Walk through key scenarios for a hybrid implementation of SAP S/4HANA in your landscape. Highlights Include: 1) Deployment 2) Guided configuration 3) Agile project delivery 4) SAP Best Practices 5) SAP Model Company 6) Organizational change management 7) SAP S/4HANA 8) SAP S/4HANA Cloud 9) Hybrid landscapes 10) C\_ACTIVATE05 certification

### **Oversight of the U.s. Securities and Exchange Commission**

Oversight of the U.S. Securities and Exchange Commission : hearing before the Committee on Banking, Housing and Urban Affairs, United States Senate, One Hundred Fourteenth Congress, second session, on examining the work and agenda of the U.S. Securities Exchange Commission, June 14, 2016.

### **The ITIL V3 Factsheet Benchmark Guide**

All-in-one resource in for everything related to fluoridated water, from its impact on dental health to its safety and cost-effectiveness. Dispelling common myths that fluoridation is dangerous, this book provides science-backed information based on the most current research in Q&A format. This is the most in-depth and up-to-date educational resource available regarding fluoridated water, from the American Dental Association.

### **Zoonoses**

Mind Maps for Kids has taken the education world by storm, selling over 20,500 copies in the first four months of publication. Back by popular demand, Mind Map genius Tony Buzan now works his magic on the area of learning that most worries children, parents and teachers alike: revision. With Tony Buzan it's all brain, no pain!

### **Caring for Our Children: National Health and Safety Performance Standards; Guidelines for Early Care and Education Programs**

Building on innovative research undertaken by the 'Cloud Legal Project' at Queen Mary, University of London, this work analyses the key legal and regulatory issues relevant to cloud computing under European and English law.

### **All-hazards Preparedness for Rural Communities**

This is the United Nations definitive report on the state of the world economy, providing global and regional economic outlook for 2020 and 2021. Produced by the Department of Economic and Social Affairs, the five United Nations regional commissions, the United Nations Conference on Trade and Development, with contributions from the UN World Tourism Organization and other intergovernmental agencies.

### **Quieting the Boom**

Practical, big-picture guidance toward a mastery of social media benefits and the risks to avoid Packed with useful web links, popular social media tools, platforms, and monitoring tools, Auditing Social Media shows you how to leverage the power of social media for instant business benefits while assessing the risks involved. Your organization sees the value in social media and wants to reach new markets, yet there are risks and compliance issues that must be considered. Auditing Social Media equips you to successfully partner with your business in achieving its social media goals and track it through strong metrics. Shows how to ensure your business has adequate metrics in place to capitalize on social media while protecting itself from excessive risk Reveals how to ensure your social media strategy is aligned with your business's goals Explores the risk and compliance issues every business must consider when using social media Includes a sample audit program Auditing Social Media is the one-stop resource you'll keep by your side to clear away the confusing clutter surrounding social media.

### **Qualitative Research Methods in Public Relations and Marketing Communications**

### **World Economic Situation and Prospects 2020**

New ITIL V3! Real-life use, insights and applications for all ITIL V3 processes \* 100% re-researched edition includes 5 Lifecycle phases, 19 Processes, 4 Functions, 51 Mindmaps and 29 other diagrams \* 150 hours of work poured into 132 pages of real life data for this Guide. Known as the "ITIL V3 Encyclopedia," The Guide brings you exclusive data for all ITIL V3's 19 processes, plus implementation advice, supporting info and related processes help into one handy Guide for you. Use the 51 MindMaps and 19 tables of ITIL data to: \* Compare your ITIL approach to your competitors' and best practice \* (Re)design your ITIL processes and activities to improve results -- based on The new extensive MindMaps \* Get more insight in the processes activities \* Convince your boss (or client) to OK your implementation ideas and budget \* Discover if the new ITIL processes and activities or other advanced tactics are worth applying for your organization \* Find out how relations between processes differ by process (lots of data.)

## **Thinking about Deterrence - Enduring Questions in a Time of Rising Powers, Rogue Regimes, and Terrorism**

This illustrated report sets out a global review of the state of the world's freshwater resources, based on the collective work of 24 United Nations agencies, following on from the conclusions of the first UN World Water Development Report 'Water for People, Water for Life' published in 2003 (ISBN 9231038818). This second edition discusses progress towards the water-related targets of the UN Millennium Development Goals and examines a range of key issues including population growth and increasing urbanisation, changing ecosystems, food production, health, industry and energy, as well as risk management, valuing and paying for water and increasing knowledge and capacity. It contains 16 case studies which consider key challenges in water resource management and makes a number of recommendations to guide future action and encourage sustainable use, productivity and management of our increasingly scarce freshwater resources.

## **New Zealand Influenza Pandemic Plan**

Sustainability is based on a simple and long-recognized factual premise: Everything that humans require for their survival and well-being depends, directly or indirectly, on the natural environment. The environment provides the air we breathe, the water we drink, and the food we eat. Recognizing the importance of sustainability to its work, the U.S. Environmental Protection Agency (EPA) has been working to create programs and applications in a variety of areas to better incorporate sustainability into decision-making at the agency. To further strengthen the scientific basis for sustainability as it applies to human health and environmental protection, the EPA asked the National Research Council (NRC) to provide a framework for incorporating sustainability into the EPA's principles and decision-making. This framework, Sustainability and the U.S. EPA, provides recommendations for a sustainability approach that both incorporates and goes beyond an approach based on assessing and managing the risks posed by pollutants that has largely shaped environmental policy since the 1980s. Although risk-based methods have led to many successes and remain important tools, the report concludes that they are not adequate to address many of the complex problems that put current and future generations at risk, such as depletion of natural resources, climate change, and loss of biodiversity. Moreover, sophisticated tools are increasingly available to address cross-cutting, complex, and challenging issues that go beyond risk management. The report recommends that EPA formally adopt as its sustainability paradigm the widely used "three pillars" approach, which means considering the environmental, social, and economic impacts of an action or decision. Health should be expressly included in the "social" pillar. EPA should also articulate its vision for sustainability and develop a set of sustainability principles that would underlie all agency policies and programs.

## **Managing epidemics**

In the United States, approximately 14 million people have had cancer and more than 1.6 million new cases are diagnosed each year. However, more than a decade after the Institute of Medicine (IOM) first studied the quality of cancer care, the barriers to achieving excellent care for all cancer patients remain daunting. Care often is not patient-centered, many patients do not receive palliative care to manage their symptoms and side effects from treatment, and decisions about care often are not based on the latest scientific evidence. The cost of cancer care also is rising faster than many sectors of medicine--having increased to \$125 billion in 2010 from \$72 billion in 2004--and is projected to reach \$173 billion by 2020. Rising costs are making cancer care less affordable for patients and their families and are creating disparities in patients' access to high-quality cancer care. There also are growing shortages of health professionals skilled in providing cancer care, and the number of adults age 65 and older--the group most susceptible to cancer--is expected to double by 2030, contributing to a 45 percent increase in the number of people developing cancer. The current care delivery system is poorly prepared to address the care needs of this population, which are complex due to altered physiology, functional and cognitive impairment, multiple coexisting diseases, increased side effects from treatment, and greater need for social support. Delivering High-Quality Cancer Care: Charting a New Course for a System in Crisis presents a conceptual framework for improving the quality of cancer care. This study proposes improvements to six interconnected components of care: (1) engaged patients; (2) an adequately staffed, trained, and coordinated workforce; (3) evidence-based care; (4) learning health care information technology (IT); (5) translation of evidence into clinical practice, quality measurement and performance improvement; and (6) accessible and affordable care. This report recommends changes across the board in these areas to improve the quality of care. Delivering High-Quality Cancer Care: Charting a New Course for a System in Crisis provides information for cancer care teams, patients and their families, researchers, quality metrics developers, and payers, as well as HHS, other federal agencies, and industry to reevaluate their current roles and responsibilities in cancer care and work together to develop a higher quality care delivery system. By working toward this shared goal, the cancer care community can improve the quality of life and outcomes for people facing a cancer diagnosis.

### **Principles and Recommendations for Population and Housing Censuses**

Finding winning KPIs is not about picking some smart-sounding candidates from the long list of options. The best performance metrics are those that are born in the discussion and are tailor-made for your organization. This book is for those business professionals who are looking beyond standard performance metrics; this book will guide you step-by-step to develop the most effective KPIs.

### **Auditing Social Media**

The 2018 FAO-OIE-WHO (Tripartite) zoonoses guide, "Taking A Multisectoral, One Health Approach: A Tripartite Guide to

Addressing Zoonotic Diseases in Countries” (2018 TZG) is being jointly developed to provide member countries with practical guidance on OH approaches to build national mechanisms for multisectoral coordination, communication, and collaboration to address zoonotic disease threats at the animal-human-environment interface. The 2018 TZG updates and expands on the guidance in the one previous jointly-developed, zoonoses-specific guidance document: the 2008 Tripartite “Zoonotic Diseases: A Guide to Establishing Collaboration between Animal and Human Health Sectors at the Country Level”, developed in WHO South-East Asia Region and Western Pacific Region. The 2018 TZG supports building by countries of the resilience and capacity to address emerging and endemic zoonotic diseases such as avian influenza, rabies, Ebola, and Rift Valley fever, as well as food-borne diseases and antimicrobial resistance, and to minimize their impacts on health, livelihoods, and economies. It additionally supports country efforts to implement WHO International Health Regulations (2005) and OIE international standards, to address gaps identified through external and internal health system evaluations, and to achieve targets of the Sustainable Development Goals. The 2018 TZG provides relevant country ministries and agencies with lessons learned and good practices identified from country-level experiences in taking OH approaches for preparedness, prevention, detection and response to zoonotic disease threats, and provides guidance on multisectoral communication, coordination, and collaboration. It informs on regional and country-level OH activities and relevant unisectoral and multisectoral tools available for countries to use.

### **Water**

### **Scaling Up**

With many scholars and analysts questioning the relevance of deterrence as a valid strategic concept, this volume moves beyond Cold War nuclear deterrence to show the many ways in which deterrence is applicable to contemporary security. It examines the possibility of applying deterrence theory and practice to space, to cyberspace, and against non-state actors. It also examines the role of nuclear deterrence in the twenty-first century and reaches surprising conclusions.

### **10 Step Kpi System: A Time-proven Approach to Finding Tailor-made Kpis for the Most Challenging Business Situations**

### **Cal/OSHA Pocket Guide for the Construction Industry**

The loss of hearing - be it gradual or acute, mild or severe, present since birth or acquired in older age - can have significant

effects on one's communication abilities, quality of life, social participation, and health. Despite this, many people with hearing loss do not seek or receive hearing health care. The reasons are numerous, complex, and often interconnected. For some, hearing health care is not affordable. For others, the appropriate services are difficult to access, or individuals do not know how or where to access them. Others may not want to deal with the stigma that they and society may associate with needing hearing health care and obtaining that care. Still others do not recognize they need hearing health care, as hearing loss is an invisible health condition that often worsens gradually over time. In the United States, an estimated 30 million individuals (12.7 percent of Americans ages 12 years or older) have hearing loss. Globally, hearing loss has been identified as the fifth leading cause of years lived with disability. Successful hearing health care enables individuals with hearing loss to have the freedom to communicate in their environments in ways that are culturally appropriate and that preserve their dignity and function. Hearing Health Care for Adults focuses on improving the accessibility and affordability of hearing health care for adults of all ages. This study examines the hearing health care system, with a focus on non-surgical technologies and services, and offers recommendations for improving access to, the affordability of, and the quality of hearing health care for adults of all ages.

### **Fluoridation Facts**

The Cal/OSHA Pocket Guide for the Construction Industry is a handy guide for workers, employers, supervisors, and safety personnel. This latest 2011 edition is a quick field reference that summarizes selected safety standards from the California Code of Regulations. The major subject headings are alphabetized and cross-referenced within the text, and it has a detailed index. Spiral bound, 8.5 x 5.5"
