## **Aiims Protocols in Neonatology**

Physical Assessment of the Newborn, 5th Edition, is a comprehensive text with a wealth of detailed information on the assessment of the newborn. This valuable and essential resource illustrates the principles and skills needed to gather assessment data systematically and accurately, and also provides a knowledge base for interpretation of this data. Coverage addresses: gestational assessment, neurologic assessment, neonatal history, assessment of the dysmorphic infant, and systemic evaluation of individual body systems, as well as key information on behavioral and pain assessment, including the use of specific tools with various groups ranging from term to extremely preterm infants. Numerous tables, figures, illustrations, and photos, many of them in full color, are a major strength that enhances the book's usefulness as a clinical resource. The text is an excellent teaching tool and resource for anyone who performs newborn examinations including nurses, neonatal and pediatric nurse practitioners, nurse-midwives, physicians and therapists. It can also serve as a core text for any program preparing individuals for advanced practice roles in neonatal care. **KEY FEATURES:** An authoritative and renowned text that comprehensively addresses all key aspects of

15

newborn assessment Provides a well-ordered evaluation of individual body systems. Assists the practitioner in identifying infant state, behavioral clues, and signs of pain, facilitating individualized care. Comprehensively addresses the tremendous range of variation among newborns of different gestational ages. The content is amplified by numerous photos and illustrations, many in full color Includes Power Point slides and an Image Bank

## **Field Guide for Air and Ground Transport of Neonatal and Pediatric Patients**

### **Neonatology for Primary Care**

Developed by more than 40 leading global child health experts, this all-new, first-of-its-kind textbook is a comprehensive reference tool that combines travel medicine, practicing medicine in other countries; and review of diseases endemic in the tropics and resource-limited areas. This textbook begins by presenting foundational information to build understanding of disease, health, medicine, culture, law, and the environment. It provides information for health care practitioners on preparing families traveling with children. Finally, health and illness are discussed in tangible ways to guide the practice of pediatrics in resource-limited regions of the planet. This textbook can serve health care practitioners in conjunction with other AAP publications such as: Working in International Child Health, Atlas of Pediatrics in the Tropics and Resource-

## **Newborn Intensive Care**

New 23rd Edition! This bestselling and widely used resource on pediatric antimicrobial therapy provides instant access to reliable, up-to-the-minute recommendations for treatment of all infectious diseases in children. For each disease, the authors provide a commentary to help health care providers

select the best of all antimicrobial choices. Drug descriptions cover all antimicrobial agents available today and include complete information about dosing regimens. In response to growing concerns about overuse of antibiotics, the program includes guidelines on when not to prescribe antimicrobials. Practical, evidence-based recommendations from the experts in antimicrobial therapy Developed by distinguished editorial board Designed for those who take care of children and are faced with decisions every day At-a-glance tables of bacterial and fungal pathogen susceptibilities to commonly used antimicrobials Includes treatment of parasitic infections and tropical medicine Updated assessments regarding the strength of the recommendation and the level of evidence for treatment recommendations for major infections Anti-infective drug listing, complete with formulations and dosages Antibiotic therapy for obese children Antimicrobial prophylaxis/prevention of symptomatic infection Maximal adult dosages and higher dosages of some antimicrobials commonly used in children

## **Nursing & Health Survival Guide: Labour Midwifery Skills**

This edition of the Manual of Neonatal Care has been completely updated and extensively revised to reflect the changes in fetal, perinatal, and neonatal care that have occurred since the sixth edition. This portable text covers current and practical approaches to evaluation and management of conditions encountered in the fetus and the newborn, as

practiced in high volume clinical services that include contemporary prenatal and postnatal care of infants with routine, as well as complex medical and surgical problems. Written by expert authors from the Harvard Program in Neonatology and other major neonatology programs across the United States, the manual's outline format gives readers rapid access to large amounts of valuable information quickly. The Children's Hospital Boston Neonatology Program at Harvard has grown to include 57 attending neonatologists and 18 fellows who care for more than 28,000 newborns delivered annually. The book also includes the popular appendices on topics such as common NICU medication guidelines, the effects of maternal drugs on the fetus, and the use of maternal medications during lactation. Plus, there are intubation/sedation guidelines and a guide to neonatal resuscitation on the inside covers that provide crucial information in a quick and easy format.

## **Textbook of Adolescent Health Care**

This title is now out of print. A new version with e-book is available under ISBN 9780702044809. This highly acclaimed step-by-step guide provides the relevant physiology, available evidence and rationale for each clinical skill. In a highly readable format, 'Skills for Midwifery Practice' offers self-assessment and short summaries, as well as detailed instruction on achieving a range of clinical skills. Tells you everything you need to know about: Abdominal examination Assessment of maternal and neonatal vital signs Infection control Hygiene needs Elimination management Drug administration Intrapartum and other related childbearing skills Assessment of the baby Infant nutrition Phlebotomy and intravenous therapy Moving and handling Perioperative skills Wound management Restricted mobility management Cardiopulmonary resuscitation for the woman and

15

baby An essential midwifery textbook that covers the fundamental practical tasks required of the student. Clear layout ensures easy access to information. Highly illustrated to aid understanding. Designed to improve competency when delivering basic skills. Expanded chapter on the skills used during the first stage of labour. Application of national guideline for the management of care. Postnatal examination. Discussion of the use of infrared touch/non-touch thermometry techniques. Specific information on locating pulse sites. More on SATS monitoring. Increased information on the skills for the second stage of labour, infant feeding and daily examination of the baby. Greater reference to infection control protocols and the reduction of hospital-acquired infections.

## **Textbook of Critical Care**

Learn to improve the respiratory care of neonates, infants, and children. Neonatal and Pediatric Respiratory Care, 5th Edition gives you a solid foundation in the assessment and treatment of respiratory disorders. Clear, full-color coverage simplifies the principles of respiratory care while emphasizing clinical application. A critical piece in respiratory care's total curriculum solution, this new edition includes all the changes in current clinical practice and in the education environment. Learning objectives at the beginning of each chapter break down key content into measurable behaviors, criteria, and conditions, and self-assessment questions provide an excellent review for the NBRC.

Neonatal/Pediatric Specialty exam. UPDATED! Content reflects the latest developments in the field meeting the needs of AD programs and BS Respiratory Care programs which are growing in this field. NBRC exam-style assessment questions test your comprehension of the material in each chapter. Neonatal and pediatric disorders case studies provide an opportunity to see how content covered in the text applies to the more difficult areas of care for neonatal and pediatric disorders. Comprehensive test preparation is provided through coverage of all the content in the matrix for the NPS exam. Learning objectives at the beginning of each chapter highlight what you should learn by breaking down key content into measurable behaviors, criteria, and conditions. Academic and authoritative presentation of content covers all of the major topics of respiratory care for neonates, infants, and children, including both theory and application. Dedicated Quality and Safety chapter addresses quality care for the neonatal/pediatric patient. NEW! Revised chapter Invasive Mechanical Ventilation of the Neonate and Pediatric Patient, conforms to the new terminology and taxonomy for modes of ventilation. NEW! Additional case studies provides more application opportunities for you. NEW! Revised content better correlates to the NBRC NPS exam.

## **Manual of Neonatal Care**

The Field Guide for Air and Ground Transport of Neonatal and Pediatric Patients is a brand-new clinical transport resource brought to you by the American

Academy of Pediatrics Section on Transport Medicine. The guide is written by clinicians with extensive transport expertise and is a must for every clinician in the field of neonatal and pediatric transport. A concise, outline format makes this resource the convenient go-to reference for all your transport questions and needs. The pathophysiology of common illnesses and transport management pearls are at your fingertips. Topics include: Challenges of the transport environment Diagnostic testing and procedural skills Radiology pearls Neonatal content Pediatric content Approach to selected signs and symptoms And more

## **Skills for Midwifery Practice**

The new 6th edition textbook with accompanying DVD reflects the 2010 American Academy of Pediatrics and American Heart Association Guidelines for Neonatal Resuscitation. This textbook with extensively updated Neonatal Resuscitation Program materials represent a shift in approach to the education process, eliminating the slide and lecture format and emphasizing a hands-on, interactive, simulation-based learning environment.

## **Obstetric Intensive Care Manual, Second Edition**

Practical guide to help trainees interpret ECGs and recognise cardiac abnormalities. Presents 400 practice ECG tracings, with explanations and diagnoses for reference. Many cases include multiple

choice questions or require drawing a ladder diagram for practice.

## **Wong's Essentials of Pediatric Nursing**

The 4th Edition of this concise and practical book on the management of the critically ill neonate is now completely rewritten and revised! Features practical tips highlighted throughout the text, a step-by-step approach to key procedures, and specific points at the end of each chapter.

## **Pediatric Advanced Life Support**

Thoroughly revised and updated, CLINICAL ASSESSMENT IN RESPIRATORY CARE teaches assessment techniques from the most basic skills for the student learning the process of patient care, to the more advanced skills for the student or practitioner involved with patients in the intensive care unit. An entirely new section will teach students and practitioners the skills necessary to record patient cases. The Instructor's Manual/Test Bank allows instructors to customize their approach to assessment and includes a ready-made selection of test questions. Covers the basics of patient assessment from the first encounter, including how to initially approach, interview, monitor, and examine the patient in a professional and sensitive manner. Teaches the student to recognize basic and life ECG patterns that may occur in the cardiopulmonary patient. Discusses the unique situations that apply to neonatal and pediatric patients, differences in

assessment, and how to document the young patients history and interpret test results. Covers monitoring patients with sleep-related breathing disorders by discussing normal sleep patterns and the causes and effects of some of the more common sleep disorders, such as sleep apnea. Includes learning objectives, outlines, overviews, summaries, and outstanding review questions in each chapter. Covers special assessment techniques for caring for the adult patient, including reducing communication barriers, the effects of vision and hearing loss on assessment, age-related structural and physiological changes, and specific diagnostic tests. Features a new chapter describing the use of the fiberoptic bronchoscope, including important technical aspects, complications, risks, patient preparation, and some of the most frequent indications for use. Uses case studies to address how respiratory therapists should document the patient history and physical examination using the SOAP (Subjective, Objective, Assessment, Plan) format as they develop a care plan for their patients. Incorporates Simply Stated boxes to summarize key points, so students can easily identify and locate the most important information. Provides an Instructors Manual/Test Bank with valuable suggestions on effectively using the text within a curriculum, and includes a readyselection of test questions. Free with qualified adoptions.

## **Fast Facts for the Neonatal Nurse**

Neonatal Nursing in Australia and New Zealand: Principles for Practice uniquely reflects the local

practice, context and standards of neonatal nursing in Australia and New Zealand. Edited by Victoria Kain and Trudi Mannix, the content spans all neonatal care settings, addressing the considerations of all levels, including special care and intensive care units, while highlighting the collaborative nature of neonatal care and interdisciplinary teamwork within this environment. The text comprehensively addresses ANZ-specific perspectives, including the neonatal context for First Peoples; the neonatal nurse practitioner and advanced practice roles; workplace culture; newborn screening, resuscitation, retrievals and transport; stabilisation of the high-risk newborn; the range of disorders by body system; legal and ethical issues; and end-of-life care in the neonatal unit. Supported by international and ANZ neonatal network data Aligned to the Australian College of Neonatal Nurses and New Zealand Nurses Organisation Standards Key learning objectives emphasised Nursing and midwifery-focused Case studies provide the vital link between theory and practice Clinical Practice and Reflections features further reader insight and knowledge Evidence-based practice research underpins all chapters Family-centred care is reinforced throughout Evolve resources included to enhance teaching and learning: eBook on VitalSource Student and Lecturer resources, for each chapter: Test banks of MCQ and short answer questions Additional online case studies Journal articles related to practice and critical thinking questions Answer guide to in-text and online case study, test bank and article questions

## **Nelson's Pediatric Antimicrobial Therapy 2017**

From the files of "NeoReviews" comes this collection of Perinatal Profiles, chosen to provide a glimpse into the lives of the movers and shakers in neonatal/perinatal medicine. Many of the profiles in this collection were written by the students of these pioneers who have gone on to become key NPM innovators themselves. They provide rare insight into the personalities of their mentors and the development of NPM. You'll meet such luminaries as: Alex Minkowski, MD, whose life's work, including a conference on whether assisted ventilation did more harm than good, led French President Jacques Chirac in 2004 to call him one of the consciences of the 20th century. Martin Couney, MD, who in 1896 began 40 years of organizing preterm baby child hatchery sideshows to showcase the marvels of incubator technology at expositions, state fairs, traveling circuses even Coney Island showing the public that even the most severely preterm infants had a chance for survival. Elizabeth Blackwell, Marie Putnam Jacobi, Elizabeth Garret, and Madeleine Bres, the first female physicians caring for women and children at the end of the 19th century. All struggled for admission to medical school yet eventually managed to pierce the armor of sex bias. Ignac Fulop Semmelweis, the Hungarian pioneer of antisepsis who first demonstrated that most childbed fever cases could be prevented one of the most important discoveries of 19th-century medicine yet was ridiculed and released in disgrace from his Viennese hospital and

15

medical school faculty posts. Cathy Copley, the Seattle nurse who wove nurses into the fabric of neonatal resuscitation as team members and instructors, insisting that skill take precedence over title. This collection of 26 key columns was compiled and edited by NeoReviews Editor-in-Chief Alistair G.S. Philip, MD, FRCPE, FAAP, in honor of the 15th anniversary of "NeoReviews," the American Academy of Pediatrics online journal of neonatology, available at <http://www.neoreviews.org>. "

## **Handbook of Neonatal Intensive Care**

The all-new Neonatology for Primary Care covers practical approaches to evaluation and management of conditions encountered by fetuses and newborns. Essential clinical guidance Step-by-step recommendations on what to do, when to admit, and when to refer. Evidence-based approach Recommendations and lists detail references within each chapter. Practical focus Designed as an action-oriented working tool; directly addresses day-to-day practice concerns. Comprehensive coverage of: Perinatal Health Routine Care Issues Assessment and Physical Examination of the Newborn Neonatal Medical Conditions Perinatal Care: Caring for the High-Risk Infant Neonatal Outcomes.

## **Pioneers in Neonatal/Perinatal Medicine**

Written by a world-renowned expert in perinatal pharmacology, this essential reference contains current, complete, and evidence-based information on

the transmission of maternal drugs into human milk. Because so many women ingest medications while breastfeeding, one of the most common questions encountered in pediatrics is: Which drugs are safe and which are hazardous for the infant? This 2021 edition has been extensively revised, and now includes 50 completely new and 356 updated medications, and state-of-the-art coverage of multiple diseases, vaccines, and syndromes. It addresses the use of radiopharmaceuticals, chemotherapeutic agents, and vaccines in breastfeeding mothers, and covers adult concerns, methods of reducing risk to infants, and infant monitoring. New to the 2021 Edition: 50 New Drugs Added 356 Drugs Updated with new data 817 Drug References Updated An updated 7x10 trim size and streamlined design for ease of use in patient education The latest information on the impact of prescription medications, over-the-counter drugs, herbs, and street drugs Key Features: Evidence-based, current information on over 1300 drugs, diseases, vaccines, and syndromes Dr. Hale's renowned "Lactation Risk Categories" incorporate recent updates Key points and savvy tips about breastfeeding and medications for quick reference Common abbreviations and drugs listed in alphabetical order Adult concerns, adult dose, pediatric concerns, infant monitoring, and alternatives Succinct information on evaluation of the infant

## **NEONATAL RESUSCITATION, 1994**

The only "how-to" manual on the obstetric patient in the critical care unit! Replete with summary tables

and algorithms, this practical manual focuses on the clinical bedside management of the intensive obstetric patient. Features a generous number of tables and algorithms as well as mnemonics simplifying key points.

## **Understanding the NICU**

Provides a comprehensive guide to early child care from birth to preschool, covering topics ranging from food allergies, sleeping habits, autism and breastfeeding.

## **Questions from Neoreviews: A Study Guide for Neonatal-Perinatal Medicine**

## **Neonatal and Pediatric Respiratory Care - E-Book**

Known as the "bible" of midwifery, this new edition of Varney's Midwifery has been extensively revised and updated to reflect the full scope of current midwifery practice in a balance of art and science, a blend of spirituality and evidence-based care, and a commitment to being with women.

## **Varney's Midwifery**

Trustworthy guidance spanning every aspect of adolescent health care.

15
