Delivering Business Analytics

“An essential, must-read guide” (Dr. Susan Albers, New York Times bestselling author of *Eating Mindfully*) from the renowned Duke Integrative Medicine center: the first book to combine health psychology with cutting-edge nutrition research to deliver an up-to-the-minute method for eating mindfully and breaking the yo-yo diet cycle. It’s easy on occasion to eat too much, eat too quickly, eat for comfort, or choose junk food. But every year millions of Americans vow to lose weight and get healthy and aren’t able to overcome the largest roadblock to these changes—ingrained eating habits. Now two leading experts from Duke Integrative Medicine offer a new paradigm for eating and health—a step-by-step program that dismantles old patterns, provides new tools for making healthy choices, and fosters deep, internal motivation. Grounded in scientific research, *The Mindful Diet* examines how what we eat and drink affects our body on a biochemical level, and how we can become aware of our own internal signals through the practice of mindfulness. Loaded with concrete meditation exercises, behavioral techniques, nutrition advice, and meal-planning charts, this book provides the tools to manage cravings, curb emotional overeating, and figure out when you are full. Instead of an all-or-nothing approach to eating, *The Mindful Diet* focuses on the many variables that drive our habits—including stress, unhappiness, and even unconscious beliefs—and provides a roadmap for sustainable change. “This is not an eat this, don’t eat that program; rather, it’s an attack on the negative thoughts and patterns that lead to diet failure” (Publishers Weekly). Lasting weight loss and healthy living begin in the mind: now you can learn how to re-program your body, make healthy choices, lose weight, and keep it off for life.

"Astyk and Newton have written an important book with an unusual message: We need millions of new farmers...as soon as possible. You could not find two more reasonable, intelligent, sincere, and passionate people to talk to about food. And the book has very much the feeling of a conversation - with someone smart who cares about you. It is also intellectually complex, creative and nuanced. The authors are big thinkers and have taken a good lick at the central human issues of our time." Peter Bane "This definitive guide can provide inspiration to gardeners and those concerned about the environment. It offers practical solutions to all the food-related problems brought on by industrialized agriculture and the globalization of food. Very carefully researched and well written, this documents what is wrong and what we can do about it." Connie Krochmal - Bellaonline "This outstanding and well-written compendium of insights and recommendations, of fervent idealism and practical solutions, is highly recommended."—Library Journal

Once we could fill our grocery carts with cheap and plentiful food, but not anymore. Cheap food has gone the way of cheap oil. Climate change is already reducing crop yields worldwide. The cost of flying in food from far away and shipping it across the country in refrigerated trucks is rapidly becoming unviable. Cars and cows increasingly devour grain harvests, sending prices skyrocketing. More Americans than ever before require food stamps and food pantries just to get by, and a worldwide food crisis is unfolding, overseas and in our kitchens. We can keep hunger from stalking our families, but doing so will require a fundamental shift in our approach to field and table. A Nation of Farmers examines the limits and dangers of the globalized food system and shows how returning to the basics is our best hope. The book includes in-depth guidelines for: Creating resilient local food systems Growing, cooking, and eating sustainably and naturally Becoming part of the solution to the food crisis

The book argues that we need to make self-provisioning, once the most ordinary of human activities, central to our lives. The results will be better food, better health, better security, and freedom from corporations that don't have our interests at heart. This is critical reading for anyone who eats and cares about high-quality food. Sharon Astyk farms in New York, and is the author of Depletion and Abundance. Aaron Newton is a sustainable systems land planner in North Carolina, and is the founding editor of Groovy Green.

Maybe it's the mountains covered in lush tropical vegetation. Maybe it's the beaches, fringed with crystal-clear water and the promise of colorful marine life just below the surface. Or maybe it's the people who make Jamaica such a welcoming place. This island has lured stars and royalty from around the globe since the 1920s. Now it is one of the top vacation spots in the world.

The Next Decade

#1 NEW YORK TIMES BESTSELLER • The twentieth anniversary edition of the classic story of an incredible group of students and the teacher who inspired them, featuring updates on the students' lives, new journal entries, and an introduction by Erin Gruwell Now a public television documentary, Freedom Writers: Stories from the Heart In 1994, an idealistic first-year teacher in Long Beach, California, named Erin Gruwell confronted a room of "unteachable, at-risk" students. She had intercepted a note with an ugly racial caricature and angrily declared that this was

precisely the sort of thing that led to the Holocaust. She was met by uncomprehending looks—none of her students had heard of one of the defining moments of the twentieth century. So she rebooted her entire curriculum, using treasured books such as Anne Frank’s diary as her guide to combat intolerance and misunderstanding. Her students began recording their thoughts and feelings in their own diaries, eventually dubbing themselves the “Freedom Writers.”

Consisting of powerful entries from the students’ diaries and narrative text by Erin Gruwell, *The Freedom Writers Diary* is an unforgettable story of how hard work, courage, and determination changed the lives of a teacher and her students. In the two decades since its original publication, the book has sold more than one million copies and inspired a major motion picture *Freedom Writers*. And now, with this twentieth-anniversary edition, readers are brought up to date on the lives of the Freedom Writers, as they blend indispensable takes on social issues with uplifting stories of attending college—and watch their own children follow in their footsteps. *The Freedom Writers Diary* remains a vital read for anyone who believes in second chances.

The COMPSTAT Paradigm

The author of the acclaimed New York Times bestseller *The Next 100 Years* now focuses his geopolitical forecasting acumen on the next decade and the imminent events and challenges that will test America and the world, specifically addressing the skills that will be required by the decade’s leaders. In the long view, history is seen as a series of events—but the course of those events is determined by individuals and their actions. During the next ten years, individual leaders will face significant transitions for their nations: the United States’ relationships with Iran and Israel will be undergoing changes, China will likely confront a major crisis, and the wars in the Islamic world will subside. Unexpected energy and technology developments will emerge, and labor shortages will begin to matter more than financial crises. Distinguished geopolitical forecaster George Friedman analyzes these events from the perspectives of the men and women leading these global changes, focusing in particular on the American president, who will require extraordinary skills to shepherd the United States through this transitional period. *The Next Decade* is a provocative and fascinating look at the conflicts and opportunities that lie ahead.

One of our greatest scientific minds reflect on the role of science in the twenty-first century. Science is often portrayed as an obscure, difficult discipline, governed by elite researchers and inaccessible to the general public. In this riveting, inspiring new book, preeminent astrophysicist Martin Rees overturns this view, urging improved communication between researchers and laypeople. In order to shape debates over healthcare, energy policy, space travel, and other vital issues, ordinary citizens must develop a "feel" for science—the one truly global culture—and engage directly with research rather than relying on pundits' and politicians' interpretations. Recognized as an expert on the political and ethical impact of science, Rees demonstrate show we must solve the new challenges we face—from population growth to climate change—by devising strategies with a long-term, global perspective. In the process, he offers insights into the prospects

for future discoveries while also explaining science's intrinsic limits. Just as importantly, Rees reminds us that science should be a source of pleasure and wonder for specialists and nonspecialists alike.

Traditionally, web applications have been architected so that the back-end houses all the front-end code. This has resulted in heavy projects that are difficult to manage and scale. This book will explain a new way to write web applications by treating the front-end as if it were a third-party (such as a mobile client). This book, written by a practicing MEAN developer, will take a holistic approach to using the MEAN JavaScript platform for creating modern web applications and lay out how to use the MEAN (Mongo, Express, AngularJS, and Node.js) set of tools to create a web application, from installation and setup of the tools to debugging and deploying your app. After an introduction to how web development is changing and the advantages of using the MEAN stack, the author jumps into an introduction to each tool and then dives into using the complete JavaScript-based application stack to build, test, and deploy apps.

The Onion, with its unique brand of deadpan satirical humor, has become a familiar part of the American scene. The newspaper has a readership of over a million, and reaches millions more with its spin-off books and Onion News Network. The Onion has shown us that standard ways of thinking about the news have their grotesque and silly side, and this invites philosophical examination. Twenty-one philosophers were commissioned to provide witty philosophical perspectives on just what makes the Onion so truthful and insightful. Former Governor Sarah Palin reported: "I just couldn't put it down. The Onion and Philosophy is the most exciting book I've read since Principia Mathematica." Are the Onion writers truly cynical, or just cynically faking it? Does the Onion really have a serious point of view on religion? On sex? On politics? Who cares what Area Man thinks? If everyone's so dumb, how come so many Onion readers keep on laughing at how dumb they are?

Managing Creative People

This is a book that integrates what is known from a wide variety of disciplines about the nature of storytelling and how it influences and transforms people's lives. Drawing on material from the humanities, sociology, anthropology, neurophysiology, media and communication studies, narrative inquiry, indigenous healing traditions, as well as education, counseling, and therapy, the book explores the ways that therapists operate as professional storytellers. In addition, our job is to hold and honor the stories of our clients, helping them to reshape them in more constructive ways. The book itself is written as a story, utilizing engaging prose, research, photographs, and powerful anecdotes to draw readers into the intriguing dynamics and processes involved in therapeutic storytelling. It sets the stage for what follows by discussing the ways that stories have influenced history, cultural development, and individual worldviews and then delves into the ways that everyday lives are impacted by the stories we hear, read, and view in popular media. The focus then moves to stories within the context of therapy, exploring how client stories are told, heard, and negotiated in sessions. Attention then moves to the ways that therapists can become more skilled and accomplished storytellers, regardless of their theoretical preferences and style.

Creating Value Through People

The world's most forward-looking CEOs recognize the real challenge facing business today: a fundamental shift in the nature of commerce. While sustainability programs, government action, and nonprofits are all parts of the solution, CEOs and other leaders must focus on social, environmental, and economic benefit—not only because it will make the world a better place, but because it will ensure lasting profitability and success in the business climate of tomorrow. The Breakthrough Challenge is both an inspiring call-to-action and a guide for this transformation,

based on the work of The B Team, a major initiative uniting leaders in sustainability. As a founding advisor and member of The B Team, John Elkington and Jochen Zeitz map out an agenda for change. The most important goal for businesses must be redefining the bottomline to account for true long-term costs throughout the supply chain. To achieve this, leaders must rethink everything: what counts on balance sheets, how to incentivize performance, who does what in the C-suite, and even what inspires us. The Breakthrough Challenge draws on over 100 exclusive interviews to show this shift in action, sharing the pioneering work of leaders such as Paul Polman, CEO of Unilever; Arianna Huffington, founder and CEO of The Huffington Post; Peter Brabeck-Letmathe, chairman of the Nestlé Group; and Linda Fisher, pioneering Chief Sustainability Officer at DuPont, among many others. Change-as-usual strategies are not enough to move business from breakdowns to breakthroughs. The Breakthrough Challenge shows leaders how to achieve a true transformation and refocus the definition of profitability on the lasting wellbeing of people and planet—for the lasting success of their business.

Expert analysis of rising oil prices and the out-of-control oil markets that jeopardize both national security and the economy. The price of oil is negatively impacting both companies and consumers. In *Oil's Endless Bid: Taming the Unreliable Price of Energy to Secure Our Economy*, energy analyst Dan Dicker recalls his experiences as an oil trader and reveals the changes that have taken place in the oil markets during the past twenty years, and particularly the last five, as investment banks, energy hedge funds, and managed futures funds have come to dominate energy trading and wreak havoc on prices. Reveals why oil prices cannot stabilize without dramatic action on the part of both government and business. Details how the novel, but wrong, idea of oil as an asset class took a sleepy, club-like market into the national spotlight. Describes how the United States is unnecessarily handing its wealth over to foreign oil producers during a time when the potential supply of oil is greater than ever. Written by an industry insider, *Oil's Endless Bid* analyzes the biggest financial story of the last ten years: how we lost control of our oil markets.

Although science has unlocked the secrets of the human genome, the causes of social and economic development remain stubbornly enigmatic. Why do some countries adopt new technologies more readily than others? Why does income inequality persist in some regions—even in the face of rapid economic growth? Why do some societies welcome the challenges of globalization while others attempt to turn back the tide? *Honoring the Past, Building the Future* examines these and many related questions through the experience of Latin America and the Caribbean. In an accessible, journalistic style, author Ricardo Ávila explores a

Graduate schools churn out tens of thousands of PhDs and MAs every year. Yet more than half of all college courses are taught by adjunct faculty, which means that the chances of an academic landing a tenure-track job seem only to shrink as student loan and credit card debts grow. What's a frustrated would-be scholar to do? Can she really leave academia? Can a job outside the academy really be rewarding? And could anyone want to hire a grad-school refugee? In this third edition of "So What Are You Going to Do with That?", thoroughly revised with new advice for students in the sciences, Susan Basalla and Maggie Debelius—PhDs themselves—answer all those questions with a resounding "Yes!" A witty, accessible guide full of concrete advice for anyone contemplating the jump from scholarship to the outside world, "So What Are You Going to Do with That?" covers topics ranging from career counseling to interview etiquette to how to translate skills learned in the academy into terms an employer can understand and appreciate. Packed with examples and stories from real people who have successfully made this daunting—but potentially rewarding—transition, and written with a deep understanding of both the joys and difficulties of the academic life, this fully updated guide will be indispensable for any graduate student or professor who has ever glanced at his or her CV, flipped through the want ads, and wondered, "What if?"

Can we live robustly until our last breath? Do we have to suffer from debilitating conditions and sickness? Is it possible to add more vibrant years to our lives? In the #1 New York Times bestselling *The End of Illness*, Dr. David Agus tackles these fundamental questions and dismantles misperceptions about what “health” really means. Presenting an eye-opening picture of the human body and all the ways it works—and fails—Dr. Agus shows us how a new perspective on our individual health will allow us to achieve a long, vigorous life. Offering insights and access to powerful new technologies that promise to transform medicine, Dr. Agus emphasizes his belief that there is no “right” answer, no master guide that is “one size fits all.” Each one of us must get to know our bodies in uniquely personal ways, and he shows us exactly how to do that. A bold call for all of us to become our own personal health advocates, *The End of Illness* is a moving departure from orthodox thinking.

A Nation of Farmers

A clash between the ideology of growth and the growth of ideas, between control and creativity, between measurement and the immeasurable, between predictability and the fickle muses of inspiration in engulfing our boardrooms. In this scathing swipe at the institutionalised idiocy that is stifling creativity just at the time the world needs it most Gordon Torr draws from the leading lights of creativity research to demolish the myths that surround the generation of ideas in the modern organisation. The curse of the brainstorm, the commoditisation of creative talent, the deskilling of the imagination, the startling inadequacies of management theory – these and the many other horrors of idea-assassination that run rampant in creative sector companies are dissected and disembowelled in this hilarious expose of the drama that unfolds every time a new idea slides across the boardroom table. This book sets out to address the black hole that surrounds the management of creative people, debunking many myths of creativity, and outlining a revolutionary approach to the pressing issue of creative productivity in the contemporary creative sector company. A handbook of tools, techniques, methods and practical ideas whose USP is a framework for thinking about efficient creative management – how to extract value from creative time. Gordon Torr presents a logical argument that puts in place the building blocks of the author’s knowledge and experience towards the final architecture. “We need them as never before. And we know that they’re somehow different. Yet the productive management of creative people is an almost totally neglected science. I doubt if there’s a single industry that wouldn’t gain immediate advantage from Gordon Torr’s scrupulous and enlightening detective work.” - Jeremy Bullmore

"So What Are You Going to Do with That?"

Meeting the new standard for leadership. Higher Ambition is required reading for every leader who refuses to compromise between people and performance. Choosing one or the other may have worked in the past, but it won't work now. As global competition stiffens and businesses face increased public scrutiny and renewed government regulation, leaders must win on all fronts—with their people, their customers, their communities, and their shareholders. In short, they must deliver superior economic and social value. Brimming with powerful stories and thoughtful advice from CEOs themselves, Higher Ambition equips leaders with the practical insights they need to meet this new and higher standard. The authors, an international team of experts from leading business schools and consultancies, offer a unique view into the minds of some of the most successful and insightful leaders of our time: CEOs from vanguard companies around the world that have demonstrated the distinctive ability to do good while also doing well. These organizations are as diverse as Standard Chartered Bank, Infosys, Volvo, Cummins, IKEA, the Tata Group, and Campbell's Soup. Readers will learn the principles and practices these pioneering leaders are using to:

- Build enduring enterprises that simultaneously solve for people and profits
- Forge winning strategies that leverage their companies' unique cultural and human capabilities
- Dramatically raise the aspirations and ambitions of their people
- Energize and align their diverse global firms
- Relentlessly upgrade leadership capabilities throughout their organizations

Drawing on the author team's extensive research and in-depth interviews with successful leaders from around the globe, this provocative new book is poised to become a management classic in the tradition of In Search of Excellence and Built to Last.

The Last Decade of the Cold War

The 1980s was a period of almost unprecedented rivalry and tension between the two main actors in the East-West conflict, the United States and the Soviet Union. Why and how that conflict first escalated and thereafter, in an amazingly swift process, was reversed and brought to its peaceful conclusion at the end of the decade is the topic of this volume. With individual contributions by eighteen well-known scholars of international relations and history from various countries, the book addresses the role of the United States, the former Soviet Union, and the countries of western and eastern Europe in that remarkable last decade of the Cold War, and discusses how particular events as well as underlying political, ideological, social, and economic factors may have contributed to the remarkable transformation that took place.

Rethinking the Future

For years, award-winning independent filmmaker Rick Schmidt has been teaching aspiring directors how to make "no-budget" films, both in workshops and in his classic guide Feature Filmmaking at Used-Car Prices. Now Schmidt shows them how it is easier—and cheaper—than ever to make an innovative, high quality work, thanks to digital video. Filled with the latest information on equipment and software, ideas for experimenting with new moviemaking techniques, and advice based on Schmidt's own experiences, Extreme DV at Used-Car Prices offers a step-by-step guided tour through the making of a feature-length movie using the newest and ever-changing DV technology. Schmidt shows how to:

- Take a DV project from idea to script (written or improvised), contract to pre-production and into the shoot
- Work with—and rally—the cast and crew
- Select affordable digital equipment to make a cutting-edge DV feature
- Edit a DV movie electronically with Final Cut Pro
- Promote one's work guerilla-style
- Live (and budget) creatively as a moviemaker
- Look ahead to what's on the DV horizon

Instructive and inspiring, this one-of-a-kind book is essential reading for filmmakers with lots of ideas but little money.
