Next Big Idea Club selection -- chosen by Malcolm Gladwell, Susan Cain, Dan Pink, and Adam Grant as one of the "two most groundbreaking new nonfiction reads of the season!" Inc's "10 Most Inspiring Books of 2018" Real Simple's "Best Books of 2018" Elle's "29 Best Books of 2018" TechCrunch's "Favorite Things of 2018" "This book has the power to change everything! Writing with depth, wit, and insight, Ingrid Fetell Lee shares all you need to know in order to create external environments that give rise to inner joy."--Susan Cain, author of Quiet and founder of Quiet Revolution Designer and TED star Ingrid Fetell Lee presents groundbreaking research to explain how making small changes to your surroundings can create extraordinary happiness in your life. Have you ever wondered why we stop to watch the orange glow that arrives before sunset, or why we flock to see cherry blossoms bloom in spring? Is there a reason that people -- regardless of gender, age, culture, or ethnicity -- are mesmerized by baby animals, and can't help but smile when they see a burst of confetti or a cluster of colorful balloons. We are often made to feel that the physical world has little or no impact on our inner joy. Increasingly, experts urge us to find balance and calm by looking inward -- through mindfulness or meditation -- and muting the outside world. But what if the natural vibrancy of our surroundings is actually our most renewable and easily accessible source of joy? In Joyful, designer Ingrid Fetell Lee explores how the seemingly mundane spaces and objects we interact with every day have surprising and powerful effects on our mood. Drawing on insights from neuroscience and psychology, she explains why one setting makes us feel anxious or competitive, while another fosters acceptance and delight -- and, most importantly, she reveals how we can harness the power of our surroundings to live fuller, healthier, and truly joyful lives.

The People Spotter's Guide, Vol 1 is a tongue-in-cheek catalog, presenting over 100 types of humans. Every type is illustrated with a photo and - of course satirical - text, to help you spot these people in the wild. So you might run into an example of the Homo Securitatis Inferioris (security agents who don't look like they're strong) or the Homo Amantus Vestimentatis Identicus (an identically dressed couple). The guide encourages you to go out and explore your own biotope and to take a closer look at the people living in it. Every spotting is awarded with a number of points - the more rare the behavior you've witnessed, the more points you'll get.

The next in Lonely Planet's Spotter's Guide series reveals more than 100 locations of classic moments from famous films and TV series. How many scenes can you tick off? Films featured range from La Dolce Vita in Rome to Gladiator in Morocco. and TV series' settings include Game of Thrones in Dubrovnik and The Bridge in Scandinavia, all selected by a film critic. Find the locations near you and be the star of your own show! The movies take you places: cinema is a mode of transport. In just 90 minutes, you can be whisked all the way around the globe - perhaps with a dotted red line marking your progress on a map as you go. Some films take you even farther, out of this world and to other galaxies far, far away. And conversely, there are some places that can transport you into the world of a movie. If you want to feel like James Bond, try going to

James Bond Island. In a Holly Golightly mood? Have a danish pastry and some coffee outside Tiffany's in Manhattan. Or want to feel like Rocky? Then run up the steps to the Philadelphia Museum and put your hands in the air like a champ when you get to the top. This book is about the real-world places that provided the backdrops and settings for some of our most memorable collective dreams. Some of these locations played themselves and others were dressed up to look like somewhere else. But they all added texture and colour and weight to the visions of our best TV- and film-makers. Who needs CGI when the real world looks as fabulous and varied as this? The Ultimate Guide to U.S. Army Survival Skills, Tactics, and Techniques

25% of this book's proceeds will be donated to two military charities: the Special Operation Warrior Foundation and the Sua Sponte Foundation. This book is the complete beginner's guide to long range shooting written in simple every-day language so that it's easy to follow. Included are personal tips and best advice from my years of special operations sniper schooling and experience, and as a sniper instructor. If you are an experienced shooter, this guide will be a resource covering the principles and theory of long range shooting. This is the preliminary book to help you understand fundamental concepts such as MOA vs Mils and external ballistics, that can be like a trusted resource at the range. Learning to shoot long range isn't that difficult. Once you understand the basics, you can start to master your technique and you'll be hitting targets in no time. The author has a series of online instructional videos known for their ability to take seemingly complex areas of long range shooting and breaking them down so that they're easy to understand. This book was motivated by the feedback from those videos. The handbook is broken down into three main categories: What it is/How it works, Fundamentals, and How to use it. "What it is/How it works" covers equipment, terminology, and basic principles. "Fundamentals" covers the

theory of long range shooting. "How to use it" gives you practical advice on how to implement what you've learned so far to make you a long range shooter.

The Science of Supercars

Monster Spotter's Guide to North America

Did you know there are over 47,000 facts in the world?* And the good news is, many of them are in this book. That's right, The Grand Tour A-Z of the Car is the only reference guide you need for cars, driving and all related matters, especially if you're not too fussed about those facts being accurate. In this lavishly tooled book you will find a rich and satisfying collection of motor-related informations from the origins of Porsche and the fate of Lada to the dark history of the Wankel engine and the correct name for those weird little hairs on new tyres. Throughout the book, Jeremy Clarkson, Richard Hammond and James May are on hand to share their knowledge and wisdom, and then we've made the pictures bigger to fill in the gaps around it. If you want to impress your friends, and then annoy your friends, and then cause your friends to think "Oh God, now they're telling us about the slightly ironic way in which the founder of MG died" before hurriedly leaving your house, possibly forever, The Grand Tour A-Z of the Car is the book for you. The Grand Tour A-Z of the Car - literally bursting with facts!** * Grand Tour estimate** Not literally

A Spotter's Guide to Film (and TV) Locations

From flying cars to amphibious vehicles, solar-powered saloons to rockets on wheels, these are over 50 of the most wacky cars ever devised. Fancy a car that drives sideways? Try the Jeep Hurricane. Or maybe a car in which the windows change colour according to your mood for a more serene and health-giving driving experience? That'll be the Toyota RiN. And if you like a flutter, you'll need the Chrysler Town and Country Black Jack, which contains a mini onboard casino. Some concept cars are designed to demonstrate alternative materials and energy sources, or to showcase the gadgets of the future, or even cater for specific lifestyles or groups of people. Many don't even get beyond the prototype stage - for reasons of cost or practicality, or, in the case of the nuclear-powered Ford Nucleon of 1958, the danger of causing a small atomic explosion. Featuring everything from practical experiments such as the hatchback fire engine, and ideas that have managed to make it into production, to stunning yet impractical supercar concepts, this book both celebrates and cringes at some of motoring's most daft - and even idiotic - ideas.

As everyone knows, there are three ways of doing things. The right way, the wrong way and the Top Gear way. Although, on reflection, that's usually just the wrong way, but faster and with more shouting. Anyway, the good news is that this third way of doing things can be applied to almost anything, and that includes motoring in general. All you need is the right guidance, which is where the brand new Top Gear Alternative Highway Code comes in. Top Gear's Alternative Highway Code will show you how to bring the ambitious but rubbish philosophies of the world's most popular TV programme to your driving, containing advice on general motoring, as well as specific tips on how to deal with common eventualities like a rapidly sinking amphibious camper van, a caravan airship that's just crashed into a small bush, or a stupid home-made limousine that's snapped in half while transporting a top celebrity to an awards ceremony. Road users should not leave home without it.
