Story-Based Inquiry: A Manual for Investigative Journalists

Common Sense

The era of Reconstruction followed the long, bloody Civil War, and became one of the most important in the nation's history. It set guidelines for race relations and the federal government's involvement in them. From black codes to voting rights for black men, Reconstruction was an active, but contentious period. Documents such as amendments to the Constitution and speeches from the nation's leaders are examined along with text that provides the necessary context to fully understand the volatile issues debated. This fully illustrated volume highlights the people and their works with a clear and authoritative voice.

The Cuban Missile Crisis

Rosenfeld argues that farm women have rarely been identified as productive farm workers and that they continue to be seen only as mothers and homemakers. She shows that in addition to performing a wide range of farm work, these women in fact help ensure the farm's economic survival by contributing wages from outside employment. She raises questions about government policy and stresses the need for study in both industrialized and development societies. A UNC Press Enduring Edition -- UNC Press Enduring Editions use the latest in digital technology to make available again books from our

distinguished backlist that were previously out of print. These editions are published unaltered from the original, and are presented in affordable paperback formats, bringing readers both historical and cultural value.

American History: Selected topics in cultural, social, and economic history

The Rape Of Nanking

Research Methods and Design in Sport Management

This book is an introduction to the conventions of writing with sources at the college level. Some readers will have been trained in writing with sources before coming to college; others will have had little or no training. Writing With Sources is addressed to both groups. Without a grasp of this information you risk taking valuable time away from the students creative process of writing and in certain circumstances could face disciplinary action. Even if you believe you already understand when and how to cite sources, you should compare your understanding with the instructions in this book.

Techniques of Historical Research and Writing

This book showcases hot topics in literacy, providing teachers with practices for literacy improvement. The international scholars which comprise the author line-up for this edited collection describe the evidence-based research findings from their research in K-12 schools to demonstrate how literacy success is fostered across the globe.

Methodology and Method in History (RLE Accounting)

American History

Term Paper Resource Guide to Latino History

This bibliography provides the reader with a comprehensive reference tool that will enhance understanding of

methodological issues and enable the user to employ research methods appropriate to their subject of study. It also provides accounting historians a comprehensive data base for the development of papers addressing methodological issues in an accounting history context. Access to this type of resource is particularly crucial to the development of accounting history research since the number of papers dealing with methodological issues published in accounting history literature is very small. Hence the references in this bibliography are drawn from the literature of general history, economic and business history, legal and social history and philosophy. The scope and range of its contents are broad - references are taken from texts as well as papers published in over 450 journals.

Are Prisons Obsolete?

By providing detailed analyses of Civil War primary sources, this book will help readers to understand the history of the bloodiest of all American conflicts. • Provides in-depth documentary coverage of all key aspects of the American Civil War, providing students with a foundation for understanding its continued significance to the United States • Features primary sources from the most significant battles and leaders of the conflict • Demonstrates the impact of the war upon civilians on both the home front and the battlefields where civilians were confronted by invasion and siege • Examines the impact of the war upon society as a whole, especially through the Emancipation Proclamation

The Little Brown Guide to Writing Research Papers

This text helps students get beyond merely compiling dates and facts; it teaches them how to incorporate their own ideas into their papers and to tell a story about history that interests them and their peers. Covering brief essays and the documented resource paper, the text explores the writing and researching processes, different modes of historical writing (including argument), and offers guidelines for improving style as well as documenting sources. --From publisher's description.

The President's Report to the Board of Regents for the Academic Year Financial Statement for the Fiscal Year

Papers presented at a conference session held in New Orleans in December 1986, under the joint sponsorship of the American Economic Association and the Econometric Society. Includes index. Includes bibliographical references (p. 343-346).

The University of Virginia Record

The thirty papers published here record the proceedings of the Third International Conference on the Military Orders. The principal focus on this occasion was the Hospital of St John, but the Templars, Teutonic Knights and other military orders are dealt with too. Many of the papers relate to provincial life, along with contributions on historiography, the papacy, cultural history, and religious life.

A Short Guide to Writing about History

Provides guidelines and examples for handling research, outlining, spelling, punctuation, formatting, and documentation.

The Long Day

UCSF General Catalog

This book first explains the purpose and value of the research writing assignment and then guides students through each step of the research writing process.

Mapping Out the Research-policy Matrix

Presents a history of the Negro Leagues, from their inception to the integration of black players into Major League Baseball to the eventual demise of the league.

Writing an A+ Research Paper: A Roadmap for Beginning and Experienced Writers

"How much of our fate is tied to the status of our parents and grandparents? How much does this influence our children? More than we wish to believe! While it has been argued that rigid class structures have eroded in favor of greater social equality, *The Son Also Rises* proves that movement on the social ladder has changed little over eight centuries. Using a novel technique -- tracking family names over generations to measure social mobility across countries and periods -- renowned economic historian Gregory Clark reveals that mobility rates are lower than conventionally estimated, do not vary across societies, and are resistant to social policies. The good news is that these patterns are driven by strong inheritance of abilities and lineage does not beget unwarranted advantage. The bad news is that much of our fate is predictable from lineage. Clark argues that since a greater part of our place in the world is predetermined, we must avoid creating winner-

take-all societies."--Jacket.

Personal Papers in the United States Air Force Historical Research Center

Research Methods and Design in Sport Management explains research design, implementation, analysis, and assessment criteria with a focus on specific procedures unique to the discipline of sport management. The text is an invaluable resource for students and practitioners in sport management because it focuses on applied research for organizational purposes and the qualitative and quantitative methodologies pertinent to the field of sport management. Organized in four parts, Research Methods and Design in Sport Management begins with an introduction to concepts in sport management research and a discussion of the ethical issues associated with research projects. The text outlines the steps to the research process, making it an easy-to-use guide for professionals undertaking a research project as well as students writing major term papers, theses, or dissertations. Analysis of research design with discussion of specific methods used in qualitative, quantitative, and mixed-methods research helps readers to determine and design the most appropriate research for their specific needs. This text teaches readers the following concepts and skills:

- How to conduct a thorough literature review
- Theoretical and conceptual frameworks to guide the research process
- How to develop appropriate research questions and hypotheses
- Techniques for conducting qualitative, quantitative, and mixed-methods research
- Methods for analyzing data and reporting results

Multiple special elements in each chapter, including learning objectives, summaries, suggested advanced readings, and highlight boxes, guide readers through challenging concepts. A chapter dedicated to legal research in sport management provides a nonintimidating discussion of the unique elements evident in sport law research, such as legal precedence, case briefing, and special writing elements. Examples of published research in sport management illustrate ways in which various methodological tools and techniques can be used in answering research questions. Research in Action sections present excerpts from the Journal of Sport Management, which highlight research components mentioned in the text and assist students in learning how to read and evaluate research. In addition, all research examples provided throughout the text are specific to sport management, considering both sport industry settings and academic environments. Research Methods and Design in Sport Management offers readers the tools to engage in the broad spectrum of research opportunities in the growing discipline of sport management. As accreditation in sport management becomes more prevalent, Research Methods and Design in Sport Management can assist students in gaining the knowledge and skills they need in order to compete in the job market and to contribute to their future careers. For professionals, the text offers tools to ensure the research they conduct and consume can accurately inform strategic business decisions.

A Primary Source Investigation of Reconstruction

Americans have always put the past to political ends. The Union laid claim to the Revolution--so did the Confederacy. Civil

rights leaders said they were the true sons of liberty--so did Southern segregationists. This book tells the story of the centuries-long struggle over the meaning of the nation's founding, including the battle waged by the Tea Party, Glenn Beck, Sarah Palin, and evangelical Christians to "take back America." Jill Lepore, Harvard historian and New Yorker staff writer, offers a careful and concerned look at American history according to the far right, from the "rant heard round the world," which launched the Tea Party, to the Texas School Board's adoption of a social-studies curriculum that teaches that the United States was established as a Christian nation. Along the way, she provides rare insight into the eighteenth-century struggle for independence--a history of the Revolution, from the archives. Lepore traces the roots of the far right's reactionary history to the bicentennial in the 1970s, when no one could agree on what story a divided nation should tell about its unruly beginnings. Behind the Tea Party's Revolution, she argues, lies a nostalgic and even heartbreaking yearning for an imagined past--a time less troubled by ambiguity, strife, and uncertainty--a yearning for an America that never was. *The Whites of Their Eyes* reveals that the far right has embraced a narrative about America's founding that is not only a fable but is also, finally, a variety of fundamentalism--anti-intellectual, antihistorical, and dangerously antipluralist. In a new afterword, Lepore addresses both the recent shift in Tea Party rhetoric from the Revolution to the Constitution and the diminished role of scholars as political commentators over the last half century of public debate.

The Negro Leagues, 1869-1960

Social science research provides not only abstract, conceptual knowledge about society but also concrete, instrumental knowledge. It enables us to take action to recompose the world we live in. However, this book rejects narrow and simplistic conceptions of research use and its impact on policy-making, to embrace a more complex approach to seeing and dealing with social science. In the paradigm of "evidence-based policy", "evidence" is understood in its broad sense as information that helps form policies. Nonetheless, within current practices and discourse, it is not clear what "information" is, what is really meant by "evidence", and how it can be obtained objectively. The book draws on papers presented at the International Forum on the Social Science-Policy Nexus, where experts examined current practices and problems in areas such as social policy, migration, urban policies and globalisation. The Forum set a precedent in terms of dialogue between researchers and policy-makers. The authors contribute to enriching and elucidating the most common conceptualisations of the research-policy nexus. They represent a rich diversity of views, although most agree that an effective strategy to enhance social science-policy linkages should be underpinned by a theoretical and methodological framework that takes into account the interplay of different social actors.

Markets in History

The Son Also Rises

The three essays that make up this volume all deal with the labyrinths of the mind, convoluted lines of reasoning that lead to eccentric and/or dangerous practices. The goal of the book is to present three cases of this; the Nazis brooding upon the idea of "a higher kind of man", a short, literary history of misanthropy and, traits of Jewish identity and self-understanding that often appear as antics. The methodical approach is hermeneutic, relying heavily on historical, associative and linguistic analyses. The style of writing is essayistic, more personal and generalist than what is normally found in academic papers. Rather than picking a lexical definition of the phenomenon, like a psychological account of aberrations and their root causes, the text takes the longer and more scenic route of its historical manifestations and their impact on humankind. The Nazi grail takes us from an annual celebration on a mountaintop in France to the dark outlook of the ancient Gnostics and the history of those ideas up until our day of age. The essay on misanthropy, from the ancient Greeks to the sociopath predator we all know today, discusses the hatred of humankind as it inevitably adapts to the changing discourses throughout history. The investigation into the genesis and culture of the Jewish Nation, as in their manifest identity, highlights their notion of being a chosen people. An epilogue debunks some mainstream ideas about "mind" and, with that, "labyrinth", as analyzed in this book.

Historical Perspectives on East Asian Science, Technology, and Medicine

Teenagers make up less than 9 percent of Canadas population of about 35 million. Although Canada has ten provinces, two-thirds of teens live in either Quebec or Ontario. Whether they live in cities or rural areas, these young people are growing up in a country that has two national languages, French and English, welcomes immigrants, is socially tolerant, and places a lot of emphasis on their education, independence, and happiness. Featured is an overview of the country, as well as insights into how Canadas youth experience home and family, education and work, social life, and more.

The Landscape of History

Seminar paper from the year 2017 in the subject History - Basics, grade: 1, course: Cultural History, language: English, abstract: This paper aims at the task a historian has to do before publishing a scientific paper. All writing assignments are intended to be read, and the intended audience should always determine what is written. History is no different. Any account, report, or other piece of historical writing is intended to take effect on someone at some time. It must consequently meet someone's demands. Those demands can for convenience be summed up in a pair of questions: Is the account true, reliable, complete? Is it clear, orderly, easy to grasp and remember? All the devices and methods that the researcher combines under the name of technique exist to satisfy these inescapable requirements. An understanding of this

technique comprises the steps taken in the process of writing history and the guiding principle albeit not codified in a single document. It therefore suggests that the task before a Historian is a big one, which starts with the conception of his subject idea and ends when the last word has been spelt out. On whichever theme a historical research seeks to address it is usually based on primary sources and a thorough reading of secondary sources. The available materials are the huge mass of words bearing on innumerable topics and subtopics within the subject. Whenever possible research should be traced back to the primary sources. Primary sources are the texts nearest to any subject of investigation; secondary sources are always written about primary sources. The most common primary sources are written documents. But primary sources can also include photographs, paintings, sculpture, architecture, oral interviews, statistical tables, and even geography. A thorough reading of secondary sources will equip the researcher with a sense of interpretation. Needful is it to say that one should not rely upon one secondary source, but to always incorpo

The Information-Literate Historian

This resource guide to 100 key events in Latino history provides students, librarians, and scholars with hundreds of original and compelling term paper ideas and the key print and electronic sources needed for research. • Presents 100 historical events organized in chronological order, beginning with the founding of the California Missions in 1769 and culminating with Justice Sonia Sotomayor's confirmation to the U.S. Supreme Court • Each of the 100 events offers annotated resources, including primary, secondary, web, and multimedia sources • Contains a comprehensive index highlighting connections between key historical events and public figures

The Whites of Their Eyes

Winner of the Bancroft Prize *The Minutemen and Their World*, first published in 1976, is reissued now in a twenty-fifth anniversary edition with a new Foreword by Alan Taylor and a new Afterword by the author. On April 19, 1775, the American Revolution began at the Old North Bridge in Concord, Massachusetts. The "shot heard round the world" catapulted this sleepy New England town into the midst of revolutionary fervor, and Concord went on to become the intellectual capital of the new republic. The town--future home to Emerson, Thoreau, and Hawthorne--soon came to symbolize devotion to liberty, intellectual freedom, and the stubborn integrity of rural life. In *The Minutemen and Their World*, Robert Gross has written a remarkably subtle and detailed reconstruction of the lives and community of this special place, and a compelling interpretation of the American Revolution as a social movement.

American Civil War: Interpreting Conflict through Primary Documents [2 volumes]

What is history and why should we study it? Is there such a thing as historical truth? Is history a science? One of the most accomplished historians at work today, John Lewis Gaddis, answers these and other questions in this short, witty, and humane book. *The Landscape of History* provides a searching look at the historian's craft, as well as a strong argument for why a historical consciousness should matter to us today. Gaddis points out that while the historical method is more sophisticated than most historians realize, it doesn't require unintelligible prose to explain. Like cartographers mapping landscapes, historians represent what they can never replicate. In doing so, they combine the techniques of artists, geologists, paleontologists, and evolutionary biologists. Their approaches parallel, in intriguing ways, the new sciences of chaos, complexity, and criticality. They don't much resemble what happens in the social sciences, where the pursuit of independent variables functioning with static systems seems increasingly divorced from the world as we know it. So who's really being scientific and who isn't? This question too is one Gaddis explores, in ways that are certain to spark interdisciplinary controversy. Written in the tradition of Marc Bloch and E.H. Carr, *The Landscape of History* is at once an engaging introduction to the historical method for beginners, a powerful reaffirmation of it for practitioners, a startling challenge to social scientists, and an effective skewering of post-modernist claims that we can't know anything at all about the past. It will be essential reading for anyone who reads, writes, teaches, or cares about history.

MLA Handbook for Writers of Research Papers

The New York Times bestselling account of one of history's most brutal -- and forgotten -- massacres, when the Japanese army destroyed China's capital city on the eve of World War II. In December 1937, one of the most horrific atrocities in the long annals of wartime barbarity occurred. The Japanese army swept into the ancient city of Nanking (what was then the capital of China), and within weeks, more than 300,000 Chinese civilians and soldiers were systematically raped, tortured, and murdered. In this seminal work, Iris Chang, whose own grandparents barely escaped the massacre, tells this history from three perspectives: that of the Japanese soldiers, that of the Chinese, and that of a group of Westerners who refused to abandon the city and created a safety zone, which saved almost 300,000 Chinese. Drawing on extensive interviews with survivors and documents brought to light for the first time, Iris Chang's classic book is the definitive history of this horrifying episode. "Chang vividly, methodically, records what happened, piecing together the abundant eyewitness reports into an undeniable tapestry of horror." - Adam Hochschild, *Salon*

Growing Up in Canada

Farm Women

The Long Day is a wonderfully readable personal narrative of the trials and tribulations of an "unskilled, friendless, almost penniless girl of eighteen, utterly alone in the world" who arrives in New York City in 1905 to earn her livelihood. The book reveals much about the lives of working women in early twentieth-century urban America- the sort of jobs available to women, the ethnic and demographic makeup of the female labor force, the harshness of the conditions, the less-than-satisfactory living arrangements, the physically demanding nature of the work, and the long working hours.

The Nazi Grail

The Information-Literate Historian is the only book specifically designed to teach today's history students how to successfully select and use sources--primary, secondary, and electronic--to carry out and present their research. Expanded and updated, the third edition of The Information-Literate Historian continues to be an indispensable reference for historians, students, and other readers doing history research.

The Minutemen and Their World

The Historian's Toolbox introduces students to the theory, craft, and methods of history and equips them with a series of tools to research and understand the past. Written in an engaging and entertaining style, and filled with fascinating examples, this best-selling "how to" book opens up an exciting world behind historical research and writing. This fourth edition expands the repertory of tools and techniques available to students entering the workshop of history. These include materials on the Kennedy assassination, the litigation of Van Gogh's Night Café, local town histories, contemporary history, Twitter, and the contemplation of the end of history as well as the Sixth Extinction in a new epilogue. The book demonstrates the relevance and expanding possibilities of the study of history in our cacophonous information age of tweetstorms and fake news; it emphasises the increasing value of critical thinking, facts and evidence in the face of political lies and conspiracy theories. Material added to the fourth edition will resonate with a new generation of computer-literate readers in the face of climate change. The Historian's Toolbox continues to be a seminal text for supporting students throughout their study of history and an accessible teaching tool for instructors.

The Historian's Toolbox

Study guide to the first volume of a survey of the history of the USA. Balancing the social and cultural issues with the political and diplomatic, the book includes historiographical debates, new attention to native American history and revised sections on women's history.

Battle Tactics of the Civil War

What's Hot in Literacy

A volume of selected papers from the Ninth International Conference on the History of Science in East Asia (ICHSEA). It addresses diverse topics in astronomy, traditional Chinese medicine, the history of mathematics, and Western science in East Asia.

Illinois History

Writing with Sources (2nd Edition)

Addressed to the Inhabitants of America, on the Following Interesting Subjects, viz.: I. Of the Origin and Design of Government in General, with Concise Remarks on the English Constitution. II. Of Monarchy and Hereditary Succession. III. Thoughts on the Present State of American Affairs. IV. Of the Present Ability of America, with some Miscellaneous Reflections

The Military Orders: History and heritage

With her characteristic brilliance, grace and radical audacity, Angela Y. Davis has put the case for the latest abolition movement in American life: the abolition of the prison. As she quite correctly notes, American life is replete with abolition movements, and when they were engaged in these struggles, their chances of success seemed almost unthinkable. For generations of Americans, the abolition of slavery was sheerest illusion. Similarly, the entrenched system of racial segregation seemed to last forever, and generations lived in the midst of the practice, with few predicting its passage from custom. The brutal, exploitative (dare one say lucrative?) convict-lease system that succeeded formal slavery reaped millions to southern jurisdictions (and untold miseries for tens of thousands of men, and women). Few predicted its passing from the American penal landscape. Davis expertly argues how social movements transformed these social, political and cultural institutions, and made such practices untenable. In *Are Prisons Obsolete?*, Professor Davis seeks to illustrate that the time for the prison is approaching an end. She argues forthrightly for "decarceration", and argues for the transformation of the society as a whole.

Story-Based Inquiry: A Manual for Investigative Journalists

Analyzes the events, weapons, and strategies of the Civil War and argues that the introduction of modern weaponry did not have significant effect on the outcome or the conduct of the war
