When it comes to their personal transportation, today's youth have shunned the large, heavy performance cars of their parents' generation and instead embraced what has become known as the "sport compact"--smaller, lightweight, modern sports cars of predominantly Japanese manufacture. These cars respond well to performance modifications due to their light weight and technology-laden, high-revving engines. And by far, the most sought-after and modified cars are the Hondas and Acuras of the mid-'80s to the present. An extremely popular method of improving vehicle performance is a process known as engine swapping. Engine swapping consists of removing a more powerful engine from a better-equipped or more modern vehicle and installing it into your own. It is one of the most efficient and affordable methods of improving your vehicle's performance. This book covers in detail all the most popular performance swaps for Honda Civic, Accord, and Prelude as well as the Acura Integra. It includes vital information on electrics, fit, and drivetrain compatibility, design considerations, step-by-step instruction, and costs. This book is must-have for the Honda enthusiast.

## **Toyota Truck & Land Cruiser Owner's Bible**

"And everywhere the Humans went, they found life " This dazzling future history, winner of the 2000 Philip K. Dick Award, is the most ambitious and exciting since Asimov's classic Foundation saga. It tells the story of Humankind -- all the way to the end of the Universe itself. Here, in luminous and vivid narratives spanning five million years, are the first Poole wormholes spanning the solar system; the conquest of Human planets by Squeem; GUTships that outrace light; the back-time invasion of the Qax: the mystery and legacy of the Xeelee, and their artifacts as large as small galaxies; photino birds and Dark Matter; and the Ring, where Ghost, Human, and Xeelee contemplate the awesome end of Time. Stephen Baxter is the most acclaimed and accomplished of a brilliant new generation of authors who are expanding the vision of science fiction and taking it to a new golden age.

## **Lexus**

In a bold bid to enter the prestigious luxury car market, Toyota launched its Lexus marque in 1989 with the LS400. Impeccable attention to detail, advanced engineering, sourcing of first quality materials from around the world and meticulous build quality ensured that cars wearing the Lexus badge could compete directly with the established products of Mercedes-Benz, BMW and Jaguar. Motoring journalists around the world were quick to confirm the inherent quality of

the Lexus, allowing the new marque to become established amazingly quickly and to make serious inroads into the sales territories of other prestige brands. This book covers the complete year-by-year development of the Lexus line, including the equivalent models in Japan. Written by an acknowledged Toyota expert with the full co-operation of the company and its many subsidiaries worldwide, this is the definitive history of the marque.

Ted Simon is the author of the classic travel book JUPITER'S TRAVELS. It documents his four-year journey round the world by motorbike, travelling through Europe, Africa, South and North America, and Asia. A number one bestseller in the late 1970s, it is still regarded as one of the greatest motorcycle books - indeed, one of the greatest travel books - ever written. In 2001, at the age of 69, Ted Simon decided to retrace his journey, and DREAMING OF JUPITER is the result. It took him two and a half years - during which time he revisited all the countries he had travelled through in the 1970s. He found much had changed, and he reflects upon the increased poverty, political upheavals, environmental issues and indeed the changes in himself. But ultimately, DREAMING OF JUPITER is a hugely inspiring read with a positive message at its heart - that even at the age of 70 you can still set off on an adventure, and be surprised and excited by what life throws at you along the way.

#### **First Overland**

Why Not? After all, no-one had ever done it before. It would be one of the longest of all overland journeys – half way round the world, from the English Channel to Singapore. They knew that several expeditions had already tried it. Some had got as far as the deserts of Persia; a few had even reached the plains of India. But no one had managed to go on from there: over the jungle clad mountains of Assam and across northern Burma to Thailand and Malaya. Over the last 3,000 miles it seemed there were 'just too many rivers and too few roads'. But no-one really knew ... In fact, their problems began much earlier than that. As mere undergraduates, they had no money, no cars, nothing. But with a cool audacity, which was to become characteristic, they set to work – wheedling and cajoling. First, they coaxed the BBC to come up with some film for a possible TV series. They then gently persuaded the manufacturers to lend them two factory-fresh Land Rovers. A publisher was even sweet-talked into giving them an advance on a book. By the time they were ready to go, their sponsors (more than 80 of them) ranged from whiskey distillers to the makers of collapsible buckets. In late 1955, they set off. Seven months and 12,000 miles later, two very weary Land Rovers, escorted by police outriders, rolled into Singapore – to flash bulbs and champagne. Now, fifty years on, their book, 'First Overland', is republished – with a foreword by Sir David Attenborough. After all, it was he who gave them that film.

### **How to Tune and Modify Engine Management Systems**

A behind-the-scenes look at Lexus's surprising twenty-year success story—in a revised new edition In the 1980s, German brands BMW and Mercedes-Benz dominated the luxury car market and had little reason to fear competition from Japan. But in 1989, Toyota entered the market with the Lexus LS 400, a car that could compete with the Germans in every category but price—it was US\$30,000 cheaper. Within two years, Lexus had overtaken Mercedes-Benz in the United States and made a stunning success of Toyota's brave foray into the global luxury market. Lexus: The Relentless Pursuit reveals why Toyota decided to take on the German automakers and how the new brand won praise and success for its unparalleled quality, unforgettable advertising, and unprecedented customer service. From the first boardroom planning session to Lexus's entry into the mega-luxury supercar market, this is the complete and compelling story of one of the world's most admired brands. Includes a new Foreword by legendary designer Erwin Lui, an Afterword with updates since the first edition, and a new Coda by leading Japanese automotive journalist Hisao Inoue Covers the racetrack triumph—and tragedy—behind the new US\$375,000 Lexus LFA supercar Offers important business lessons for brand managers and executives For car enthusiasts, business leaders, and anyone interested in branding and marketing, Lexus: The

Relentless Pursuit offers an amazing story of excellence and innovation in the automotive industry.

### **Japan 21st**

This study chronicles the success of the Japanese car in America. Starting with Japan's first gasoline-powered car, the Takuri, it examines early Japanese inventors and automotive conditions in Japan; the arrival of Japanese cars in California in the late 1950s; consumer and media reactions to Japanese manufacturers; what obstacles they faced; initial sales; and how the cars gained popularity through shrewd marketing. Toyota, Honda, Datsun (Nissan), Mazda, Subaru, Isuzu, and Mitsubishi are profiled individually from their origins through the present. An examination follows of the forced cooperation between American and Japanese manufacturers, the present state of the industry in America, and the possible future of this union, most importantly in the race for a more environmentally-sound vehicle.

### **Between Imitation and Innovation**

Recent years have seen intense debates among management and academics on the rise of 'lean production' and 'Japanization'. Some authors have stressed the 'universal' impact of new forms of work organization and 'best practice' while others have questioned the limits of convergence, stressed the weight of national contexts or 'societal effects', or highlighted the evolutionary effects of unpredictability in the external environment. The international automobile industry

has been a focus for much of this debate and this book, written by a team of leading international researchers in the field, uses this industry to examine in detail the actual practice of the transfer and adaptation of productive models and the trajectories of innovation, compromise, and failure that can result. Case studies cover in detail the Japanese transplant experience in North America, and the global experience of hybrid production systems in Europe, Latin America, and Asia. The book contributes to theoretical discussions about the transfer, adaptation, or convergence of productive models. In particular, the authors argue that direct transplantation or imitation of these models is rarely feasible or even desirable. Systems cannot be transferred without being significantly reshaped. Instead, the book focuses on the process of 'hybridization', the complex interaction of productive models with national and societal effects. Hybridization, it is argued, is inevitable. But this should be seen not simply as a process of compromise and retreat but also as an important dynamic of innovation and learning. This book is from the French-based international research network GERPISA (Groupe d'étude de recherche permanent sur l'industrie et les salaires de l'automobile). See related titles below.
