### **Roads in Botswana**

This book discusses human factors research directed towards realizing and assessing sustainability in the built environment. It reports on advanced engineering methods for sustainable infrastructure design, as well as on assessments of the efficient methods and the social, environmental, and economic impact of various designs and projects. The book covers a range of topics, including the use of recycled materials in architecture, ergonomics in buildings and public design, sustainable design for smart cities, design for the aging population, industrial design, human scale in architecture, and many more. Based on the AHFE 2018 International Conference on Human Factors, Sustainable Urban Planning and Infrastructure, held on July 21–25, 2018, in Orlando, Florida, USA, it offers various perspectives on sustainability and ergonomics. As such, it is a valuable reference resource for designers, urban engineers, architects, infrastructure professionals, public infrastructure owners, policy makers, government engineers and planners, as well as operations managers and academics active in urban and infrastructure

research.

## **Guidelines for Human Settlement Planning and Design**

"The Law of South Africa is an encyclopedic collection of South African law. It is the only work of its kind in South Africa. This reference work contains various topics on South African law and contains over 162 titles. Lawsa is used as a starting point for legal research since it covers the law as it stands and makes reference to relevant legislation, case law, text books and journal articles. Written by a team of eminent jurists, academics and practitioners, this publication is widely used by judges, advocates, attorneys and legal academics. Now in its Third Edition, with new titles covering new legislation. Lawsa is kept up to date by Current Law and the Lawsa Cumulative Supplement. The current set comprises of the 2nd and 3rd editions, with new volumes currently being published."--

## **South African national bibliography**

What challenges do pedestrians and cyclists face in cities of the developing world? What opportunities do these cities have to provide for walking and cycling? Based on in-depth research conducted in Cape Town (South Africa), Dar es Salaam (Tanzania) and Nairobi (Kenya), this book explores these questions by presenting work on walking and cycling travel behaviour, the status of road safety in these cities, as well as an analysis of the infrastructure for walking and cycling, and the workings of the institutions responsible for planning for these modes. The book also presents case studies relating to particular opportunities and challenges, such as the development and evaluation of 'walking bus' interventions, and the opportunities micro-simulation of pedestrian interventions offers within a data-scarce environment. Non-motorized Transport Integration into Urban Transport Planning in Africa demonstrates that transport and urban planning remains situated in a logic of automobile-dependent transport planning and global city

development. This logic of practice does not pay adequate attention to walking and cycling. It argues that a significant shift in both policy as well as political commitment is needed so as to prioritize walking and cycling as strategies for sustainable transport policy in urban Africa. This book will be a key text for practitioners and policy makers working in planning, transport policy and urban development in Africa, as well as students and scholars of African studies, development studies, urban geography, transport studies and sustainable development.

### **Behavior of Calcretes as Flexible Pavement Materials in Southern Africa**

An annual biographical dictionary, with which is incorporated "Men and women of the time."

### **The Law of South Africa**

For the last seven decades, urban settlement policy worldwide has been increasingly dominated by modernist precepts and by urban decisions made in discipline-specific 'silos'. The urban management consequences have been invariably negative, with increasing sprawl, fragmentation and separation resulting

in a wide range of environmental, social and economic problems. This book explores the role of movement in a more integrated approach to urban settlement, and how thinking, policies and actions need to change. South Africa is used as a particularly good case study, since patterns of sprawl, fragmentation and separation have been exacerbated by apartheid, while recent legislation has demanded a reversal of these tendencies.

#### **M.H.R.A.**

This book examines wayfinding from a broad public health perspective and articulates what needs to be done to create better wayfinding for all people regardless of age, ability, or mode of transportation. Addressing both science and the human experience, the book brings together a group of international experts to examine community wayfinding from a variety of viewpoints. It first presents a critical foundation for understanding wayfinding from an individual perspective. Next, it describes relevant design principles and practices by drawing upon architecture, environmental graphic design, universal design (UD), and urban planning. The book then goes on to examine wayfinding tools and innovative technologies ranging from maps to apps to complex systems. In addition, coverage includes case studies, lessons from wayfinding improvement initiatives, and recommendations for future research, practice, and policy. Overall, the book focuses on the economic and commercial benefits of good wayfinding, its potential

impact on the health of individuals and communities, as well as strategies for the journey ahead. It will appeal to numerous professionals across many disciplines from architecture and cartography to public health and urban planning. Additionally, the book can help advance a dialogue among those interested in enhancing the livability of their communities.

### **Rethinking Urban Transport After Modernism**

"At a strategic time in South Africa's history, the Christian history which is absolutely basic to all developments, is presented in a comprehensive and objective way. Too little attention is given to the influence of religion in socio-political accounts. This is a creative and much-needed contribution to scholarship and general knowledge. . . . An outstanding work."--Dean S. Gilliland, Fuller Theological Seminary

### **The Sphere**

The impact of colonial dispossession and the subsequent social and political ramifications place a unique burden on governments having to establish equitable means of addressing previous injustices. A Common Hunger considers the efforts by both of these countries to reconcile the damage left by colonial oppression, in part, looking back with a critical eye, but also pointing the way toward a solution that will satisfy the common need for human dignity.
