### MCQs in Plastic Surgery

Examines the health care system in the Kurdistan Region of Iraq, with an emphasis on primary care, and discusses what strategies can be pursued to move toward a more effective and higher-quality health care system.

### Saunders Comprehensive Review for NCLEX-RN

"The Guide, in Part I, begins with a brief description of generalized CEA and how it relates to the two questions raised above. It then considers issues relating to study design, estimating costs, assessing health effects, discounting, uncertainty and sensitivity analysis, and reporting results. Detailed discussions of selected technical issues and applications are provided in a series of background papers, originally published in journals, but included in this book for easy reference in Part II." (from the back cover).

### **Clinical Aspects of Dental Materials**

The adoption by WHO's Member States of the Global Code of Practice in the International Recruitment of Health Personnel, and the implementation of it by so many countries, represent two of the biggest steps in recent years towards solving the shortage of health-care workers around the world. The countries' response has been a momentous achievement. Now, a third big step is being taken with the publication of this book. It underlines WHO's unwavering commitment to supporting the implementation of the Code and provides a wide range of detailed examples from the countries themselves of how they are tackling the many complex issues involved. It provides not just numerous insights into progress but also gives other countries valuable guidance and recommendations on how they, too, can implement the Code. Countries are encouraged to learn from the shared experiences, domestic solutions and multi-lateral cooperation described in this book, and move ahead to support and advance the Code's aspirational principles. By doing so, they also strengthen the campaign towards Universal Health Care - a campaign that requires innovative solutions to the health workforce shortage in order to be successful. The crux of the Code is the development of human resources for health through all aspects of education, improved retention and fair recruitment practices while encouraging technical collaboration and financial support. WHO is playing a leading role in these initiatives and stands ready to assist all its Member States in implementing the Code. We strongly recommend this book to health policy-makers and decision-takers in governments, nongovernmental organizations and other partners and stakeholders, including civil society. They will find it an indispensable guide to a better future for health-care personnel and the people they serve.

## **Organon of the Art of Healing**

In their desperate quest for conception, thousands of infertile couples from around the world travel to the global in vitro fertilization (IVF) hub of Dubai. In *Cosmopolitan Conceptions* Marcia C. Inhorn highlights the stories of 220 "reprotravelers" from fifty countries who sought treatment at a "cosmopolitan" IVF clinic in Dubai. These couples cannot find safe, affordable, legal, and effective IVF services in their home countries, and their stories offer a window into the world of infertility—a world that is replete with pain, fear, danger, frustration, and financial burden. These hardships dispel any notion that traveling for IVF treatment is reproductive tourism. The magnitude of reprotravel to Dubai, Inhorn contends, reflects the failure of countries to meet their citizens' reproductive needs, which suggests the necessity of creating new forms of activism that advocate for developing alternate pathways to parenthood, reducing preventable forms of infertility, supporting the infertile, and making safe and low-cost IVF available worldwide.

## **Examination Review for Ultrasound**

An invaluable self-assessment tool for emergency medicine trainees in Australasia. *Emergency Medicine MCQs* is an essential resource for Australasia's emergency medicine trainees. A practical self-assessment tool, the book assists trainees as they expand and refine their knowledge of emergency medicine, and will ultimately help them pass the Australasian Emergency Medicine Fellowship examination (FACEM). The multiple-choice questions in *Emergency Medicine MCQs* cover both the core and non-core areas in the Australasian Emergency Medicine Fellowship. Using this text, trainees can revise alone or with their peers to identify the areas in which they need further development. The curriculum is divided into three main areas where trainees require expert level of knowledge, high level of knowledge and general level of knowledge. It covers important clinical problems encountered in everyday emergency medicine practice – from cardiovascular emergencies through to obstetric and gynaecology emergencies, disaster management and toxicology. As well as being ideal for emergency medicine trainees qualifying through AECM, the book is a useful resource for GPs taking the GEM qualification through ACEM and JMOs 'on call'. Plus, this emergency medicine text is accompanied by an app – a separate product containing 180 randomised multiple-choice questions on all the topics within the book.

## **Guidelines for Drinking-water Quality**

In this analysis of the global workforce, the Joint Learning Initiative, a consortium of more than 100 health leaders, proposes

that mobilization and strengthening of human resources for health, neglected yet critical, is central to combating health crises in some of the world's poorest countries and for building sustainable health systems everywhere. Worker shortage, skill mix imbalance, maldistribution, negative work environments, and weak knowledge bases challenge nearly all countries. Especially in the poorest countries, the workforce is under assault by a triple threat of HIV/AIDS, out-migration, and inadequate investment. Effective country strategies should be launched and backed by international reinforcement. These include urgently mobilizing one million more health workers for Africa, and focusing efforts on the unremunerated community-level health workers, the majority of whom are women. Ultimately, the crisis in human resources is a shared problem requiring shared responsibility for cooperative action. Alliances for action are recommended to strengthen the performance of all actors while expanding space and energy for new ones.
