Marketing is shrouded in arcane mystery and buzzwords. It frightens many and bewilders others. Yet every business, from the hand-car-wash by the side of the road, to the world's most famous brands, engage in marketing every single day. This is an essential, reliable, speedy and up to date guide to the most robust and important concepts in marketing. This book shows you how to understand and do marketing without having to study a degree or a diploma in it. Along the way it shows you what has been learned about marketing over the centuries, what experts can teach us that we can use ourselves, how marketing has changed in our new 'digital' world, and how to avoid classic mistakes. In short, this is all you need to know about marketing. Introduction - Marketing: the world's second oldest business activity Chapter 1 - The Product. Chapter 2 - The Marketing Strategy and

Ward's Automotive Yearbook 2005

Knowledge is considered as the most important asset in our modern society. It has now penetrated all facets of computing practice: from the rise of knowledge management to the Semantic Web and from the blog culture to the knowledge economy. This penetration has made proper knowledge engineering a most - quired feature. This volume contains the papers presented at the 16th International Conference on Knowledge Engineering and Knowledge Management (EKAW 2008) held in Acitrezza, Sicily, Italy, September 29 to October 3 2008. EKAW 2008 is concerned with all aspects of eliciting, acquiring, modelling and managing knowledge, and their role in the construction of knowledge-intensive systems and services for the Semantic Web, knowledge management, e-business, natural language processing, intelligent integration information, etc. This year we paid special attention to the topic of “knowledge patterns” that can be considered as good practice or models that are applied or reused throughout the knowledge engineering life cycle. Hence, beyond traditional topics of EKAW, we solicited papers that cover research on how to describe, classify, model, extract and apply knowledge patterns in the design of ontologies, applications and
