Civilization in the West

Spielvogel's Western Civilization

[This book] examines the Western tradition - those unique patterns of thought and systems of values that constitute the Western heritage. While focusing on key ideas and broad themes, the text also provides a balanced treatment of economic, political, and social history for students in Western civilization courses. The text is written with the conviction that history is not a meaningless tale. Without a knowledge of history, men and women cannot fully know themselves, for all human beings have been shaped by institutions and values inherited from the past. -Pref.

Western Civilization

The Eighth Mental Measurements Yearbook

Sources of the West is a collection of excerpts from primary source documents designed to supplement textbooks and lectures in the teaching of Western Civilization. These documents are the source material historians use to construct their accounts and interpretations of history. As they examine these source materials, students learn to think historically - to examine the ideas of others, to understand past experiences on others' terms, to recognize other points of view.

Books in Print 1993-94

The Book of the Ancient World is an account of our common heritage from the dawn of civilization to the coming of the Greeks. It is the story of how human beings began their great adventure of learning how to live; of how they have sought to satisfy the practical needs of their bodies, the questioning of their minds,

and the searching of their spirits. To this end it subordinates details of political events to the record of things that lie at the foundation of our modern civilization. Dorothy Mills had an uncanny and unique ability to write history that is interesting and at the same time based on sound scholarship. Her direct, engaging approach is valued increasingly by the many parents in our day who are looking for reliable materials for home study, as well as by many private school educators. The highly-prized six volumes of her historical works (see below) have become very scarce on the used book market, and so Dawn Chorus has undertaken to reprint them as part of its effort to offer texts ideally suited to the needs of a new generation of teachers and students. In a world where the quality of education has so deteriorated, may the reissue of this wonderful historical series shine as a beacon to a new generation of young (and not so young) scholars. Dawn Chorus publishes these five other books by Dorothy Mills: *The Book of the Ancient Greeks*; *The Book of the Ancient Romans*; *The People of Ancient Israel*; *The Middle Ages*; and *Renaissance and Reformation Times*. Dawn Chorus has also republished another outstanding, and long-out-of-print historical series perfectly suited for home or school use (and highly recommended in home-school curricula), entitled *The Picturesque Tale of Progress*, by Olive Beaupre Miller. It is available in large format (9 volumes), or smaller, double-bound format (5 volumes).

Western Civilization: The earliest civilizations through the Reformation

Nuclear Test Ban Treaty

More than three decades after its first publication, Edward Said's groundbreaking critique of the West's historical, cultural, and political perceptions of the East has become a modern classic. In this wide-ranging, intellectually vigorous study, Said traces the origins of "orientalism" to the centuries-long period during which Europe dominated the Middle and Near East and, from its position of power, defined "the orient" simply as "other than" the occident. This entrenched view continues to dominate western ideas and, because it does not allow the East to represent itself, prevents true understanding. Essential, and still eye-opening, *Orientalism* remains one of the most important books written about our divided world. From the Trade Paperback edition.
