Women's Health

While women comprise the largest segment of health workers, health consumers, and health decision-makers for their families and communities, it has often been difficult for women to make themselves heard. Women's Health focuses on women's health issues from multiple perspectives and draws upon research and practice that include both qualitative and quantitative methodologies in data collection and knowledge formation. Women's Health incorporates work that has been produced from grassroots investigations of women's health issues and addresses specific health issues, diversity issues, and a variety of issues previously unexplored. In an effort to exemplify alternative forms of knowledge collection, and the importance of inclusiveness, diversity, and realism when understanding the various facets of women's health, Women's Health also highlights the work of women whose voices may not normally be heard or recognized -- in a way that stretches beyond the traditional parameters of knowledge-sharing practices.

Communities in Action

This work covers the scope of oppressions in America. It contains a mix of short personal and theoretical essays and should be designed as an introduction to the topics at hand. The selections include writings from Cornel West, Michael Omi, Audre Lorde, Gloria Anzaldua and Michelle Fine.

Encyclopedia of Women's Health

Bodied Mindfulness

The bestselling classic that redefined our view of the relationship between beauty and female identity. In today's world, women have more power, legal recognition, and professional success than ever before. Alongside the evident progress of the women's movement, however, writer and journalist Naomi Wolf is troubled by a different kind of social control, which, she argues, may prove just as restrictive as the traditional image of homemaker and wife. It's the beauty myth, an obsession with physical perfection that traps the modern woman in an endless spiral of hope, self-consciousness, and self-hatred as she tries to fulfill society's impossible definition of "the flawless beauty."

Mothers & Motherhood

Diversity and Women's Health

Still Lifting, Still Climbing is the first volume of its kind to document African

American women's activism in the wake of the civil rights movement. Covering grassroots and national movements alike, contributors explore black women's mobilization around such areas as the black nationalist movements, the Million Man March, black feminism, anti-rape movements, mass incarceration, the U.S. Congress, welfare rights, health care, and labor organizing. Detailing the impact of post-1960s African American women's activism, they provide a much-needed update to the historical narrative. Ideal for course use, the volume includes original essays as well as primary source documents such as first-hand accounts of activism and statements of purpose. Each contributor carefully situates their topic within its historical framework, providing an accessible context for those unfamiliar with black women's history, and demonstrating that African American women's political agency does not emerge from a vacuum, but is part of a complex system of institutions, economics, and personal beliefs. This ambitious volume will be an invaluable resource on the state of contemporary African American women's activism.

Women's Health in Primary Care

A powerful study of the women's liberation movement in the U.S., from abolitionist days to the present, that demonstrates how it has always been hampered by the racist and classist biases of its leaders. From the widely revered and legendary political activist and scholar Angela Davis.

Encyclopedia of Women in Today's World

This volume describes classic and contemporary theory and research in social psychology that sheds light on how people think about health and illness, as well as their willingness to engage in health-relevant behaviors. The Editors have selected papers that serve to illustrate the reciprocal relation between advances in theory and advances in practice. The first two sections of the volume examine people's mental representations of health and health practices, and how these personal construals and implicit theories are linked to behavior. People can react to new health information in different ways - with acceptance, defensiveness, or downright ignorance. Research that can help us to understand these varied reactions is examined in Section 3. The following sections consider how classic social psychological theories and perspectives can be used to understand behavior relevant to health and illness. These include social influence, social comparison, pluralistic ignorance, social support, cognitive dissonance, message framing, and attribution theory. Finally, several articles consider links between personality characteristics and health, such as those between hostility and heart disease, and confiding traumatic experiences and immune function. The volume also contains an introductory chapter by the editors which provides a discussion of why social and personality psychologists should be interested in health and illness. Together with overviews for each section, discussion questions, and suggestions for further reading, the volume is an ideal text for advanced undergraduate and graduate

courses on health psychology. The volume is also appropriate for courses in related disciplines such as public health, nursing, health education, health communication, and other allied health sciences.

Killing the Black Body

A comprehensive collection of historical studies of mothers and motherhood, illustrating the shifting meaning of motherhood over time, the differences between mothers, and the kinds of evidence scholars use to study both the reality and the rhetoric of mothering. General themes are the social construction of motherhood, motherhood and reproduction, social and cultural settings, and public policy. Topics include maternal grief in True Story, 1920-1985, pregnancy and family limitation among Virginia gentry women, 1780-1830, the La Leche League in postwar America, mothering under slavery in the antebellum South, and the beginnings of feminist birth control ideas in the US. Paper edition (unseen), \$19.95. Annotation copyrighted by Book News, Inc., Portland, OR

Whistling Vivaldi: How Stereotypes Affect Us and What We Can Do (Issues of Our Time)

This book looks at the representation of the body in culture from a feminist

perspective. Subjects covered include bodybuilding, cosmetic surgery, and cyberculture.

Many Women Strong: A Handbook for Women Firefighters

Essays in this collection highlight the disparities in diagnosis and treatment among women because of their race, ethnicity, sexual orientation, disability, and age from both medical and women's studies perspectives.

Evaluating Women's Health Messages

Health/PAC Bulletin

The anthrax incidents following the 9/11 terrorist attacks put the spotlight on the nation's public health agencies, placing it under an unprecedented scrutiny that added new dimensions to the complex issues considered in this report. The Future of the Public's Health in the 21st Century reaffirms the vision of Healthy People 2010, and outlines a systems approach to assuring the nation's health in practice, research, and policy. This approach focuses on joining the unique resources and perspectives of diverse sectors and entities and challenges these

groups to work in a concerted, strategic way to promote and protect the public's health. Focusing on diverse partnerships as the framework for public health, the book discusses: The need for a shift from an individual to a population-based approach in practice, research, policy, and community engagement. The status of the governmental public health infrastructure and what needs to be improved, including its interface with the health care delivery system. The roles nongovernment actors, such as academia, business, local communities and the media can play in creating a healthy nation. Providing an accessible analysis, this book will be important to public health policy-makers and practitioners, business and community leaders, health advocates, educators and journalists.

Women, Health, & Healthcare

A Pulitzer Prize-winning husband-and-wife team speaks out against the oppression of women in the developing world, sharing example stories about victims and survivors who are working to raise awareness, counter abuse, and campaign for women's rights.

Women and Health in America

Reading the Women of the Bible takes up two of the most significant intellectual

and religious issues of our day: the experiences of women in a patriarchal society and the relevance of the Bible to modern life.

What Makes Women Sick

This book provides a framework and practical guidelines for managing women's health issues within the practice of physical therapy. It enables students to develop and implement customized patient care plans to deal with a broad range of disorders and health issues that either primarily affect women or manifest themselves differently in women. The book features a team of expert authors whose advice is based not only on a thorough investigation of the evidence, but also on their own firsthand experience as physical therapists specializing in women's health issues.

Readings for Diversity and Social Justice

For any woman who has experienced illness, chronic pain, or endometriosis comes an inspiring memoir advocating for recognition of women's health issues. In the fall of 2010, Abby Norman's strong dancer's body dropped forty pounds and gray hairs began to sprout from her temples. She was repeatedly hospitalized in excruciating pain, but the doctors insisted it was a urinary tract infection and sent her home

with antibiotics. Unable to get out of bed, much less attend class, Norman dropped out of college and embarked on what would become a years-long journey to discover what was wrong with her. It wasn't until she took matters into her own hands--securing a job in a hospital and educating herself over lunchtime reading in the medical library--that she found an accurate diagnosis of endometriosis. In *Ask Me About My Uterus*, Norman describes what it was like to have her pain dismissed, to be told it was all in her head, only to be taken seriously when she was accompanied by a boyfriend who confirmed that her sexual performance was, indeed, compromised. Putting her own trials into a broader historical, sociocultural, and political context, Norman shows that women's bodies have long been the battleground of a never-ending war for power, control, medical knowledge, and truth. It's time to refute the belief that being a woman is a preexisting condition.

Ask Me About My Uterus

Adds 21 new essays and drops some that appeared in the 1984 edition (first in 1978) to reflect recent scholarship and changes in orientation by historians. Adds entirely new clusters on sickness and health, early American medicine, therapeutics, the art of medicine, and public health and personal hygiene. Other discussions are updated to reflect such phenomena as the growing mortality from HIV, homicide, and suicide. No index. Annotation copyrighted by Book News, Inc., Portland, OR

Half the Sky

A powerful, thought-provoking indictment of America's continuing assault on the reproductive rights of black women ranges from the era of slavery to the welfare reform acts of the 1990s that penalize women on welfare for having babies. Reprint. 15,000 first printing.

Material Discourses of Health and Illness

“I see spirituality and social change to be integrally related to each other. I believe that liberation efforts that are supported by spiritual experiences of integration promote human dignity as well as social equality.” Bodied Mindfulness combines spiritual, social and analytical perspectives to explore topics central to women’s development: spirituality, women’s bodies, cultural constructions of women’s sexuality in language, sexual ethics, the sexual contract in politics and at work, and the relation between nature and culture. It is Tomm’s deeply held conviction that women need to bring a vital spirituality to feminist social criticism in order to resolve these issues and increase their power to promote social justice and ecological balance. Tomm embraces a vast store of knowledge from diverse sources, including Buddhist, shamanist and feminist resources. In a move away from abstract theorizing, she explicitly connects theory with realities lived by

women. Grounding theory in personal experience — her own and others — Tomm delivers a powerful and empowering account of women's spirituality. The resulting ontological transformation allows women to live deeply in the body while strengthening their relation to human and non-human matter and energy. *Bodied Mindfulness* will be of great interest to feminist scholars in all disciplines, but most particularly to those in Women's Studies and Religious Studies.

Sickness and Health in America

Women's Health

Women's Health

In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing,

poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways.

Communities in Action: Pathways to Health Equity seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

The Future of the Public's Health in the 21st Century

Reading the Women of the Bible

Technologies of the Gendered Body

Women and Positive Aging: An International Perspective presents the noted research in the fields of psychology, gerontology, and gender studies, reflecting

the increasingly popular and pervasive positive aging issues of women in today's society from different cohorts, backgrounds, and life situations. Each section describes a bridge between the theoretical aspects and practical applications of the theory that is consistent with the scientist-practitioner training model in psychology, including case studies and associated intervention strategies with older women in each chapter. In addition to incorporating current research on aging women's issues, each section provides the reader with background about the topic to give context and perspective. Examines a comprehensive range of issues for aging women Details current research trends Encompasses a holistic model of women's aging Ranges from physical and mental health in response to aging changes, to social relationships and sexuality Presents a "how to put research into practice" section in each chapter Focuses on topical issues that are relevant to women wanting to optimize their life outcomes as they live, on average, longer than ever before

Women's Health

Adolescent sexuality contraception pregnancy eating disorders partner violence vaginitis osteoarthritis etc.

Women's Health in Physical Therapy

In this thoroughly updated second edition, Judith Walzer Leavitt, a leading authority on the history of women's health issues, has collected thirty-five articles representing important scholarship in this once-neglected field. Timely and fascinating, this volume is organized chronologically and then by topic, covering studies of women and health in the colonial and revolutionary periods and the nineteenth century through the Civil War. The remainder of the book concentrates on the late nineteenth and twentieth centuries and addresses such controversial issues as body image and physical fitness, sexuality, fertility, abortion and birth control, childbirth and motherhood, mental illness, women's health care providers (midwives, nurses, physicians), and health reform and public health.

Exam Prep for: Womens Health; Readings on Social,

The increased attention currently being paid to women's reproductive health issues has produced a corresponding interest in the role that communication plays in promoting better health care. Groundbreaking and comprehensive, this book is the first systematic examination of the major types and forms of messages about women's reproductive health - medical, social scientific and public - and the degree to which these messages compare with and contradict each other. Within the broad framework of communication, a range of women's health issues are examined in this book from political, historical, technological and feminist perspectives. The issues examined include: abortion; infertility; drug and alcohol

use in pregnancy; childbirth; AIDS; menst

Women and Positive Aging

In this shocking, hard-hitting expose in the tradition of Naomi Klein and Barbara Ehrenreich, the editorial director of Feministing.com, reveals how inadequate, inappropriate, and even dangerous treatment threatens women's lives and well-being. Editor of the award-winning site Feministing.com, Maya Dusenbery brings together scientific and sociological research, interviews with experts within and outside the medical establishment, and personal stories from women across the country to provide the first comprehensive, accessible look at how sexism in medicine harms women today. Dusenbery reveals how conditions that disproportionately affect women, such as autoimmune diseases, chronic pain conditions, and Alzheimer's disease, are neglected and woefully under-researched. "Contested" diseases, such as fibromyalgia and chronic fatigue syndrome, that are 70 to 80 percent female-dominated are so poorly understood that they have not yet been fully accepted as "real" conditions by the whole of the profession. Meanwhile, despite a wealth of evidence showing the impact of biological difference between the sexes in everything from drug responses to symptoms to risk factors for various diseases—even the symptoms of a heart attack!—medicine continues to take a one-size-fits-all approach: that of a 70 kilogram white man. In addition, women are negatively impacted by the biases and stereotypes that

dismiss them as "chronic complainers," leading to long delays—often years long—to get diagnosed. The consequences are catastrophic. Offering a clear-eyed explanation of the root causes of this insidious and entrenched bias and laying out its effects, *Doing Harm* will change the way we look at healthcare for women.

Coming Out of the Classroom Closet

Social Psychology of Health

In *Seizing the Means of Reproduction*, Michelle Murphy's initial focus on the alternative health practices developed by radical feminists in the United States during the 1970s and 1980s opens into a sophisticated analysis of the transnational entanglements of American empire, population control, neoliberalism, and late-twentieth-century feminisms. Murphy concentrates on the technoscientific means—the technologies, practices, protocols, and processes—developed by feminist health activists. She argues that by politicizing the technical details of reproductive health, alternative feminist practices aimed at empowering women were also integral to late-twentieth-century biopolitics. Murphy traces the transnational circulation of cheap, do-it-yourself health interventions, highlighting the uneasy links between economic logics, new forms of

racialized governance, U.S. imperialism, family planning, and the rise of NGOs. In the twenty-first century, feminist health projects have followed complex and discomfoting itineraries. The practices and ideologies of alternative health projects have found their way into World Bank guidelines, state policies, and commodified research. While the particular moment of U.S. feminism in the shadow of Cold War and postcolonialism has passed, its dynamics continue to inform the ways that health is governed and politicized today.

Doing Harm

Edited by Meda Chesney-Lind and Lisa Pasko, *Girls, Women and Crime: Selected Readings, Second Edition* is a compilation of journal articles on the female offender written by leading researchers in the field of criminology and women's studies. The individual sections in the book survey four major areas: theories of female criminality, literature on female juvenile delinquents, women as offenders and women in prison. The readings in *Girls, Women, and Crime* focus on two central questions: How does gender matter in crime and the justice system? What characterizes women's and girls' pathway to crime? In answering these key questions, the contributors reveal the complex worlds females in the criminal justice system must often negotiate-worlds that are frequently riddled with violence, victimization, discrimination, and economic marginalization.

Women, Race, & Class

In *Whistling Vivaldi*, described as a 'beautifully-written account' of the relationship between stereotypes and identity, Claude Steele offers a vivid first-person detailing of the research that brought him to his groundbreaking conclusions. Through the telling of dramatic personal stories, Dr. Steele shares the process of constructing and completing experiments and statistical studies that show that exposing subjects to stereotypes - merely reminding a group of female math majors about to take a math test, for example, that women are considered naturally inferior to men at math - impairs their performance in the area affected by the stereotype. Steele's conclusions shed new light on a host of American social phenomena, from the racial and gender gaps in standardized test scores to the belief in the superior athletic prowess of black men. As Homi Bhabha states, 'Steele's book is both urgent and important in understanding the tyranny of the stereotype and liberating ourselves from its derogatory, one-dimensional vision.' *Whistling Vivaldi* presents a new way of looking at identity and the way it is shaped by social expectations, and, in Richard Thompson Ford's words, 'offers a clear and compelling analysis and, better still, straightforward and practical solutions.'

Becoming Women

This work includes 1000 entries covering the spectrum of defining women in the contemporary world.

Still Lifting, Still Climbing

Designated a Reference Reviews Top Ten Print Reference Source 2005 The Encyclopedia of Women's Health meets this challenge by bringing together an impressive array of experts on topics from reproductive issues to gastrointestinal illnesses. This skilfully edited volume, informed by current health issues and health-care realities, offers readers practical information, historical aspects, and future directions, all meticulously researched and conveniently presented. Key features include: -Accessible A-to-Z coverage, including AIDS, birth control, hormone replacement therapy, teen pregnancy, sexual harassment, violence, body image, access to health care and more. -Entries spanning the medical, psychological, sociocultural, spiritual, and legal arenas. -Medical topics explored from both conventional and complementary perspectives. -Cross-cultural data illustrate issues as they apply to minority women, rural women, the elderly, and other underserved populations. -Special chapters on disparities in women's health and health care. -Historical overview of women in health - as patients and as professionals. -Suggested readings and resource lists.

Seizing the Means of Reproduction

This landmark book empowers educators to become visible, positive influences and role models for gay and lesbian students in their classrooms and schools. As most homosexual educators, and even students, remain invisible due to possible hostilities of “coming out,” this eye-opening book presents recent research to help gay and lesbian teachers break their silence. It encourages them to speak out on issues of homosexuality where curricula, civil rights, personal freedoms, and social entitlements are concerned. It promotes the development of school-based intervention for gay, lesbian, and bisexual students. While the controversy over education and homosexuality is one of the most personally threatening in this nation’s history, the timely research presented in *Coming Out of the Classroom Closet* will hearten gay and lesbian educators to continue to strive for fair treatment as peers and for equal representation in educational materials. Pointing to reports of greater social support and legal protection than is assumed by most in the educational system, this book should be required reading for all persons concerned about continuing to provide high-quality education at all levels--college and university, secondary, and even elementary. Chapters of *Coming Out of the Classroom Closet* look closely at many issues surrounding the issue of homosexuality in schools, including a history of treatment of gay and lesbian educators and their legal rights; effects of internalized homophobia on homosexual educators; gay and lesbian student’s perceptions of their counselors and teachers

ability to understand and help; beliefs, lack of knowledge, and lack of training of counselors and teachers about the needs of gay and lesbian youth; images of gays and lesbians in sexuality and health textbooks; important AIDS education; and the issue of homophobia.

The Beauty Myth

In a culture where beauty is currency, women's bodies are often perceived as measures of value and worth. The search for visibility and self-acceptance can be daunting, especially for those on the cultural margins of "beauty." *Becoming Women* offers a thoughtful examination of the search for identity in an image-oriented world. That search is told through the experiences of a group of women who came of age in the wake of second and third wave feminism, featuring voices from marginalized and misrepresented groups. Carla Rice pairs popular imagery with personal narratives to expose the "culture of contradiction" where increases in individual body acceptance have been matched by even more restrictive feminine image ideals and norms. With insider insights from the Dove Campaign for Real Beauty, Rice exposes the beauty industry's colonization of women's bodies, and examines why "the beauty myth" has yet to be resolved.

Invisible Women

Material Discourses of Health and Illness applies discursive approaches to the field of health psychology, in stark contrast to the bio-medical model of health and illness. The discursive approach uses the person's experience and feelings as the central focus of interest, whereas the more traditional models regarded these as coincidental and relatively unimportant. The book provides an accessible and compelling introduction to social constructionist and discursive approaches to those with limited previous knowledge of socio-linguistic theory and research. It provides practical examples of how these approaches can be applied to the field of health psychology with a collection of sophisticated discursive analyses which demonstrate the distinctive contribution that can be made by psychologists to a field that has been largely dominated by sociologists and anthropologists.

Girls, Women, and Crime

Data is fundamental to the modern world. From economic development, to healthcare, to education and public policy, we rely on numbers to allocate resources and make crucial decisions. But because so much data fails to take into account gender, because it treats men as the default and women as atypical, bias and discrimination are baked into our systems. And women pay tremendous costs for this bias, in time, money, and often with their lives. Celebrated feminist advocate Caroline Criado Perez investigates shocking root cause of gender inequality and research in *Invisible Women*†, diving into women's lives at home,

the workplace, the public square, the doctor's office, and more. Built on hundreds of studies in the US, the UK, and around the world, and written with energy, wit, and sparkling intelligence, this is a groundbreaking, unforgettable exposé that will change the way you look at the world.
