Since the publication of the Institute of Medicine (IOM) report Clinical Practice Guidelines We Can Trust in 2011, there has been an increasing emphasis on assuring that clinical practice guidelines are trustworthy, developed in a transparent fashion, and based on a systematic review of the available research evidence. To align with the IOM recommendations and to meet the new requirements for inclusion of a guideline in the National Guidelines Clearinghouse of the Agency for Healthcare Research and Quality (AHRQ), American Psychiatric Association (APA) has adopted a new process for practice guideline development. Under this new process APA's practice guidelines also seek to provide better clinical utility and usability. Rather than a broad overview of treatment for a disorder, new practice guidelines focus on a set of discrete clinical questions of relevance to an overarching subject area. A systematic review of evidence is conducted to address these clinical questions and involves a detailed assessment of individual studies. The quality of the overall body of evidence is also rated and is summarized in the practice guideline. With the new process, recommendations are determined by weighing potential benefits and harms of an intervention in a specific clinical context. Clear, concise, and actionable recommendation statements help clinicians to incorporate recommendations into clinical practice, with the goal of improving quality of care. The new practice guideline format is also designed to be more user friendly by dividing information into modules on specific clinical questions. Each module has a consistent organization, which will assist users in finding clinically useful and relevant information quickly and easily. This new edition of the practice guidelines on psychiatric evaluation for adults is the first set of the APA's guidelines developed under the new guideline development process. These guidelines address the following nine topics, in the context of an initial psychiatric evaluation: review of psychiatric symptoms, trauma history, and treatment history; substance use assessment; assessment of suicide risk; assessment for risk of aggressive behaviors; assessment of cultural factors; assessment of medical health; quantitative assessment; involvement of the patient in treatment decision making; and documentation of the psychiatric evaluation. Each guideline recommends or suggests topics to include during an initial psychiatric evaluation. Findings from an expert opinion survey have also been taken into consideration in making recommendations or suggestions. In addition to reviewing the available evidence on psychiatry evaluation, each guideline also provides guidance to clinicians on implementing these recommendations to enhance patient care.

How to Heal a Broken Heart in 30 Days

30 Days to Understanding the Bible

How math can be used to improve performance and predict outcomes in professional sports Mathletics is a remarkably entertaining book that shows readers how to use simple mathematics to analyze a range of statistical and probability-related questions in professional baseball, basketball, and football, and in sports gambling. How does professional baseball evaluate hitters? Is a singles hitter like Wade Boggs more valuable than a power hitter like David Ortiz? Should NFL teams pass or run more often on first downs? Could professional basketball have used statistics to expose the crooked referee Tim Donaghy? Does money buy performance in professional sports? In Mathletics, Wayne Winston describes the mathematical methods that top coaches and managers use to evaluate players and improve team performance, and gives math enthusiasts the practical tools they need to enhance their understanding and enjoyment of their favorite sports—and maybe even gain the outside edge to winning bets. Mathletics blends fun math problems with sports stories of actual games, teams, and players, along with personal anecdotes from Winston's work as a sports consultant. Winston uses easy-to-read tables and illustrations to illuminate the techniques and ideas he presents, and all the necessary math concepts—such as arithmetic, basic statistics and probability, and Monte Carlo simulations—are fully explained in the examples. After reading Mathletics, you will understand why baseball teams should almost never bunt, why football overtime systems are unfair, why points, rebounds, and assists aren't enough to determine who's the NBA's best player—and much, much more. In a new epilogue, Winston discusses the stats and numerical analysis behind some recent sporting events, such as how the Dallas Mavericks used analytics to become the 2011 NBA champions.

“Beautifully written, compellingly personal, and a treasure to read.” —Most Rev. Charles J. Chaput, OFM, Cap., Archbishop of Philadelphia “This spiritually grounded, easy-to-read treatise is a solid piece of research, and yet is still packed throughout with supporting anecdotes that the reader will recognize and appreciate. Eminently practicable, *Unrepeatable* is for every Christian, especially the teacher, counselor, or spiritual director, who is truly serious about sifting through the cultural morass to find the ‘right’ vocation, rather than just a job.” —Bishop Robert Barron, Auxiliary Bishop, Archdiocese of Los Angeles What if we were able to gain profound insight into the unique design, creative drive, and potential destiny of the people in our lives? The bold promise of this book is that we can. This ability carries an awesome responsibility: We must all be mentors and midwives to the personal vocations of others. *Unrepeatable* is about the urgent need for each of us to cultivate the vocations of others and the steps we should take to do it well. By smartly weaving evocative stories of those who have radically lived out their callings with practical tools for discernment and mentorship, Luke Burgis and Joshua Miller—who have a combined twenty-five years of experience helping people and organizations discover their purpose—turn staid perceptions of vocation on their head. *Unrepeatable* will equip you to:

- Renew your church, school, community, or company by empowering every member to discover, embrace, and fully live out their unique calling
- Confidently teach and mentor young people in critical skills of discernment and decision-making
- Know and be known by others in a deeply personal way through a technique that unlocks and awakens the deepest desires of the heart

As we enter into the stories of others' lives, we enter into the story of God's love. There is no greater adventure. *Unrepeatable* invites you to be a part of it.
